## 100% Pass Reliable OCPE - Valid Category-7A-General-and-Household-Pest-Control Exam Simulator

Our company pays great attention to improve our Category-7A-General-and-Household-Pest-Control exam materials. Our aim is to develop all types study material about the official exam. Then you will relieve from heavy study load and pressure. Also, our researchers are researching new technology about the Category-7A-General-and-Household-Pest-Control Learning Materials. You will find that every detail of our Category-7A-General-and-Household-Pest-Control study braindumps is perfect and excellent not only on the content but also on the displays. And every button on our website is easy, fast and convenient to use.

### OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

Signs of a Norway rat infestation include:

- A. Ceiling void nests lined with soft paper
- B. Eggs laid in small batches in secluded places
- C. Dark, greasy smears and a musty odor

**Answer: C**

Explanation:

Norway rats leave dark, greasy smears along walls from body oils and a musty odor from their urine, as they travel along established runways. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 8: Rodents) lists these as key signs of infestation. Option A (eggs) is incorrect, as rats are mammals and do not lay eggs. Option C (ceiling void nests) is more typical of squirrels or birds, not Norway rats, which nest in burrows or lower areas.

#### NEW QUESTION # 25

The first step to obtain information regarding a pesticide would be to:

- A. Call your doctor
- B. Read the label and/or SDS sheet
- C. Contact the EPA

**Answer: B**

Explanation:

The pesticide label and Safety Data Sheet (SDS) are the primary sources of information about a pesticide, providing details on its use, hazards, and safety precautions. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 2: Pesticide Labels) emphasizes that the first step in obtaining information is to read the label and/or SDS sheet. Option A (contact the EPA) is unnecessary for routine information, as the label/SDS is readily available. Option C (call your doctor) is relevant for medical emergencies, not general information.

#### NEW QUESTION # 26

Swarming ants and termites are similar, but the termite:

- A. Has bent antennae
- B. Has a narrow waist
- C. Does not have a waist

**Answer: C**

Explanation:

Swarming termites and ants can be distinguished by physical characteristics. Termites do not have a waist, as their body is broad and straight, while ants have a narrow, pinched waist. Additionally, termites have straight antennae, whereas ants have bent (elbowed) antennae. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Termites vs. Ants) highlights these differences. Option A (bent antennae) applies to ants, not termites. Option C (narrow waist) also describes ants, not termites.

### NEW QUESTION # 27

The transfer of Lyme disease to humans can occur from the:

- A. Adult stage only
- **B. Nymph or adult stage**
- C. Nymph stage only

**Answer: B**

Explanation:

Lyme disease is transmitted by the blacklegged tick, and both the nymph and adult stages can transfer the disease to humans if infected with the bacterium *Borrelia burgdorferi*. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Ticks) notes that nymphs are more likely to transmit due to their small size and longer feeding time, but adults can also transmit.

Option A (nymph only) and Option C (adult only) are incorrect, as both stages are capable.

### NEW QUESTION # 28

Written notification for single-family residences must include the:

- A. Full pesticide label directions
- B. Name of the pesticide used
- **C. Exact date of application**

**Answer: C**

Explanation:

For single-family residences, NJDEP regulations (N.J.A.C. 7:30-9.13) require written notification to include the exact date of application to inform residents of when the treatment will occur. Option B (full pesticide label directions) is not required in the notification, though the label must be followed.

Option C (name of the pesticide) is typically included in post-application notices but is not mandatory in the pre-application written notification.

### NEW QUESTION # 29

.....

You can imagine that you just need to pay a little money for our Category-7A-General-and-Household-Pest-Control exam prep, what you acquire is priceless.
