證考試，你將不會後悔你的選擇的。

最新的 Certified Senior System Architect PEGACPSSA23V1 免費考試真題 (Q12-Q17):

問題 #12

The MyCoSelfService ruleset contains the following instances of the same rule. The only differences between the instances are the circumstance settings and ruleset version. All ruleset versions are in the ruleset list.

Assuming users can access all the ruleset versions, which ruleset version is chosen by rule resolution when .Country = Japan?

- A. 01-01-02
- B. 01-01-03
- C. 01-02-01
- D. 01-01-04

答案： A

解題說明：

Rule resolution will choose the rule that is most specific to the circumstances of the case. Since the country is set to Japan, the rule resolution algorithm will choose the rule version that is circumstanced for Japan. Among the options, 01-01-02 is the circumstanced rule that matches the country condition of Japan and would be selected over the base rule and any other versions. Reference: Pega Platform Help - Rule Resolution.

問題 #13

You decide to use multiple pre-processing actions on a single flow action. Place the pre-processing actions in the order in which they are executed.

答案：

解題說明：

Explanation:

In Pega Platform, when configuring multiple pre-processing actions on a single flow action, the order of execution is as follows:

Execution Order:

- * Apply data transform
- * Run activity
- * Run robotic automation

This sequence is based on the typical order in which Pega processes these types of actions: data transforms are applied first to set initial values or transform the data as needed, followed by the execution of any activities for more complex processing, and finally, any configured robotic automation is run.

問題 #14

In a hiring case type, only HR Managers should have read access to a candidate's reference letter attachment. Which two tasks are used to fulfill this requirement? (Choose Two)

- A. Configure read access for a user according to a privilege
- B. Define a separate Attachment Category for HR Managers
- C. Restrict read access according to a When condition
- D. Configure attribute-based access control on the Attachment Category

答案： C,D

解題說明：

To ensure that only HR Managers have read access to a candidate's reference letter attachment, the tasks involved include restricting read access according to a When condition (B) and configuring attribute-based access control on the Attachment Category (C). The When condition can specify criteria that must be met for the attachment to be accessible, such as the user's role being an HR Manager. Attribute-based access control allows for the definition of access rules based on attributes of the data or user, providing a flexible and granular approach to securing sensitive attachments like reference letters. Reference: Pega Community documentation on attachment security and attribute-based access control.

問題 #15

A travel reservation servicing case includes a service level for responding to requests. The service level intervals vary according to passenger status, class of service, and fare type. Which implementation satisfies this requirement?

- A. Create a multivariate circumstanced rule and a when rule.
- B. Create a single property circumstanced rule and a when rule.
- **C. Create a multivariate circumstanced rule, a circumstance definition, and a circumstance template.**
- D. Create a single property circumstanced rule.

答案： C

解題說明：

To satisfy the requirement where service level intervals vary according to multiple criteria (passenger status, class of service, and fare type), you would create a multivariate circumstanced rule, a circumstance definition, and a circumstance template. This allows you to create SLAs that vary based on the combination of these criteria. References: Pega official documentation on circumstancing rules.

問題 #16

Which three statements about the guardrail score are true? (Choose Three)

- **A. Guardrail scores do not include Pega Platform core rules.**
- B. Rules with unjustified warnings are not counted in the compliance score.
- C. A weighted compliance score above 90 signifies that an application is ready for general distribution.
- **D. The Application Guardrails landing page counts the number of rules with no warnings or caution-level guardrail warnings.**
- **E. The Application Guardrails landing page counts the number of rules with severe or moderate guardrail warnings.**

答案： A,D,E

解題說明：

A: The Application Guardrails landing page does count the number of rules with severe or moderate warnings, as these can have a significant impact on the application's performance and maintainability.

B: Guardrail scores exclude Pega Platform core rules since these are established by Pega and are assumed to be optimized.

C: The landing page also counts the number of rules with no warnings or caution-level warnings, which contribute positively to the overall compliance score. Reference: Pega official documentation on the Application Guardrails landing page and guardrail scores.

問題 #17

.....

言行一致是成功的開始，既然你選擇通過苛刻的IT認證考試，那麼你就得付出你的行動，取得優異的成績獲得認證，NewDumps Pegasystems的PEGACPSSA23V1考試培訓資料是通過這個考試的最佳培訓資料，有了它就猶如有了了一個成功的法寶，NewDumps Pegasystems的PEGACPSSA23V1考試培訓資料是百分百信得過的培訓資料，相信你也 是百分百能通過這次考試的。
