We also welcome the suggestions from our customers, as long as our clients propose rationally.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q177-Q182):

NEW QUESTION # 177

What are some benefits of using Sentinel with Terraform Cloud/Terraform Cloud? Choose three correct answers.

- A. Sentinel Policies can be written in HashiCorp Configuration Language (HCL)
- B. You can enforce a list of approved AWS AMIs
- C. Policy-as-code can enforce security best practices
- D. You can restrict specific resource configurations, such as disallowing the use of CIDR=0.0.0.0/0.
- E. You can check out and check in cloud access keys

Answer: B,C,D

Explanation:

These are some of the benefits of using Sentinel with Terraform Cloud/Terraform Enterprise, as they allow you to implement logic-based policies that can access and evaluate the Terraform plan, state, and configuration. The other options are not true, as Sentinel does not manage cloud access keys, and Sentinel policies are written in Sentinel language, not HCL.

NEW QUESTION # 178

You have used Terraform to create an ephemeral development environment in the cloud and are now ready to destroy all the Infrastructure described by your Terraform configuration. To be safe, you would like to first see all the infrastructure that Terraform will delete.

Which command should you use to show all of the resources that will be deleted? Choose two correct answers.

- A. Run `terraform show :destroy`
- B. Run `terraform plan .destroy`
- C. Run `terraform destroy` and it will first output all the resource that will be deleted before prompting for approval
- D. Run `terraform state rm '`

Answer: B,C

Explanation:

To see all the resources that Terraform will delete, you can use either of these two commands:

terraform destroy will show the plan of destruction and ask for your confirmation before proceeding. You can cancel the command if you do not want to destroy the resources.

terraform plan -destroy will show the plan of destruction without asking for confirmation. You can use this command to review the changes before running terraform destroy.

NEW QUESTION # 179

Terraform providers are always installed from the Internet.

- A. True
- B. False

Answer: B

Explanation:

Terraform providers are not always installed from the Internet. There are other ways to install provider plugins, such as from a local mirror or cache, from a local filesystem directory, or from a network filesystem.

These methods can be useful for offline or air-gapped environments, or for customizing the installation process. You can configure the provider installation methods using the provider_installation block in the CLI configuration file.

NEW QUESTION # 180

How would you reference the volume IDs associated with the ebs_block_device blocks in this configuration?

- A. aws_instance.example.ebs_block_device.[*].volume_id
- B. aws_instance.example-ebs_block_device.*.volume_id
- C. aws_instance.example.ebs_block_device.volume_ids
- D. aws_instance.example.ebs_block_device[sda2,sda3].volume_id

Answer: B

Explanation:

This is the correct way to reference the volume IDs associated with the ebs_block_device blocks in this configuration, using the splat expression syntax. The other options are either invalid or incomplete.

NEW QUESTION # 181

Which of the following is not a valid Terraform collection type?

- A. set
- B. List
- C. Tree
- D. Map

Answer: C

Explanation:

This is not a valid Terraform collection type, as Terraform only supports three collection types: list, map, and set. A tree is a data structure that consists of nodes with parent-child relationships, which is not supported by Terraform.

NEW QUESTION # 182

.....

The online version of Terraform-Associate-003 quiz torrent is based on web browser usage design and can be used by any browser device. The first time you use Terraform-Associate-003 test preps on the Internet, you can use it offline next time.
