Our training materials have been honored as the panacea for the candidates for the exam since all of the contents in the Introduction-to-IT Guide materials are the essences of the exam. Consequently, with the help of our study materials, you can be confident that you will pass the exam and get the related certification easily. So what are you waiting for? Just take immediate actions!

WGU Introduction to IT Sample Questions (Q113-Q118):

NEW QUESTION # 113

Which type of services are Google Apps, Dropbox, and GoToMeeting?

- A. Infrastructure-as-a-Service (IaaS)
- B. Security-as-a-Service (SECaaS)
- C. Software-as-a-Service (SaaS)
- D. Platform-as-a-Service (PaaS)

Answer: C

Explanation:

Google Apps, Dropbox, and GoToMeeting are all examples of Software-as-a-Service (SaaS). SaaS is a software distribution model in which a third-party provider hosts applications and makes them available to customers over the internet. This contrasts with IaaS, which provides virtualized computing resources over the internet, and PaaS, which offers hardware and software tools over

the internet.

1. Google Apps (now Google Workspace) provides productivity and collaboration tools.

2. Dropbox offers cloud storage and file synchronization services.

3. GoToMeeting is an online meeting, desktop sharing, and video conferencing software.

All three services are accessed over the internet and do not require users to manage hardware or software updates, which is characteristic of the SaaS model.

References: The information is verified by multiple sources that discuss cloud service models, including articles that specifically categorize Google Workspace, Dropbox, and GoToMeeting as SaaS¹². Additionally, Google's support documentation for GoToMeeting integration with Google Workspace further supports this classification³.

NEW QUESTION # 114

What is one purpose of an End User License Agreement?

- A. Allow customers to legally distribute the application to other users
- B. Allow customers to legally create and sell a new version of the software
- C. Allow customers to legally modify and compile the source code
- **D. Allow customers to legally use the software**

Answer: D

Explanation:

1. Understanding EULAs: When a customer or business purchases software, they are essentially acquiring a license to use it, not ownership. The software vendor retains ownership, and the user must agree to the terms specified in the EULA before accessing the application.

2. Rights and Restrictions: The EULA outlines what the user can and cannot do with the software. It covers aspects such as installation, usage, copying, distribution, and any limitations.

3. Liability and Disclaimers: EULAs clarify liability, provide infringement information, and specify disclaimers. They protect both the vendor and the user by setting clear boundaries.

4. Termination: EULAs address how and when the right to use the application may be terminated.

5. Other Names for EULA: While "End User License Agreement" is the most common term, other names include "Licensed application end user agreement," "Software license agreement," and more.

6. Vendor Protection: EULAs shield software vendors against copyright infringement, misuse, and reverse engineering. They allow vendors to limit their own liability and protect their reputation.

NEW QUESTION # 115

A local nonprofit organization that promotes healthy living in low income communities is planning an outreach program for members of the community that have type 2 diabetes. The organization plans to partner with local hospitals and health centers in order to reach patients.

Which government regulation do the healthcare providers need to consider to ensure that they do not illegally provide patient information?

- A. Computer Matching and Privacy Protection Act of 1988
- B. Privacy Act of 1974
- **C. Health Insurance Portability and Accountability Act of 1996**
- D. Digital Signature and Electronic Authentication law of 1998

Answer: C

Explanation:

Healthcare providers need to consider the Health Insurance Portability and Accountability Act of 1996 (HIPAA) to ensure that they do not illegally provide patient information¹. HIPAA establishes national standards to protect individuals' medical records and other individually identifiable health information, including protected health information². It applies to health plans, health care clearinghouses, and health care providers that conduct certain health care transactions electronically². The Privacy Rule within

HIPAA sets a baseline of protection for health information and allows patients to choose whether their health information may be disclosed for specific purposes such as treatment, payment, and health care operations³. Therefore, healthcare providers partnering with local hospitals and health centers should adhere to HIPAA guidelines to safeguard patient privacy.

NEW QUESTION # 116

What is the correct order of project phases?

- A. 1) Planning
2) Initiation
3) Monitoring and Controlling
4) Executing
5) Closing
- B. 1) Executing
2) Monitoring and Controlling
3) Initiation
4) Planning
5) Closing
- C. 1) Initiation
2) Executing
3) Planning
4) Monitoring and Controlling
5) Closing
- **D. 1) Initiation
2) Planning
3) Executing
4) Monitoring and Controlling
5) Closing**

Answer: D

Explanation:

1. Initiation
2. Planning
3. Executing
4. Monitoring and Controlling
5. Closing

During the Initiation Phase, the project's vague brief is clarified, and key success criteria are defined. It involves project kickoff meetings, understanding project requirements, and defining scope, cost, and resources¹².
