有難いSAP E_S4CPE_2405 | 真実的なE_S4CPE_2405模擬試験問題集試験 | 試験の準備方法SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition日本語復習赤本

他人の気付いていないときに、だんだんSAPのE_S4CPE_2405試験成功したいのですか？我が社はIT資格認証試験資料の販売者として、いつまでもできご客様に相応しく信頼できるE_S4CPE_2405問題集を提供できます。あなたのすべての需要を満たすためには、一緒に努力します。躊躇われずに我々の模試験を利用してみてください。全力を尽くせば、E_S4CPE_2405試験の合格も可能となります。

SAP E_S4CPE_2405 認定試験の出題範囲：

トピック	出題範囲
トピック 1	Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.

トピック 2	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.
トピック 3	Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition 認定 E_S4CPE_2405 試験問題 (Q45-Q50):

質問 # 45

Which activity in situation handling is exclusively available for the extended framework?

- A. Navigate from notification to the app where the situation occurred to get more info and resolve
- B. SAP Fiori application extensions
- C. Develop custom situation handling templates
- D. Collect situation data to prepare the automated response
- E. Adapt predelivered situation handling templates to business requirements

正解: C

解説:

Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:

Option A: Adapt predelivered situation handling templates to business requirements This option is incorrect. Adapting predelivered templates is available in both the standard and extended frameworks.

Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.

Option C: Develop custom situation handling templates

This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.

Option D: Collect situation data to prepare the automated response

This option is incorrect. Data collection for automated responses is part of the standard framework.

In summary, the ability to develop custom situation handling templates is an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.

質問 # 46

Which of the following systems is provided to you only via the SUM tool in a system conversion?

- A. SAP Signavio Process Manager
- B. SAP Signavio Process Collaboration Hub
- C. SAP Business Technology Platform
- D. SAP S/4HANA Cloud Private Edition

正解: D

質問 # 47

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Explore

- B. Realize
- C. Deploy
- D. Prepare

正解: B

解説:

In the SAP Activate methodology, the Realize phase is where consultants configure business processes based on the information gathered during the Fit-to-Standard workshops. This phase involves setting up the system according to the agreed-upon requirements and preparing it for testing and deployment.

Option A: Deploy

This option is incorrect. The Deploy phase focuses on moving the configured and tested solution into the production environment and preparing for go-live.

Option B: Explore

This option is incorrect. The Explore phase includes conducting Fit-to-Standard workshops to identify how standard processes fit with the customer's requirements. However, detailed configuration is not performed in this phase.

Option C: Prepare

This option is incorrect. The Prepare phase involves initial planning and preparation activities but does not include configuring business processes.

Option D: Realize

This option is correct. During the Realize phase, consultants configure the system based on the outcomes of the Fit-to-Standard workshops, ensuring that the solution aligns with the customer's business processes and requirements.

In summary, the Realize phase of the SAP Activate methodology is dedicated to configuring business processes as per the insights and decisions made during the Fit-to-Standard workshops, setting the foundation for subsequent testing and deployment activities.

質問 # 48

You are designing side-by-side extensions in the customer's SAP BTP system. Which extensions can you use?

Note: There are 2 correct answers to this question.

- A. Low/no-code extensions made with SAP Build
- B. Classical code-based extensions with SAP Business Application Studio
- C. In-app/on-stack extensions in SAP S/4HANA Cloud Private Edition
- D. Tier-3 developer extensions in the ABAP environment

正解: A、D

解説:

When designing side-by-side extensions in a customer's SAP BTP system, the following extension types are applicable:

Option A: Tier-3 developer extensions in the ABAP environment

This option is correct. Developers can create advanced extensions using the ABAP environment on SAP BTP, operating independently of the core system.

Option B: Classical code-based extensions with SAP Business Application Studio This option is incorrect. While SAP Business Application Studio facilitates development, classical code-based extensions typically involve in-app modifications rather than side-by-side extensions.

Option C: In-app/on-stack extensions in SAP S/4HANA Cloud Private Edition This option is incorrect. In-app extensions are made within the core system, not as side-by-side extensions on SAP BTP.

Option D: Low/no-code extensions made with SAP Build

This option is correct. SAP Build enables the creation of low/no-code applications on SAP BTP, functioning as side-by-side extensions.

In summary, Tier-3 developer extensions in the ABAP environment and low/no-code extensions made with SAP Build are suitable for side-by-side extensibility on SAP BTP, allowing for flexible and scalable custom solutions.

質問 # 49

Where can an implementation consultant find configuration information for each level in the configuration hierarchy?

- A. In the SAP Fiori apps reference library
- B. In the SAP GUI
- C. In the SAP Help Portal
- D. In the SAP Signavio Process Manager
