

Realistic Real JN0-336 Question & Free PDF Quiz 2026

Juniper Security, Specialist (JNCIS-SEC) Valid Cram Materials

The screenshot shows a Juniper SRX console window titled 'Exhibit'. The user is at the '(primary:node0)' prompt and has entered the command 'show chassis cluster status'. The output displays the cluster ID as 3 and shows two redundancy groups. Redundancy group 0 has a failover count of 1, with node0 as the primary (priority 129) and node1 as the secondary (priority 128). Redundancy group 1 has a failover count of 3, with node0 as the primary (priority 0) and node1 as the secondary (priority 0). Both nodes have 'Preempt' and 'Manual failover' settings set to 'no'.

Node	Priority	Status	Preempt	Manual failover
Redundancy group: 0, Failover count: 1				
node0	129	primary	no	no
node1	128	secondary	no	no
Redundancy group: 1, Failover count: 3				
node0	0	primary	no	no
node1	0	secondary	no	no

P.S. Free 2026 Juniper JN0-336 dumps are available on Google Drive shared by itPass4sure: <https://drive.google.com/open?id=1h11TrFPJBx8rpiswn4j9NF3L2tsLCHRv>

Our JN0-336 vce dumps offer you the best exam preparation materials which are updated regularly to keep the latest exam requirement. The JN0-336 practice exam is designed and approved by our senior IT experts with their rich professional knowledge. Using JN0-336 Real Questions will not only help you clear exam with less time and money but also bring you a bright future. We are looking forward to your join.

Citing an old saying as "Opportunity always favors the ready minds". In the current era of rocketing development of the whole society, it's easy to be eliminated if people have just a single skill. Our JN0-336 learning materials will aim at helping every people fight for the JN0-336 certificate and help develop new skills. Our professionals have devoted themselves to compiling the JN0-336 exam questions for over ten years and you can trust us for sure.

JN0-336 Valid Cram Materials, JN0-336 Valid Test Sims

Our JN0-336 Exam Braindumps are the hard-won fruit of our experts with their unswerving efforts in designing products and choosing test questions. Pass rate is what we care for preparing for an examination, which is the final goal of our JN0-336 certification guide. According to the feedback of our users, we have the pass rate of 99%, which is equal to 100% in some sense. The high quality of our products also embodies in its short-time learning. You are only supposed to practice Security, Specialist (JNCIS-SEC) guide torrent for about 20 to 30 hours before you are fully equipped to take part in the examination.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q42-Q47):

NEW QUESTION # 42

You are asked to implement IPS on your SRX Series device.

In this scenario, which two tasks must be completed before a configuration will work? (Choose two.)

- A. Reboot the SRX Series device.
- B. Download the IPS signature database.
- C. Install the IPS signature database.
- D. Enroll the SRX Series device with Juniper ATP Cloud.

Answer: B,C

Explanation:

The two tasks that must be completed before a configuration for IPS on an SRX Series device will work are downloading the IPS signature database and installing the IPS signature database. The Security, Specialist (JNCIS-SEC) Study guide provides further information on how to download and install the IPS signature database. Enrolling the SRX Series device with Juniper ATP Cloud is not necessary to make a configuration work, and rebooting the SRX Series device is not required either.

NEW QUESTION # 43

Your network uses a single JSA host and you want to implement a cluster.

In this scenario, which two statements are correct? (Choose two.)

- A. The software versions on both primary and secondary hosts
- B. The primary and secondary hosts must be configured with the same storage devices.
- C. The secondary host can backup multiple JSA primary hosts.
- D. The cluster virtual IP will need an unused IP address assigned.

Answer: A,D

Explanation:

According to the Juniper Networks JNCIP-SEC Study Guide, when setting up a cluster with a single JSA host, both the primary and secondary hosts must have the same software version installed. Additionally, an unused IP address must be assigned to the cluster virtual IP. The primary and secondary hosts do not need to be configured with the same storage devices, and the secondary host cannot be used to backup multiple JSA primary hosts.

NEW QUESTION # 44

Exhibit

You are trying to create a security policy on your SRX Series device that permits HTTP traffic from your private 172.25.11.0/24 subnet to the Internet. You create a policy named permit-http between the trust and untrust zones that permits HTTP traffic. When you issue a commit command to apply the configuration changes, the commit fails with the error shown in the exhibit.

Which two actions would correct the error? (Choose two.)

- A. Execute the Junos commit full command to override the error and apply the configuration.
- B. Modify the security policy to use the built-in Junos-http applications.
- C. Issue the rollback 1 command from the top of the configuration hierarchy and attempt the commit again.
- D. Create a custom application named http at the [edit applications] hierarchy.

Answer: B,D

Explanation:

The error message indicates that the Junos-http application is not defined, so you need to either create a custom application or modify the security policy to use the built-in Junos-http application. Doing either of these will allow you to successfully commit the configuration.

NEW QUESTION # 45

What are three capabilities of AppQoS? (Choose three.)

- A. re-write DSCP values
- B. reserve bandwidth
- C. rate-limit traffic
- D. re-write the TTL
- E. assign a forwarding class

Answer: A,C,E

Explanation:

AppQoS can modify the DSCP (Differentiated Services Code Point) values in IP packet headers. This is crucial for defining the level of service for each packet, influencing how network devices prioritize traffic.

It can assign traffic to specific forwarding classes. This feature allows network administrators to group different types of traffic (e.g., VoIP, streaming, bulk data) into categories that are treated differently based on predefined network policies, ensuring that critical applications receive the necessary bandwidth and priority.

AppQoS is capable of rate-limiting traffic, which involves setting a maximum bandwidth limit for certain types of traffic. This ensures that no single application or service consumes more bandwidth than allocated, thus preventing network congestion and ensuring fair bandwidth distribution among all applications.

These features are essential for managing network performance and ensuring that critical applications receive the necessary resources to function effectively. AppQoS does not inherently include capabilities to re-write TTL (Time To Live) values or reserve bandwidth as primary functions, but it manages bandwidth usage through rate limiting and priority settings.

NEW QUESTION # 46

A client has attempted communication with a known command-and-control server and it has reached the configured threat level threshold.

Which feed will the client's IP address be automatically added to in this situation?

- A. the command-and-control cloud feed
- B. the custom cloud feed
- C. the allowlist and blocklist feed
- **D. the infected host cloud feed**

Answer: D

Explanation:

Infected hosts are internal hosts that have been compromised by malware and are communicating with external C&C servers³.

Juniper ATP Cloud provides infected host feeds that list internal IP addresses or subnets of infected hosts along with a threat level³. Once the Juniper ATP Cloud global threshold for an infected host is met, that host is added to the infected host feed and assigned a threat level of 10 by the cloud⁴. You can also configure your SRX Series device to block traffic from these IP addresses using security policies⁴.

NEW QUESTION # 47

.....

Our JN0-336 questions answers study guide is the best option for you to pass exam easily. Our experts are busy in providing the most updated content that could ensure your 100% success in JN0-336 actual test. The up-to-date Juniper exam dumps consist of latest practice questions answers and explanations. We are devoted to take appropriate steps in improving our products like JN0-336 Pass Guide.
