NIS-2-Directive-Lead-Implementer Latest Exam Discount | NIS-2-Directive-Lead-Implementer Practice Test Engine

Constantly updated multiple mock exams with a great number of questions that will help you in better self-assessment. Memorize all your previous PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) exam questions attempts and display all the changes in your results at the end of each PECB NIS-2-Directive-Lead-Implementer Practice Exam attempt. Users will be able to customize the NIS-2-Directive-Lead-Implementer practice test software by time or question types. Supported on all Windows-based PCs.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.

Topic 2	<ul style="list-style-type: none"> • Cybersecurity controls, incident management, and crisis management: This domain focuses on Security Operations Managers and Incident Response Coordinators and involves implementing cybersecurity controls, managing incident response activities, and handling crisis situations. It ensures organizations are prepared to prevent, detect, respond to, and recover from cybersecurity incidents effectively.
Topic 3	<ul style="list-style-type: none"> • Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q21-Q26):

NEW QUESTION # 21

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms.

SecureTech reports on the initial stages of potential incidents and after the successful mitigation or resolution of the incidents. Is this in compliance with the NIS 2 Directive requirements? Refer to scenario 1.

- A. Yes, the Directive introduces a two-stage approach to incident reporting, requiring initial and final reports.
- B. No, the Directive requires that incidents are reported only after they have been resolved
- C. No, the Directive requires that incidents are reported only in their initial stages

Answer: A

NEW QUESTION # 22

According to Article 35 of the NIS 2 Directive, what must competent authorities do if they discover that an essential entity has violated regulations related to data protection?

- A. They must immediately impose an administrative fine
- B. They must promptly inform the relevant supervisory authorities
- C. They must first discuss with the essential entity to understand the reason behind the violation

Answer: B

NEW QUESTION # 23

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

According to scenario 2, MHospital is committed to issuing an official notification within four days of identifying an incident. Is this in compliance with the NIS 2 Directive requirements?

- A. No, the official notification should be issued within 72 hours of identifying the incident
- B. No, the official notification should be issued within 48 hours of identifying the incident
- **C. Yes, the official notification should be issued within 96 hours of identifying the incident**

Answer: C

NEW QUESTION # 24

Which of the following statements regarding critical entities is correct?

- A. Member States can exclusively rely on self-registration mechanisms for the identification and reporting of all critical entities, with no direct oversight from the competent authorities
- **B. Critical entities must provide one or more essential services and must have their critical infrastructure within the territory of the respective Member State**
- C. Critical entities are obligated to report only their names and relevant (sub)sectors to competent authorities

Answer: B

NEW QUESTION # 25

What does integration testing involve?

- A. Testing and analyzing the functionality of each individual module in isolation
- **B. Testing combination of modules as a group to analyze their interactions and functionality**
- C. Both A and B, depending on the objectives of the organization

Answer: B

NEW QUESTION # 26
