Adobe Experience Manager Architect Master Sample Questions (Q50-Q55):

NEW QUESTION # 50

A large retail customer is building their ecommerce platform on AEM. Several third-party vendors sell products through their site. Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.

Which approach should the Architect recommend?

- A. Give third-party vendors access to the Author Server
- **B. Add a Publish (preview) Server and provide access**
- C. Use the Preview Capabilities of AEM Author Server
- D. Export content as PDF and share with the vendors

Answer: B

Explanation:

According to Adobe Experience Manager documentation¹, a publish (preview) server is a publish instance that is used for previewing content before it goes live on the production server. This can be useful for verifying content with third-party vendors or other stakeholders who need restricted access.

NEW QUESTION # 51

A client is in the discovery process for building a React native app, which is a single codebase that runs natively on iOS and Android. The goal is to reduce development costs. The client wants to reduce content creation costs in the new react Native app by reusing as much of the marketing content already publish in their AEM instance.

What should the Architect recommend to meet this requirement?

- A. Sling Resource Resolution
- **B. Experience Fragments**
- C. Content Fragments
- D. OSGi Bundles

Answer: B

Explanation:

"Experience Fragments are reusable pieces of content that can be delivered to any channel, including React native apps. They allow for reusing marketing content already published in AEM".

NEW QUESTION # 52

A customer wants to implement an AEM solution to serve localized content to several regional websites. Which AEM capability should the Architect recommend?

- A. Use i18N API and Multi Site Manager
- **B. Use translation connector and Multi Site Manager**
- C. Use translation connector and i18N API
- D. Use translation connector and translation workflows

Answer: B

Explanation:

According to Adobe Experience Manager documentation, translation connectors are used to integrate AEM with third-party translation services to orchestrate the translation of AEM content. Multi Site Manager (MSM) is used to create and manage multiple websites that share common content and structure.
