2026 HP Trustable Exam HPE7-J02 Consultant

The ExamcollectionPass is one of the leading brands that have been helping HP HPE7-J02 Certification aspirants for many years. Hundreds of HP Advanced HPE Storage Integrator Solutions Written Exam exam applicants have achieved the Advanced HPE Storage Integrator Solutions Written Exam in Procurement and Supply HP certification. All these successful HP test candidates have prepared with real and updated Advanced HPE Storage Integrator Solutions Written Exam in Procurement and Supply HP Questions of ExamcollectionPass. If you also want to become Advanced HPE Storage Integrator Solutions Written Exam in Procurement and Supply HP certified, you should also prepare with our HP Advanced HPE Storage Integrator Solutions Written Exam actual exam questions.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 2	• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 3	• Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 4	• Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.
Topic 5	• Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 6	• Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.
Topic 7	• Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.

Topic 8	• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.

HP HPE7-J02 Cert Guide & Valid HPE7-J02 Practice Questions

Infinite striving to be the best is man's duty. We have the responsibility to realize our values in the society. Of course, you must have enough ability to assume the tasks. Then our HPE7-J02 learning quiz can give you some help. First of all, you can easily pass the HPE7-J02 Exam and win out from many candidates for our HPE7-J02 study materials are the most effective exam materials in the market. Secondly, you can also learn a lot of the specilized knowledge at the same time.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30
Refer to the exhibit.

Qty	Part Number	Description
1	S1R06A	HPE GL Block STG MP Base Clstr Config
1	R7C75A	HPE Alletra STG MP 2U Chassis
4	R7C76A	HPE Alletra STG MP C14 1600W AC PS
2	R9R52A	HPE C13 - C14 250V Blk 1.4m WW Pwr Cord
2	R9S00A	HPE C13 - C14 250V Gry 1.4m WW Pwr Cord
2	R7D02A	HPE Alletra STG MP 16c Cluster Blk Node
6	S2A68A	HPE Alletra STG MP 100GbE 2p OCP
12	R9F76A	Aruba 100G QSFP28 to QSFP28 2m AOC
2	S2564A	HPE Alletra STG MP 32Gb 4p FC HBA
2	S1R08A	HPE Alletra STG MP 32p 100GbE Swtch Bdl
2	S1L68A	HPE C13 - C14 250V Blk 2m WW Pwr Cord
1	S0A95A	HPE Switch Pair Install Kit
1	S1J10A	HPE AL STG MP NVMe CTO Block Shelf
2	S1R28A	HPE Alletra STG MP Block Exp 24Bk Node
24	R9H67A	HPE Alletra STG MP 3.84TB NVMe SLD SSD
1	S0A98A	HPE SED LTU
1	S3Q00A	HPE GreenLake for Block Storage MP OS per TB 3-year LTU
92	S3Q00AAE	HPE GreenLake for Block Storage MP OS per TB 3-year Software and Support SaaS

Your customer had an unexpected failure of their current storage array, causing them to lose some of their critical data. As a result, they are looking for a storage array with a guarantee of 100% data availability to prevent this failure and loss in the future.
They need 80TB raw and two new 25GbE top-of-rack switches to connect to their environment.
They expect 5% annual growth.
Which correction should be made to the configuration in the exhibit to meet the customer's requirements?

- A. Change to 25G networking
- B. HPE GreenLake financial model
- C. Decrease to 20 × 3.84TB drives
- D. Add 2× Aruba 8325 switches

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
The exhibit shows the use of 32Gb FC HBAs and 100GbE switches (Aruba 100G). However, the customer specifically requires 25GbE top-of-rack switches. Therefore, the configuration needs to be corrected to
25GbE networking. The HPE Alletra MP B10000 guarantees 100% data availability SLA, so the primary correction is networking alignment, not drives or financial model.
Distractors:
B: Reducing drives reduces raw capacity below 80TB requirement.
C: GreenLake is a consumption model but not the technical correction required.
D: Aruba 8325 is a core switch option; customer only asked for ToR 25GbE.
Key Concept: Networking alignment with requirements.
Reference: HPE Alletra MP Ordering and Configuration Guide.

NEW QUESTION # 31

Your customer is a regional bank with branches in two different cities. Each branch is run as an isolated independent business and IT manages their SANs as separate fabrics to limit the scope of any failure. They use B-Series Switches.

The customer has requested a disaster recovery option that will allow replication between the two sites without merging the fabrics. Which SAN technology meets the requirements?

- A. NPIV
- B. Fabric partitioning
- C. FC-FC routing
- D. FCIP

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
FC-FC routing (also known as Fibre Channel Routing / LSANs on B-Series switches) allows replication between separate SAN fabrics without merging them. This supports disaster recovery scenarios while preserving fabric isolation, exactly matching the bank's requirement.
Distractors:
A: FCIP tunnels extend Fibre Channel over IP networks, but this typically merges SAN domains.
C: NPIV (N_Port ID Virtualization) allows multiple virtual WWNs per port, not cross-fabric replication.
D: Fabric partitioning is zoning and segmentation within a single fabric, not between independent fabrics.
Key Concept: FC-FC routing on Brocade (B-Series) for SAN isolation with replication.
Reference: HPE B-Series SAN Design Guide, Brocade FCR/LSAN Concepts.

NEW QUESTION # 32

You are troubleshooting a storage environment using HPE Alletra Storage MP B10000 in a Peer Persistence configuration. A customer reports high latency when accessing data from applications.

When reviewing the MPIO path status on the host, what should be the path status for connections to the storage array located in the remote data center?

- A. Passive
- B. Standby
- C. Active Non-optimized
- D. Active Optimized

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In an HPE Peer Persistence configuration (supported on HPE Alletra MP, Primera, and 3PAR), hosts see volumes presented from arrays at both sites. For optimal load balancing and transparent failover, the local array paths are shown as "Active Optimized" while the remote array paths are marked "Active Non- optimized". The "Non-optimized" label indicates these paths are functional but involve remote access with higher latency. This design ensures automatic transparent failover if the local site becomes unavailable.
Distractors:
A: "Active Optimized" applies only to local array paths, not remote ones.
B: Passive paths are typical of ALUA implementations without Peer Persistence, not here.
D: "Standby" is not the term used in Peer Persistence multipathing.
Key Concept: MPIO with Peer Persistence (ALUA Active/Active configuration).
Reference: HPE Primera/Alletra Peer Persistence Best Practices Guide.

NEW QUESTION # 33

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By adding more arrays and capacity to a single scale-out group.
- B. By selecting more flash to cache ratio on the expansion shelves.
- C. By including more NIC cards to load balance host traffic.
- D. By initially selecting the timeless storage option for the array.

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.
Distractors:
B: Adding NICs may help with throughput but not backend latency or capacity scaling.
C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.
D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.
Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.
Reference: HPE Alletra 6000 Technical Architecture Guide.

NEW QUESTION # 34

Your customer has 2 Alletra 6000 arrays configured for asynchronous replication. The facilities team is planning grid maintenance in the datacenter hosting the source array. They want to proactively move all host I/O to the target array.
Which action needs to be done on the Alletra group level to move the host I/O to the other datacenter?

- A. Handover
- B. Promote
- C. Failover
- D. Demote

Answer: C

NEW QUESTION # 35

......

The study material to get HP Advanced HPE Storage Integrator Solutions Written Exam certified should be according to individual's learning style and experience. Real HP HPE7-J02 Exam Questions certification makes you more dedicated and professional as it will provide you complete information required to work within a professional working environment.
