

最新的Juniper JN0-253認證題庫是行業領先材料&權威的JN0-253: Mist AI, Associate (JNCIA-MistAI)

P.S. KaoGuTi在Google Drive上分享了免費的、最新的JN0-253考試題庫：https://drive.google.com/open?id=180IDZcZ7vWHy7ZG5iv56vjf0_7L6jRzO

最近，身邊考 Juniper 認證的人也是相當多的，那麼，怎麼去準備 JN0-253 考試呢？建議大家，可以先到考試中心去打聽這科考試的有關的情況。了解考試的流程，考試的注意事項。預約一個合適的時間去報名參加考試即可。為了更有把握的通過考試，可以看看KaoGuTi考題網的 JN0-253 題庫，上面的題目都是真題，很准，我做了很多遍的練習。練習題有些部分超出了 Juniper 的要求，但是對於扎實的掌握知識是很有幫助的，建議做完，搞懂。這是你輕鬆通過考試的最好的方法。

如果你正準備參加 JN0-253 的考試，又苦於沒有精準的題庫或學習資料，KaoGuTi 絕對保證你第一次參加考試就可以順利通過。我們 JN0-253 認證考試的考題按照相同的教學大綱，其次是實際的 Juniper 的 JN0-253 認證考試，另外也是不斷的升級我們的培訓資料，你得到的所有產品高達1年的免費更新，你也可以隨時延長更新訂閱時間，你將得到更多的時間來充分準備考試。

JN0-253認證，JN0-253考古題介紹

我們的Juniper JN0-253 認證考試的最新培訓資料是KaoGuTi的專業團隊不斷地研究出來的，可以幫很多人成就夢想。在現在的競爭激烈的IT行業中，想要穩固自己的地位，就得向專業人士證明自己的知識和技術水準。Juniper JN0-253 認證考試是一個很好的證明自己能力的考試。有了Juniper JN0-253認證證書，你工作會有很大的變化，工資和工作職位都會有所提升。

Juniper JN0-253 考試大綱：

主題	簡介
主題 1	Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
主題 2	Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
主題 3	Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.

最新的 JNCIA-MistAI JN0-253 免費考試真題 (Q91-Q96):

問題 #91

In the Mist UI, what are two Marvis Actions for the AP category? (Choose two.)

- A. High CPU
- B. MTU Mismatch
- C. Health Check Failed
- D. Coverage Hole

答案: C,D

解題說明:

Coverage Hole: Marvis Actions can identify coverage holes where the wireless signal is weak or absent, indicating potential areas that need additional access points or adjustments.

Health Check Failed: This action indicates that the health check, which monitors the performance and connectivity of an access point, has failed, suggesting issues that need to be addressed.

問題 #92

Which three categories of alert types are available in Juniper Mist? (Choose three.)

- A. Infrastructure
- B. Marvis
- C. Site
- D. Security
- E. Users

答案: A,B,D

解題說明:

Alerts represent network and device issues that are ongoing. Juniper Mist™ categorizes them as follows:

* Infrastructure Alerts-Repeated events involving servers and protocols that can potentially affect a large number of clients. For example, an event during which a Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), or RADIUS server is unreachable can affect many clients.

Similarly, if a power supply on a switch is in alarm state, a large number of clients and a large amount of traffic could be affected.

* Marvis Alerts-Repeated events that Marvis tracks on the Marvis Actions dashboard. For example, if an access point (AP) regularly fails health checks, you'll see a Marvis alert for it.

* Security Alerts-Repeated events that could dramatically affect network security. For example, these alerts appear if a rogue AP is detected and clients start connecting to it.

* Certificate Alerts-Notification for expired, and soon-to-expire, user-added digital certificates. These include RadSec (configured at Organization > Settings > RadSec Certificates and AP RadSec certificate), SSO (configured at Organization > Settings > Single Sign-On), and PSK Portal IDP certificates (configured at Organization > Client Onboarding). Certificate alerts appear on the Alerts page and begin 30 days before the certificate's expiry date, then the notification repeats 15, 7, 3, and 1 day before expiration unless the certificate is renewed. .

問題 #93

Which statement is correct about the Super User account role?

- A. The Super User role has limited read/write capabilities.
- B. You must use the Super User role to add administrators to an organization.
- C. You must use the Super User role to claim an organization's new AP.
- D. The Super User role is restricted to the specific sites that are defined when creating the user account.

答案: B

解題說明:

In the Juniper Mist Cloud platform, user roles define the scope of permissions that determine what administrative functions an individual can perform within an organization. The Super User role represents the highest level of administrative authority within a Juniper Mist organization and carries full control over both organization-wide and site-specific configurations.

According to the Juniper Mist Cloud Administration and User Management documentation, the Super User role is described as:

"The Super User role provides full read and write access across the entire organization. Only Super Users can manage organization-level settings, add or remove other administrators, and assign privileges to users." This means that only a Super User can add new administrators, manage subscription entitlements, configure organization-level policies, and perform full lifecycle device management. Unlike site administrators, Super Users are not restricted to specific locations—they have unrestricted visibility and control across all sites within the organization.

Therefore, the correct answer is D, since the Super User role is explicitly required to add administrators to an organization and perform top-level management operations.

問題 #94

Which statement is true about Radio Resource Management (RRM)?

- A. The RRM global optimization system automatically runs once a day.
- B. The RRM event-driven system automatically runs once a day.
- C. The RRM global optimization system automatically runs every hour.
- D. The RRM event-driven system automatically runs every hour.

答案： A

解題說明：

Radio Resource Management (RRM) is a key feature of Juniper Mist Wireless Assurance that uses AI-driven automation to dynamically adjust radio settings across access points (APs) for optimal wireless performance. The RRM engine ensures proper channel assignment, transmit power control, and interference management across the network.

According to the Juniper Mist Wireless Assurance and AI-Driven RRM Guide, RRM operates in two modes:

* Event-Driven RRM: This mode reacts immediately to real-time changes in the RF environment, such as new access points, interference spikes, or client density changes.

* Global Optimization RRM: This process runs as scheduled, system-wide optimization once per day to evaluate the overall RF environment and redistribute channels and power settings network-wide for the best balance of coverage and capacity.

The documentation states:

"The RRM global optimization algorithm automatically executes once daily to ensure optimal channel and power planning across all APs." Thus, the correct answer is D - The RRM global optimization system automatically runs once a day.

問題 #95

Which protocol does Mist cloud use to send and receive data to connected access points?

- A. PPTP
- B. MQTT
- C. HTTPS
- D. SSH

答案： C

解題說明：

Mist Cloud Communication Protocol: The Mist cloud platform uses HTTPS (Hypertext Transfer Protocol Secure) to communicate with connected access points. This ensures that the data sent and received is encrypted and secure, adhering to modern security standards (Juniper Networks).

Security and Reliability: Using HTTPS provides a secure channel over which configuration changes, updates, and monitoring data can be safely transmitted between the Mist cloud and the access points. This protocol is widely accepted and trusted for secure communications over the internet.
