

# VMware 6V0-21.25 Latest Test Simulations | Sample 6V0-21.25 Questions Answers

What's more, part of that Pass4sures 6V0-21.25 dumps now are free: <https://drive.google.com/open?id=1ZDbPij4eJDCmugbN462SFx2nvptC06Vl>

It can be said that all the content of the 6V0-21.25 prepare questions are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn our 6V0-21.25 exam questions. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the 6V0-21.25 Practice Guide provide questions and answers, you can simply pass the 6V0-21.25 exam.

## VMware 6V0-21.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Shared Services Platform (SSP): Covers the back-end security data and analytics platform that underpins vDefend security services.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>IDPS (Intrusion Detection and Prevention System): Covers inspecting network traffic at every hypervisor and workload level to detect and prevent advanced cyber threats.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Lateral Protection with vDefend Distributed Firewall: Covers implementing policy-based rules to control east-west traffic and prevent lateral threat movement across the private cloud.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>VMware vDefend Firewall Architecture: Covers the design and components of VMware's software-defined, distributed security architecture.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Security Operations: Covers the ongoing management and operational practices for maintaining security in a private cloud environment.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Role-Based Access Control: Covers creating roles and groups within the security operations team to grant appropriate portal access.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>Gateway Firewall: Covers edge security devices that control and filter north-south network traffic, blocking unauthorized access at the network perimeter.</li></ul>
Topic 8	<ul style="list-style-type: none"><li>Private Cloud Data Center Security: Covers foundational concepts for securing workloads and infrastructure within a private cloud data center environment.</li></ul>
Topic 9	<ul style="list-style-type: none"><li>NTA (Network Traffic Analysis) &amp; NDR (Network Detection and Response): Covers proactive threat detection and response using NTA and NDR capabilities to secure virtualized workloads and environments.</li></ul>

## 100% Pass 6V0-21.25 - VMware vDefend Security for VCF 5.x Administrator –Reliable Latest Test Simulations

The VMware 6V0-21.25 desktop practice exam software simulates a real test environment and familiarizes you with the actual test format. This VMware 6V0-21.25 practice exam software tracks your progress and performance, allowing you to see how much you've improved over time. We frequently update the VMware 6V0-21.25 Practice Exam software with the latest VMware 6V0-21.25 DUMPS PDF.

### VMware vDefend Security for VCF 5.x Administrator Sample Questions (Q76-Q81):

#### NEW QUESTION # 76

Which of the following does the Applied To field impact?

- A. ESX host rule count
- B. System wide rule count
- C. NSX Manager rule count
- D. Per VM vNIC rule count

**Answer: D**

Explanation:

In the VMware vDefend Distributed Firewall (DFW), the "Applied To" field is a critical optimization feature. By default, DFW rules are applied to all workloads (Applied To: DFW). However, when you specify specific groups in the "Applied To" field, the rule is only pushed down to the specific vNICs of the virtual machines residing in those groups. This drastically reduces the size of the rule table maintained in memory on the ESXi host for each specific vNIC (the per VM vNIC rule count), improving hypervisor performance and ensuring that workloads only process rules relevant to their network traffic.

#### NEW QUESTION # 77

Which component allows administrators to view intrusion detection alerts and threat severity in NSX?

Response:

- A. NSX Edge CLI
- B. vRealize Network Insight
- C. NSX Security Overview Dashboard
- D. vSphere Host Web Client

**Answer: C**

#### NEW QUESTION # 78

What role is required to start and stop vDefend Intelligence data collection?

Response:

- A. Auditor
- B. Enterprise Administrator
- C. Cloud Administrator
- D. Security Administrator

**Answer: B**

#### NEW QUESTION # 79

In the context of Role-Based access control which of the following is NOT a built-in vDefend Role?

- A. Auditor
- B. Network Admin
- C. Security Admin
- **D. Privileged Admin**

**Answer: D**

Explanation:

VMware vDefend includes several pre-configured, built-in roles to enforce the principle of least privilege and separation of duties. Valid out-of-the-box built-in roles include Enterprise Admin, Network Admin, Security Admin, and Auditor. "Privileged Admin" is a fabricated term in this context and is NOT a standard, built-in role within the vDefend RBAC architecture.

### NEW QUESTION # 80

Which two actions can a Gateway Firewall rule perform when evaluating network traffic?

(Choose two)

Response:

- **A. Allow or deny traffic based on source/destination criteria**
- B. Redirect traffic to a Distributed Firewall
- **C. Log the traffic flow for auditing purposes**
- D. Modify subnet masks dynamically
- E. Encrypt the payload before delivery

**Answer: A,C**

### NEW QUESTION # 81

.....

We have three versions packages of the 6V0-21.25 exam questions to help you comprehensively. Also, all contents are carefully prepared by our researchers. So you needn't to read and memorize the boring reference books of the 6V0-21.25 Exam. Most people have successfully passed the exam under the assistance of our study materials. So try to trust us. Our 6V0-21.25 study materials will help you generate a wonderful life.
