If you purchase our study materials, you will have the opportunity to get the newest information about the SAFe-Practitioner exam. More importantly, the updating system of our company is free for all customers.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q198-Q203):

### NEW QUESTION # 198

Three members of Team C created a new workflow to speed up the testing process. They spent an entire Iteration designing the process but discovered, just before implementation, that the system could not support the workflow. The rest of the team was excited to hear what was learned from the failed experiment. Which of the following characteristics of a high-performing Agile Team is Team C demonstrating?

- A. Trust each other, allowing for both healthy conflict and reliance on others
- B. Enjoy their work and working together
- C. **Fostering an environment for taking risks without fear of embarrassment or punishment**
- D. Accountable to each other and the organization for reliably completing quality work

### Answer: C

Explanation:

This statement is one of the characteristics of a high-performing Agile Team according to the Scaled Agile Framework (SAFe)1. It means that the team members are encouraged to experiment, learn, and innovate, without being afraid of making mistakes or being judged by others. The team members view failures as opportunities for improvement and celebrate the learnings from them. Team C is demonstrating this characteristic by creating a new workflow to speed up the testing process, even though it did not work out as expected. The rest of the team was excited to hear what was learned from the failed experiment, rather than blaming or criticizing the three members who worked on it. References: Agile Teams

### NEW QUESTION # 199

Which of the following Story components captures details on testing for completion?

- A. **Acceptance criteria**
- B. Story map
- C. Release plan
- D. User voice

### Answer: A

Explanation:

Acceptance criteria are the conditions that a story must satisfy to be accepted by the Product Owner and the stakeholders. They define the boundaries of the story and provide guidance on how to test it for completion.

Acceptance criteria are usually written as a list of statements or scenarios that describe the expected behavior and outcomes of the story. They help to ensure that the story delivers value to the user and meets the Definition of Done1234. ### NEW QUESTION # 200

Which of the below are not part of the CALMR approach to DevOps?

- A. **Authentication**
- B. Culture
- C. Lean Flow
- D. Measurement

### Answer: A

## NEW QUESTION # 201

What does a program board help teams identify?

- A. Program-level risks
- B. Each teams tasks
- **C. Dependencies between teams**
- D. Work breakdowns

**Answer: C**

Explanation:

A program board is a visual summary of the features or goals, when they need to be reached, and any cross- team dependencies impacting their delivery. The program board helps teams within the Agile Release Train (ART) to coordinate their work and communicate their plan to the entire organization. One of the main purposes of the program board is to help teams identify and manage dependencies between teams, which can affect the delivery of value and increase the risk of delays or failures. By visualizing and tracking dependencies on the program board, teams can avoid or resolve them during the Program Increment (PI) planning event or throughout the PI execution.
