Confluent CCDAK Exam Dumps - Reliable Way To Get Success

Career grooming with CCDAK exams are your right. Rather, it has become necessary in the most challenging scenario of enterprises. Like most of the professionals, you might find it tough and beyond your limits. Here comes the role of ValidBraindumps CCDAK Dumps to encourage you and make it possible for you to step ahead with confidence. The growing network of our clientele proves that our dumps work wonders and help you gain a definite success in your CCDAK certification exams.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q136-Q141):

NEW QUESTION # 136

Which of the following Kafka Streams operators are stateless? (select all that apply)

- A. map
- B. flatmap
- C. filter
- D. aggregate
- E. branch
- F. groupBy

Answer: A,B,C,E,F

Explanation:

See <https://kafka.apache.org/20/documentation/streams/developer-guide/dsl-api.html#stateless-transformations>

NEW QUESTION # 137

Which two statements about Kafka Connect Single Message Transforms (SMTs) are correct?
(Select two.)

- A. SMTs are often used to join multiple records from a source data system into a single Kafka record.
- B. Masking data is a good example of an SMT.
- C. Multiple SMTs can be chained together and act on source or sink messages.
- D. SMT functionality is included within Kafka Connect converters.

Answer: B,C

Explanation:

SMTs (Single Message Transforms) are lightweight transformations applied to individual messages as they pass through Kafka Connect.

* Chaining SMTs: You can apply multiple SMTs in sequence by defining them in order in the connector config.

* Masking or modifying fields is a common use case (e.g., redacting sensitive data).

From Kafka Connect Documentation:

"Single Message Transforms (SMTs) are applied to individual messages. You can chain multiple SMTs together."

* SMTs do not perform joins (B is incorrect).

* Converters and SMTs are separate concerns (D is incorrect).

Reference: Kafka Connect Transformations Guide

NEW QUESTION # 138

Which of the following is a push query?

- A.

```
SELECT *  
FROM NUMBER_OF_TESTS  
WHERE ID='10';
```
- B.

```
SELECT windowstart, windowend, item_id, SUM(quantity)  
FROM orders  
WINDOW TUMBLING (SIZE 20 SECONDS)  
GROUP BY item_id  
EMIT CHANGES;
```
- C.

```
CREATE STREAM STUDENTS (ID STRING KEY, SCORE INT)  
WITH (kafka_topic='students_topic', value_format='JSON', partitions=4);
```
- D.

```
CREATE TABLE LEFT_TABLE (ID BIGINT PRIMARY KEY, NAME varchar, VALUE bigint) WITH  
(kafka_topic='left_topic', value_format='JSON', partitions=4);
```

Answer: B

NEW QUESTION # 139

You are sending messages to a Kafka cluster in JSON format and want to add more information related to each message:

- * Format of the message payload
 - * Message creation time
 - * A globally unique identifier that allows the message to be traced through the system
- Where should this additional information be set?

- A. Key
- **B. Header**
- C. Value
- D. Broker

Answer: B

Explanation:

Kafka message headers are the right place to include metadata such as:

- * Payload format (e.g., schema version)
- * Timestamps (custom)
- * Trace or correlation IDs

From Kafka Producer API Docs:

"Headers are a map of key-value pairs that can be used to include metadata alongside the message, without modifying the message body."

- * Keys determine partitioning and ordering
- * Values are the message payload
- * Brokers do not store arbitrary metadata fields

Reference: Kafka Producer Record API > Headers

NEW QUESTION # 140

How do Kafka brokers ensure great performance between the producers and consumers? (select two)

- **A. It does not transform the messages**
- B. It buffers the messages on disk, and sends messages from the disk reads
- **C. It leverages zero-copy optimisations to send data straight from the page-cache**
- D. It compresses the messages as it writes to the disk
- E. It transforms the messages into a binary format

Answer: A,C

Explanation:

Kafka transfers data with zero-copy and sends the raw bytes it receives from the producer straight to the consumer, leveraging the RAM available as page cache

NEW QUESTION # 141

.....

The content of our study materials is easy to be mastered and has simplified the important information. Our CCDAK test questions convey more important information with less questions and answers and thus make the learning relaxing and efficient. The software boosts self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our CCDAK Test Questions boost timing function and the function to stimulate the exam. Our CCDAK exam materials have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any contents which are hard to explain. So you can enjoy the service of high quality and pass the exam successfully.
