Page 1 of 6

1. Refer to the exhibit.

Metric	Node 1	Node 2	Node 3
Model	100-0000-0	100-0000-0	100-0000-0
Number of VMs	100-0000-0	100-0000-0	100-0000-0
CPU Capacity	100-0000-0	100-0000-0	100-0000-0
Memory Capacity	100-0000-0	100-0000-0	100-0000-0
Storage Capacity	100-0000-0	100-0000-0	100-0000-0
Health	Good	Warning	Good

2. Which expected operations during node addition when the new node has a different AOS version?

- The entire cluster is upgraded to the latest one-click release.
- The node is added and a separate upgrade operation must be performed.**
- The addition fails and forces the administrator to image using standalone Foundation.

DOWNLOAD the newest Lead2PassExam NCP-CN PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1CFhFZEueFtHb5V9eHpHYdKE2d8KIP4J>

The way to pass the NCP-CN actual test is diverse. You can choose the one which is with high efficiency and less time and energy invested to get qualified by NCP-CN certification. The NCP-CN practice download pdf offered by Lead2PassExam can give you some reference. You just need to practice with NCP-CN Vce Torrent for 1-2 days, then, you can be confident to face the NCP-CN actual test with ease mood. The 99% pass rate of NCP-CN training vce will ensure you 100% pass.

Most customers reflected that our Nutanix exam questions cover most of questions of actual test. So if you decided to choose NCP-CN as your study materials, you just need to spend your spare time to practice NCP-CN Dumps PDF and remember the points of pass exam guide. Our latest vce dumps are the guarantee of clear exam.

Valid Braindumps NCP-CN Ppt, NCP-CN Valid Exam Tips

We know making progress and getting the certificate of NCP-CN study materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. Our Nutanix Certified Professional - Cloud Native v6.10 exam prep has taken up a large part of market. with decided quality to judge from customers' perspective, If you choose the right NCP-CN Practice Braindumps, it will be a wise decision. Our behavior has been strictly ethical and responsible to you, which is trust worthy.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q40-Q45):

NEW QUESTION # 40

A development Kubernetes cluster deployed with NKP is having performance issues. The Cloud Engineer commented that worker VMs are consuming a lot of CPU and RAM. The Platform Engineer took a look at the CPU and RAM statistics with Grafana and confirmed that the worker VMs are running out of CPU and memory. The Kubernetes cluster has 4 workers with 8 vCPUs and 32 GB RAM. What could the Platform Engineer do?

- A. Add one more worker with `nkp scale nodepools ${NODEPOOL_NAME} --replicas=5 --cluster-name=${CLUSTER_NAME} -n ${CLUSTER_WORKSPACE}`
- B. Ask developers to lower the number of application replicas.
- C. Add more CPU and memory to workers with `nkp scale --cpu 16 --memory 64 --cluster-name ${CLUSTER_NAME}`
- D. Call tech support to take a look at the infrastructure and investigate.

Answer: A

Explanation:

The NKPA course addresses performance issues in NKP clusters, such as high CPU and memory consumption on worker nodes, by recommending scaling options to distribute workloads more effectively.

The Kubernetes cluster in the scenario has 4 workers, each with 8 vCPUs and 32 GB RAM, and is running out of resources. The most effective solution is to add more workers to the cluster to increase overall capacity and balance the load, rather than modifying existing workers or reducing application replicas.

The correct action is to add one more worker using the command `nkp scale nodepools`

`${NODEPOOL_NAME} --replicas=5 --cluster-name=${CLUSTER_NAME} -n`

`${CLUSTER_WORKSPACE}` (Option D). This command scales the specified node pool to 5 replicas (from the current 4), adding one additional worker to the cluster. The new worker will have the same configuration (8 vCPUs, 32 GB RAM) as the existing workers, providing additional capacity to alleviate resource contention. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "To address performance issues due to resource exhaustion in an NKP cluster, scale out by adding workers using `nkp scale nodepools`

`<nodepool-name> --replicas <count> --cluster-name <cluster-name> -n <workspace>`." Incorrect Options:

* A. Call tech support to investigate: While support can help, the issue is clearly resource exhaustion, which can be resolved by scaling the cluster—a task the Platform Engineer can perform directly.

* B. Ask developers to lower application replicas: Reducing replicas may decrease resource usage but could impact application availability or performance, which is not ideal for a development cluster.

* C. Add more CPU and memory to workers with `nkp scale --cpu 16 --memory 64`: The `nkp scale` command does not support `--cpu` and `--memory` flags for resizing existing workers. Resizing VMs typically requires updating the node pool configuration and replacing nodes, which is more complex than adding new workers.

NEW QUESTION # 41

A Platform Engineer would like to deploy an NKP Platform Application to all the clusters within an NKP workspace from the command line. What is the command set to use, and what parameters must be specified with it?

- A. The `nkp deploy app` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.
- B. The `nkp deploy platform-app` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.
- C. The `kubectl create appdeployment` command set would be utilized. The application ID, as well as the NKP workspace of the clusters, must be provided.
- D. The `nkp create appdeployment` command set would be utilized. The application ID & version, as well as the NKP workspace of the clusters, must be provided.

Answer: D

Explanation:

NKP Platform Applications (e.g., Rook Ceph, Prometheus, Fluent Bit) are pre-integrated tools that can be deployed to Kubernetes clusters within a workspace to provide services like storage, monitoring, and logging.

The NKPA course specifies that to deploy a platform application to all clusters in a workspace from the command line, the engineer uses the `nkp create appdeployment` command. This command creates an application deployment resource that targets the specified workspace and clusters.

The required parameters include the application ID (to identify the platform application), the version (to specify the desired version of the application), and the NKP workspace (to define the scope of clusters). For example: `nkp create appdeployment --app-id prometheus --version 2.30.0 --workspace fin-vd`. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "Use the `nkp create appdeployment` command to deploy platform applications, specifying the application ID, version, and target workspace to apply the deployment across all clusters in that workspace." Incorrect Options:

- * B. `nkp deploy platform-app`: This is not a valid NKP command. The correct command is `nkp create appdeployment`.
- * C. `nkp deploy app`: This is not a recognized command in the NKPA documentation.
- * D. `kubectl create appdeployment`: `kubectl` interacts with Kubernetes resources, not NKP-specific platform applications.

NEW QUESTION # 42

A Platform Engineer manages an NKP v2.12.x environment and is using NKP Image Builder (NIB) to create a custom image. Which two distributions are available for use by the engineer for this task? (Choose two.)

- A. Fedora
- B. Rocky Linux
- C. Ubuntu
- D. CentOS

Answer: B,C

Explanation:

The NKPA course specifies that the Nutanix Image Builder (NIB), used for creating custom machine images for NKP cluster nodes, supports specific Linux distributions that are compatible with Nutanix infrastructure and Kubernetes requirements. For NKP v2.12.x, the supported distributions for NIB are Ubuntu and Rocky Linux, as these are tested and optimized for NKP deployments, ensuring stability and compatibility with Cluster API (CAPI) and Nutanix AHV.

The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "NKP Image Builder (NIB) supports Ubuntu and Rocky Linux as base distributions for creating custom images for NKP cluster nodes, ensuring compatibility with Kubernetes and Nutanix infrastructure." Ubuntu provides a widely-used, well-supported base with long-term support (LTS) versions, while Rocky Linux is a CentOS replacement that Nutanix has adopted for its reliability and enterprise focus, especially after CentOS 8's end-of-life in 2021.

Incorrect Options:

* B. Fedora: Fedora is not a supported distribution for NIB in NKP, as it is more suited for bleeding-edge development rather than production Kubernetes environments.

* D. CentOS: CentOS 8 reached end-of-life in December 2021, and Nutanix has shifted to Rocky Linux as its replacement for NKP image building. The course does not list CentOS as a supported option for NIB in NKP v2.12.x.

NEW QUESTION # 43

An ecommerce company decides to apply an autoscaling configuration in its NKP cluster due to the fact that on holidays, they experience service drops due to a huge increase of simultaneous traffic.

Which statement best describes the configuration shown in the exhibit?

- A. The autoscaler could increase the number of nodes up to 15, but never reduce the number below 3.
- B. The autoscaler could have 15 or 3 nodes.
- C. The autoscaler could increase the number of nodes up to 3, but never reduce it below 15.
- D. The autoscaler could increase the number of nodes as needed, but never reduce it below 3.

Answer: A

NEW QUESTION # 44

A company has different Kubernetes clusters for different business units. Every business unit has separate Kubernetes clusters for production and development because the software deployed in production is different than development. Now, all production clusters for all business units are standardized and all clusters for development are standardized as well.

The company recently acquired NKP Ultimate licenses for all Kubernetes clusters.

How can the company control the standard configuration for both environments in all clusters (production and development)?

- A. Create new Kubernetes clusters for production and development with NKP for every business unit.
- B. Install Flux in every Kubernetes cluster and configure the appropriate kustomize.yaml in every Kubernetes cluster.
- C. Configure a production workspace and a development workspace and attach each Kubernetes cluster to the corresponding workspace.
- D. Install Flux in every Kubernetes cluster with the appropriate kustomize.yaml, with nkp install flux --kustomize=kustomize.yaml --kubeconfig=<cluster>.conf

Answer: C

Explanation:

The NKPA 6.10 documentation confirms that workspaces in NKP are used to logically group and standardize configurations across multiple clusters. By creating a production workspace and a development workspace, the organization can control and enforce standardized configurations and policies for all relevant clusters.

Exact extract:

"Workspaces provide logical separation for resources, configuration, and policy management across multiple clusters, enabling standardized operations." Reference:

Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Workspaces and Multi-Cluster Management" NCP-CN 6.10 Study Guide - "Standardizing Configurations Across Clusters"

NEW QUESTION # 45

.....

It is really a tough work to getting NCP-CN certification in their spare time because preparing actual exam dumps needs plenty time and energy. As the one of certification exam dumps provider, Lead2PassExam enjoys a high popularity for its profession of NCP-CN Exam Dumps and training materials. You will get high passing score in test with the help of our NCP-CN braindumps torrent.

Valid Braindumps NCP-CN Ppt: <https://www.lead2passexam.com/Nutanix/valid-NCP-CN-exam-dumps.html>

Nutanix NCP-CN Latest Test Bootcamp It is one of the best ways to prepare for the real exam so you don't have to face any trouble later on, Nutanix NCP-CN Latest Test Bootcamp And these candidates are putting a lot of effort just to find the right exam preparation materials, What a happy thing, Our NCP-CN test prep is compiled elaborately and will help the client get the NCP-CN certification, Firstly, there is a special customer service center built to serve our Valid Braindumps NCP-CN Ppt - Nutanix Certified Professional - Cloud Native v6.10 test questions users at any aspects and at any time.

There s also a professional aspect to this, Start a new song and NCP-CN set its properties, It is one of the best ways to prepare for the real exam so you don't have to face any trouble later on.

NCP-CN Latest Test Bootcamp - 2026 First-grade Nutanix Valid Braindumps NCP-CN Ppt 100% Pass

And these candidates are putting a lot of effort just to find the right exam preparation materials, What a happy thing, Our NCP-CN test prep is compiled elaborately and will help the client get the NCP-CN certification.

Firstly, there is a special customer service NCP-CN Latest Test Bootcamp center built to serve our Nutanix Certified Professional - Cloud Native v6.10 test questions users at any aspects and at any time.
