## Cisco 350-601 Reliable Test Answers, Latest 350-601 Exam Format

Up to now, there are three versions of 350-601 exam materials for your choice. So high-quality contents and flexible choices of 350-601 learning mode will bring about the excellent learning experience for you. Though the content of these three versions of our 350-601 study questions is the same, their displays are totally different. And you can be surprised to find that our 350-601 learning quiz is developed with the latest technologies as well.

The Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification obtained from passing the Cisco 350-601 Exam is highly recognized in the industry. It demonstrates that the individual has the skills and knowledge required to implement and manage data center technologies effectively. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification is also an indication of the individual's commitment to their profession and their willingness to learn and grow in the field.

## Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q229-Q234):

### NEW QUESTION # 229

Refer to the exhibit.

The Cisco NX-OS scheduler must run every day at 3:00 a.m. Which code snippet completes the script?

- A. time daily 3:00
- B. time start daily 3:00

- C. time weekly 7 3:00
- D. time start weekly 7 3:00

**Answer: B**

Explanation:

The correct answer is C: time start daily 3:00 because of how the Cisco NX-OS scheduler syntax is structured.

In NX-OS, when defining a scheduler schedule, the correct format to execute a job at a recurring time includes the keyword start, which specifies when the job should begin execution. Cisco documentation for NX-OS scheduler clearly defines that recurring jobs must be configured using the format:

scheduler schedule name < name >

job name < job-name >

time start daily < hh:mm >

The keyword start is mandatory when defining periodic execution. Without it, the command is syntactically incomplete or invalid in NX-OS.

Option A (time daily 3:00) is incorrect because it omits the required start keyword. Options B and D specify weekly execution, not daily, and therefore do not meet the requirement of running the job every day.

Thus, time start daily 3:00 ensures that the backup job runs automatically every day at 3:00 a.m., aligning exactly with the requirement in the question and Cisco NX-OS scheduler configuration standards.

### NEW QUESTION # 230

Which command reduces the amount of time it takes to complete the ISSU on a Cisco Nexus 7000 series switch that has dual supervisor modules and two I/O modules?

- A. install all epld bootflash:<image>
- B. install all epld bootflash:<image>
- C. install all kickstart <image>system<image>parallel
- D. install all kickstart<image>system<image>

**Answer: C**

Explanation:

The command that reduces the amount of time it takes to complete the ISSU on a Cisco Nexus 7000 series switch that has dual supervisor modules and two I/O modules is install all kickstart

<image>system<image>parallel. This command performs a parallel upgrade of the kickstart and system images on all modules, which reduces the downtime and speeds up the ISSU process. The other commands (install all epld bootflash:<image> and install all kickstart<image>system<image>) do not perform a parallel upgrade and take longer to complete the ISSU. References: For more information on how to perform an ISSU on a Cisco Nexus 7000 series switch, please refer to the following resources:

\* Cisco Nexus 7000 Series NX-OS Software Upgrade and Downgrade Guide

\* Cisco Nexus 7000 Series NX-OS ISSU Upgrade Guide

### NEW QUESTION # 231

Refer to the exhibit An engineer analyzes a Wireshark packet flow between a PC and a DHCP server What occurs in the packet flow?

- A. The PC receives IP address 10.53.58.3 from the DHCP server.
- B. The PC sends an anycast asking for an IP address
- C. The PC sends a broadcast asking for an IP address.
- D. The PC sets its IP address to 0.0.0.0 because no DHCP server is available

**Answer: B**

### NEW QUESTION # 232

Refer to the exhibit. A network engineer must retrieve the network interface name from a JSON object. The engineer loads the JSON into a Python dictionary named json\_object. Which code snippet completes the Python script?

- A. Option C

- B. Option D
- **C. Option A**
- D. Option B

**Answer: C**

### NEW QUESTION # 233

A DevOps engineer must implement a bash script to query a REST API and return the available methods. Which code snippet completes the script?

- A. OPTIONS
- B. DELETE
- C. TRACE
- **D. POST**

**Answer: D**

### NEW QUESTION # 234

.....

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your 350-601 exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest 350-601 Exam Torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment.
