Learning Material In 3 Different Formats for Oracle 1Z0-1163-1 Exam Success
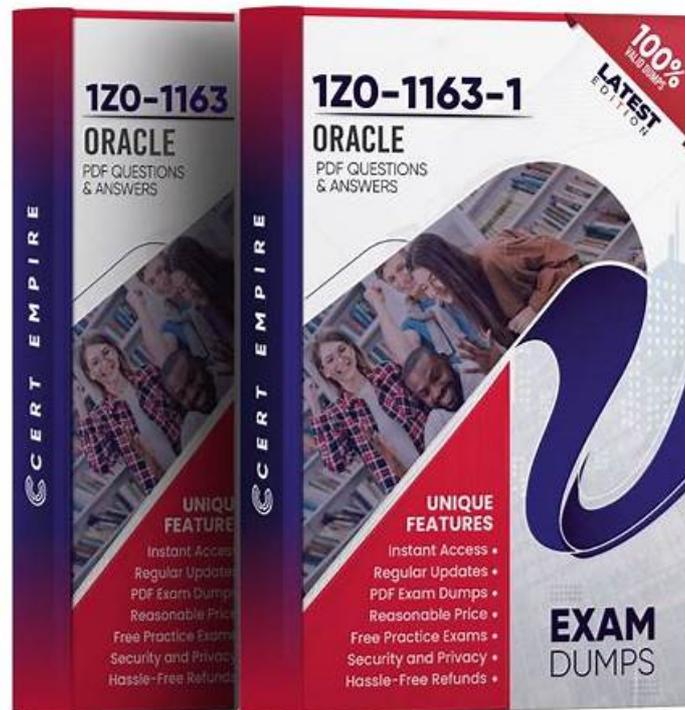

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our 1Z0-1163-1 learning questions in this website. Second, we can assure you that you will get the latest version of our 1Z0-1163-1 training materials for free from our company in the whole year after payment on 1Z0-1163-1 practice materials. Last but not least, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week on our 1Z0-1163-1 exam questions.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 2	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 3	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.

Topic 4	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.

1Z0-1163-1 Hot Questions, 1Z0-1163-1 New Study Guide

In order to help you save more time, we will transfer 1Z0-1163-1 test guide to you within 10 minutes online after your payment and guarantee that you can study these materials as soon as possible to avoid time waste. We believe that time is the most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Moreover if you have a taste ahead of schedule, you can consider whether our 1Z0-1163-1 Exam Torrent is suitable to you or not, thus making the best choice. What's more, if you become our regular customers, you can enjoy more membership discount and preferential services.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q15-Q20):

NEW QUESTION # 15
What is the primary purpose of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It only manages warehouse operations without linking to procurement or manufacturing.
- B. It automates the execution of supply chain tasks across different applications.
- C. It eliminates the need for supplier collaboration.
- D. It provides a manual approach to tracking supply chain transactions.

Answer: B

Explanation:
The Supply Chain Orchestration process (C) in Oracle Fusion Cloud SCM automates the execution of supply chain tasks across applications like procurement, manufacturing, and inventory management. It coordinates activities-e.g., triggering a PO when inventory is low or scheduling production after an order-ensuring seamless integration. Option A is false-supplier collaboration is often required. Option B is incorrect-it links all supply chain areas, not just warehouses. Option D is wrong-automation replaces manual tracking. For example, if a customer order requires 200 units, Orchestration aligns procurement and production automatically, reducing delays and errors, and enhancing end-to-end visibility.

NEW QUESTION # 16
What is the primary purpose of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It automates the production process without human supervision.
- B. It enhances customer relationship management.
- C. It provides accurate cost calculations for better decision-making.
- D. It ensures immediate financial benefits through real-time cost updates.

Answer: C

Explanation:
The Production Order to Cost Update OMBP (D) in Oracle Fusion Cloud SCM focuses on providing accurate cost calculations by capturing and updating costs associated with production orders-materials, labor, and overhead-enabling better decision-making. For instance, if producing 100 units costs $1,000 (e.g., $500 materials, $300 labor, $200 overhead), this process ensures the total is reflected accurately, allowing managers to adjust pricing or reduce costs. Option A is misleading-while cost updates occur, the primary purpose is accuracy, not immediate financial gains, which are an outcome. Option B is incorrect-customer relationship management is unrelated to production costing. Option C overstates automation; human oversight is still required, and the focus is on cost, not process automation. Accurate cost data supports profitability analysis, budgeting, and strategic planning, making it a critical link between manufacturing and financial management.

NEW QUESTION # 17
What is the primary function of Cost Rollup in Oracle Fusion Cloud SCM?

- A. It calculates the total cost of a product by aggregating material, labor, and overhead expenses.
- B. It ensures material costs remain unchanged over time.
- C. It tracks only direct labor expenses, excluding materials.
- D. It eliminates the need for cost accounting.

Answer: A

Explanation:
Cost Rollup (C) in Oracle Fusion Cloud SCM calculates the total cost of a product by aggregating material, labor, and overhead expenses across production stages. For instance, a widget might cost $10 total-$5 materials, $3 labor, $2 overhead-rolled up from raw inputs to finished goods. Option A is false-Cost Rollup enhances, not eliminates, cost accounting by providing detailed data. Option B is incorrect-it includes all cost components, not just labor. Option D is wrong-costs fluctuate with market conditions; Rollup reflects current values. This function ensures accurate pricing, profitability analysis, and cost control, critical for financial decision-making and competitive strategy.

NEW QUESTION # 18
Which feature in Oracle Fusion Cloud SCM tracks and analyzes manufacturing costs?

- A. Manufacturing Execution.
- B. Cost Accounting.
- C. Supplier Qualification.
- D. Inventory Management.

Answer: B

Explanation:
Cost Accounting (D) in Oracle Fusion Cloud SCM tracks and analyzes manufacturing costs, including materials, labor, and overhead, to support financial reporting and decision-making. For example, it might break down a $10,000 production run into $6,000 materials, $3,000 labor, and $1,000 overhead, revealing cost drivers. Option A (Manufacturing Execution) tracks production activities but doesn't analyze costs. Option B (Supplier Qualification) assesses suppliers, not manufacturing expenses. Option C (Inventory Management) monitors stock, not cost details. Cost Accounting provides granular insights, enabling cost reduction strategies and accurate profitability analysis, essential for financial health.

NEW QUESTION # 19
What is the role of the Global Order Promising feature in Oracle Fusion Cloud SCM?

- A. It guarantees same-day delivery for all orders.
- B. It eliminates the need for supplier collaboration.
- C. It provides real-time order commitment dates based on supply and demand constraints.
- D. It focuses only on local inventory availability.

Answer: C

Explanation:
Global Order Promising (C) provides real-time order commitment dates by analyzing supply (e.g., inventory, production) and demand (e.g., orders, forecasts) constraints enterprise-wide. For instance, if 100 units are requested and 70 are available with a 3-day lead time, it commits to 3 days. Option A is false-no universal same-day guarantee exists. Option B is incorrect-supplier data often informs promises. Option D is wrong-it considers global, not just local, availability. This feature ensures reliable promises, reduces cancellations, and aligns customer expectations with operational capacity.

NEW QUESTION # 20
......

It's better to hand-lit own light than look up to someone else's glory. Prep4away Oracle 1Z0-1163-1 exam training materials will be the first step of your achievements. With it, you will be pass the Oracle 1Z0-1163-1 Exam Certification which is considered difficult by a lot of people. With this certification, you can light up your heart light in your life. Start your new journey, and have a successful life.
