Pass Guaranteed Cisco - 300-410 Pass-Sure Reliable Exam Review

300-410 Learning Materials will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. 300-410 learning materials will be your best learning partner and will accompany you through every day of the review. It will help you to deal with all the difficulties you have encountered in the learning process and make you walk more easily and happily on the road of studying.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q413-Q418):

NEW QUESTION # 413

Refer to the exhibit.

A network administrator is trying to switch to the privileged EXEC level on R1 but failed. Which configuration resolves the issue?

- A. tacacs-server enable-password Cisco@123
- **B. enable-password Cisco@123**
- C. Enable password Cisco@123
- D. tacass server enable-password Cisco@123

Answer: B

NEW QUESTION # 414

Refer to the exhibit.

The administrator successfully logs into R1 but cannot access privileged mode commands. What should be configured to resolve the issue?

- **A. enable secret or enable password commands to enter into privileged mode**
- B. aaa authorization reverse-access
- C. matching password on vty lines as cisco123!
- D. secret cisco123! at the end of the username command instead of password cisco123!

Answer: A

NEW QUESTION # 415

Refer to the exhibit. After reloading the router an administrator discovered that the interface utilization graphs displayed inconsistencies with their previous history in the NMS. Which action prevents this issue from occurring after another router reload in the future?

- **A. Configure SNMP interface index persistence on the router**
- B. Configure SNMP to use static OIDs referring to individual router interfaces
- C. Rediscover all the router interfaces through SNMP after the router is reloaded
- D. Save the router configuration to startup-config before reloading the router

Answer: A

NEW QUESTION # 416

Drag and drop the descriptions from the left onto the IPv6 first hop security features on the right. Not all options are used.

Answer:

Explanation:

Explanation:

NEW QUESTION # 417

Refer to the exhibit.

An engineer is trying to generate a summary route in OSPF for network 10.0.0.0/8, but the summary route does not show up in the routing table. Why is the summary route missing?

- A. The summary-address command is used only for summarizing prefixes between areas.
- B. The summary route is visible only in the OSPF database, not in the routing table.
- **C. There is no route for a subnet inside 10.0.0.0/8, so the summary route is not generated.**
- D. The summary route is not visible on this router, but it is visible on other OSPF routers in the same area.

Answer: C

Explanation:

Explanation

The summary-address is only used to create aggregate addresses for OSPF at an autonomous system boundary.

It means this command should only be used on the ASBR when you are trying to summarize externally redistributed routes from another protocol domain or you have a NSSA area. But a requirement to create a summarized route is:

The ASBR compares the summary route's range of addresses with all routes redistributed into OSPF on that ASBR to find any subordinate subnets (subnets that sit inside the summary route range). If at least one subordinate subnet exists, the ASBR advertises the summary route.

NEW QUESTION # 418

.....

After you practice our 300-410 study materials, you can master the examination point from the 300-410 exam torrent. Then, you will have enough confidence to pass your 300-410 exam. We can succeed so long as we make efforts for one thing. As for the safe environment and effective product, why don't you have a try for our 300-410 Test Question, never let you down! Before your purchase, there is a free demo of our 300-410 training material for you. You can know the quality of our 300-410 guide question earlier before your purchase.
