HCL-HWA-ADM-102 Test Dumps - HCL-HWA-ADM-102 Test Papers

Users don't need to install any plugins or software to attempt the HCLSoftware HCL-HWA-ADM-102 practice exam. All operating systems support this format. The third and last format is HCLSoftware Certified Administrator- HWA 10.2 HCL-HWA-ADM-102 desktop software that can be used on Windows computers. The customers that have Windows laptops or computers can attempt the practice exam and prepare for it efficiently. These formats are in use by a lot of applicants currently and they are preparing for their best future on daily basis. Even the customers who have used it in the past for the preparation of HCLSoftware HCL-HWA-ADM-102 Certification Exam have rated our product as one of the best.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q788-Q793):

NEW QUESTION # 788

Troubleshooting HCL HWA 10.2 jobman abend shows TWS_home/log/jobman.20260107.trc truncated at 85MB during 3200 job launches/hour. Courier.msg semaphore contention. Audit trail shows jobman restarts x17. DWC job properties incomplete. What trace configuration prevents diagnostic loss?

- A. localopts TraceFileSize=500M; TraceFileCount=10

- B. TWS_home/TWS/trace.properties maxFileSize=1G
- C. globalopts TRACEFILESIZE=400M; jobmanTraceLevel=FULL
- D. conman "starttrace wsname#jobman MAX"

Answer: A

Explanation:

localopts TraceFileSize=500M TraceFileCount=10 enables jobman.trc rotation preventing 85MB truncation during 3200 launches/hour semaphore contention; preserves 17 restart audit correlation versus global trace affecting all processes or nonexistent trace.properties maintaining workstation-specific troubleshooting completeness.

NEW QUESTION # 789

Scenario: An agent installation log is needed for troubleshooting in HCL Workload Automation 10.2. Where is the primary twsinst log file located?

- A. TWA_DATA_DIR/logs/
- B. /tmp/twsinst.log
- C. TWA_home/logs/twsinst_*.log
- D. <TWS_INST_DIR>/TWSDATA/installation/logs/
- E. User's home directory

Answer: D

Explanation:

twsinst logs are stored under the TWSDATA subdirectory (or customized data_dir) in installation/logs, with filenames including OS, user, and version for detailed troubleshooting of installation, upgrade, or uninstall issues.

NEW QUESTION # 790

During a fresh installation of HCL Workload Automation 10.2 on a fault-tolerant agent connected to an Oracle database, which connection parameters are mandatory in the localopts file for command-line operations? (Select All that Apply)

- A. username - the HCL Workload Automation user with access privileges
- B. protocol - always set to https for secure connections
- C. port - the Netman port for communication
- D. host - the hostname of the master domain manager
- E. password - the encrypted password of the HCL Workload Automation user

Answer: A,C,D

Explanation:

For command-line tools like conman or composer to connect to the master domain manager, the localopts file requires the hostname of the master domain manager, the Netman port number, and the username of an authorized HCL Workload Automation user. The password can be stored separately in a useropts file or prompted interactively; the protocol defaults to http/https based on configuration but is not mandatory in localopts.

NEW QUESTION # 791

HCL HWA 10.2 production monitoring script uses conman "systat *;output /tmp/status.txt". File grows 10GB daily. What conman command generates compact JSON monitoring output for parsing?

- A. conman "sc --output-format=json"
- B. conman "systat * -format json"
- C. conman "status json @"
- D. conman "sc -json > /tmp/status.json"

Answer: D

Explanation:

JSON format enables structured monitoring. conman sc -json produces compact workstation status with parseable fields:

{"workstation":"AGENT01","state":"ACTIVE","netman":"UP","jobqueue":"50/100"}. Logrotate manages 100MB daily files vs 10GB text.

NEW QUESTION # 792

The intercom link between mailman and batchman on master in HCL Workload Automation 10.2 uses which message files? (Select two)

- A. Serverbox.msg
- B. Batchmanbox.msg
- C. Intercom.msg
- D. Mailbox.msg
- E. Courier.msg

Answer: B,C

Explanation:

Batchmanbox.msg carries instructions from mailman to batchman. Intercom.msg carries responses and status from batchman back to mailman.

NEW QUESTION # 793

.....

In the Desktop HCL-HWA-ADM-102 practice exam software version of HCLSoftware HCL-HWA-ADM-102 practice test is updated and real. The software is useable on Windows-based computers and laptops.
