

# Die seit kurzem aktuellsten SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Prüfungsunterlagen, 100% Garantie für Ihen Erfolg in der SAP C\_BCBTP\_2502 Prüfungen!

P.S. Kostenlose 2026 SAP C\_BCBTP\_2502 Prüfungsfragen sind auf Google Drive freigegeben von ZertSoft verfügbar: [https://drive.google.com/open?id=1LHdsQz3GunNTMVKxda\\_-tspGyquchBQd](https://drive.google.com/open?id=1LHdsQz3GunNTMVKxda_-tspGyquchBQd)

Im ZertSoft können Sie Dumps zur SAP C\_BCBTP\_2502 Zertifizierungsprüfung herunterladen, so dass Sie unsere Produkte ohne Risiko kaufen können. Das ist die Version der Übungen. Und Sie können die Qualität der Produkte und den Wert vorm Kauf sehen. Wir sind selbstsicher, dass Sie mit unseren Produkten zur SAP C\_BCBTP\_2502 Zertifizierungsprüfung zufrieden sein würden. Um Ihre Interessen zu schützen, versprechen wir Ihnen, dass wir Ihnen eine Rückerstattung geben für den Durchfall in der Prüfung würden. Unser Ziel liegt nicht nur darin, Ihnen zu helfen, die SAP C\_BCBTP\_2502 Prüfung zu bestehen, sondern auch ein reales IT-Expert zu werden. So können Sie mehr Vorteile im Beruf haben, eine entsprechende technische Position finden und ganz einfach ein hohes Gehalt unter den IT-Angestellten erhalten.

## SAP C\_BCBTP\_2502 Prüfungsplan:

| Thema   | Einzelheiten   |
|---------|--|
| Thema 1 | <ul style="list-style-type: none"> <li>Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.</li> </ul>   |
| Thema 2 | <ul style="list-style-type: none"> <li>Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.</li> </ul> |

## C\_BCBTP\_2502 SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite neueste Studie Torrent & C\_BCBTP\_2502 tatsächliche prep Prüfung

Um die SAP C\_BCBTP\_2502 Zertifizierungsprüfung zu bestehen, brauchen Sie viel Zeit und Energie. Dabei müssen Sie auch

großes Risiko tragen. Wenn Sie ZertSoft wählen, können Sie mit wenigem Geld die SAP C\_BCBTP\_2502 Prüfung einmal bestehen. Ich meine, dass ZertSoft heutzutage die beste Wahl für Sie ist, wo die Zeit sehr geschätzt wird. Außerdem ist ZertSoft eine der vielen Websites, die Ihnen einen bestmöglichen Garant bietet. Wenn Sie ZertSoft wählen, kommt der Erfolg auf Sie zu.

## **SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C\_BCBTP\_2502 Prüfungsfragen mit Lösungen (Q22-Q27):**

### **22. Frage**

What is the primary function of SAP BTP's SAP Fiori tools?

- A. To develop backend APIs for database integration.
- B. To deploy third-party CRM solutions.
- **C. To build user-friendly applications with a consistent UI/UX experience.**
- D. To replace SAP S/4HANA transactional screens.

**Antwort: C**

Begründung:

User adoption is often the biggest hurdle in enterprise software deployment. The primary function of SAP Fiori tools on BTP is to solve this by enabling the creation of user-friendly applications with a consistent UI/UX experience. SAP Fiori is the design language for all modern SAP applications, moving away from complex, menu-heavy traditional screens toward a role-based, intuitive interface that works seamlessly across desktops, tablets, and smartphones.

On SAP BTP, Fiori tools (integrated within SAP Business Application Studio) provide templates and floorplans that help developers quickly build applications that look and behave exactly like standard SAP S

/4HANA apps. This consistency is vital for the SAP Business Suite because it reduces training time and minimizes user error. When an employee moves from an HR task in SuccessFactors to a finance task in S/4HANA, the interface remains familiar. By positioning Fiori as the "face" of the platform, SAP ensures that the complex technical capabilities of BTP—such as AI insights or real-time data—are delivered to the end-user in a simple, actionable, and modern way, ultimately increasing productivity and employee satisfaction.

### **23. Frage**

What is a key advantage of SAP BTP for enterprises?

- **A. It enables AI-driven process automation and decision-making.**
- B. It restricts integration to SAP-only applications.
- C. It eliminates on-premise deployments completely.
- D. It does not support low-code/no-code development.

**Antwort: A**

Begründung:

A key advantage of SAP BTP is its ability to transform a standard "system of record" into an "intelligent enterprise" by enabling AI-driven process automation and decision-making. In the legacy SAP Business Suite environment, processes were often manual and reactive. By positioning BTP as the innovative extension layer, enterprises can now embed artificial intelligence and machine learning directly into their business workflows. This allows for the automation of high-volume, repetitive tasks—such as matching bank statements or verifying supplier invoices—while also providing intelligent recommendations for complex scenarios like demand forecasting or talent management.

Furthermore, this advantage extends to decision-making. By leveraging the advanced analytics and data management capabilities of BTP, business leaders gain access to real-time insights that were previously hidden in data silos. This shift from gut-based to data-driven decision-making allows enterprises to respond more agilely to market fluctuations. SAP BTP serves as the unified platform where developers and business users alike can leverage pre-built AI services to enhance the core functions of SAP S/4HANA, SuccessFactors, and other LoB solutions, ensuring that the enterprise remains competitive in a rapidly evolving digital economy.

### **24. Frage**

Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- A. SAP Business Network

- B. SAP Ariba
- **C. SAP Workflow Management**
- D. SAP Conversational AI

**Antwort: C**

Begründung:

In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.

The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape.

By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

## 25. Frage

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Business Network
- **B. SAP AI Core**
- **C. SAP Business Process Intelligence**
- D. SAP Concur

**Antwort: B,C**

Begründung:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models-from training to deployment- at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

## 26. Frage

How does SAP Business AI enhance SAP BTP's capabilities?

- A. By eliminating machine learning capabilities.
- B. By replacing all existing business processes with AI-only solutions.
- **C. By enabling AI-driven automation and decision-making.**
- D. By restricting AI usage to SAP ERP modules.

**Antwort: C**

Begründung:

SAP Business AI is the strategic layer that infuses intelligence directly into the business applications running on SAP BTP. It enhances the platform's capabilities by enabling AI-driven automation and intelligent decision-making across the entire enterprise value chain. Unlike generic AI, SAP Business AI is trained on industry-specific data and business semantics, ensuring that the insights it provides are relevant to specific corporate functions like finance, supply chain, and HR.

By leveraging services within BTP-such as SAP AI Core and SAP AI Launchpad-Business AI allows organizations to move from
