

Identify and Strengthen Your Weaknesses with Microsoft DP-300 Practice Tests (Desktop and Web-Based)

Microsoft DP-300 Practice Test

Microsoft DP-300 Exam is no joke, and neither is the Microsoft DP-300 Practice Test that you'll need to prepare for them. To pass any Microsoft certification exam, including the Administering Relational Databases on Microsoft Azure, you'll need an excellent [Microsoft DP-300 Practice Test](#) that includes all the information regarding the Exam that you need to know about the subject and that allows you to study on your own terms without needing to attend regular classes or expensive seminars.

Microsoft DP-300 Practice Test can be your first step towards working in the information technology industry as a software developer or information systems manager. So it's important to choose the DP-300 Practice Test you use wisely for your Administering Relational Databases on Microsoft Azure DP-300 Exam. If you use DP-300 Practice Test that are outdated or unreliable, you might struggle on the Exam without realizing it because these types of DP-300 Practice Test might include incorrect information or skip key topics completely.

Administering Relational Databases on Microsoft Azure Dumps PDF helps you in the Actual Exam?

If you are appearing in the Microsoft Administering Relational Databases on Microsoft Azure DP-300 Exam and you have less time for preparation, then you can prepare your exam quickly from DP-300 Dumps PDF, which are provided by GetBrainDumps. If you just prepare our Azure Database Administrator Associate Dumps PDF and take part in the real Exam, you can take good percentage marks, making sure you are using our updated Microsoft DP-300 Dumps PDF. A lot of students and IT professionals have less time for the preparation for the Microsoft DP-300 Exam, so we help them in clearing certifications exam quickly and easily with our DP-300 Dumps PDF. Once you have purchased our Administering Relational Databases on Microsoft Azure Dumps PDF, then you can get in touch with our Microsoft certified professionals for getting more tips about the [Azure Database Administrator Associate certification](#) Exam. When you are preparing for your Azure Database Administrator Associate Exam, then there are some unusual consequences like different questions coming in the Exam which you have not prepared for before or see the first time in the exam. It all happens because of outdated DP-300 Dumps PDF. So before appearing in the actual DP-300 Exam, you should have to verify from our expert team is it most updated or not.

Pass DP-300 Exam with Excellent Most DP-300 Reliable Questions by FreePdfDump

As the talent competition increases in the labor market, it has become an accepted fact that the DP-300 certification has become an

essential part for a lot of people, especial these people who are looking for a good job, because the certification can help more and more people receive the renewed attention from the leaders of many big companies. So it is very important for a lot of people to gain the DP-300 Certification. We must pay more attention to the certification and try our best to gain the DP-300 certification.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q256-Q261):

NEW QUESTION # 256

You configure version control for an Azure Data Factory instance as shown in the following exhibit.

The screenshot shows the 'Git repository' configuration page in Azure Data Factory. The left-hand navigation pane is expanded to 'Source control', with 'Git configuration' selected. The main content area displays the following configuration details:

- Repository type: Azure DevOps Git
- Azure DevOps Account: CONTOSO
- Project name: Data
- Repository name: dwh_batchetl
- Collaboration branch: main
- Publish branch: adf_publish

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Azure Resource Manager (ARM) templates or the pipeline assets as stored in

Drop-down menu 1 options:

- /
- adf_publish
- main
- Parameterization template

A Data Factory Azure Resource Manager (ARM) template named contososales can be found in

Drop-down menu 2 options:

- /contososales
- /dwh_batchetl/adf_publish/contososales
- /main

Answer:

Explanation:

The diagram illustrates the correct selections for the two drop-down menus:

- The first menu, for 'Azure Resource Manager (ARM) templates for the pipeline assets as stored in', is set to `adf_publish`.
- The second menu, for 'A Data Factory Azure Resource Manager (ARM) template named contososales can be found in', is set to `/dwh_batchetl/adf_publish/contososales`.

Explanation:

Azure Resource Manager (ARM) templates for the pipeline assets as stored in

A Data Factory Azure Resource Manager (ARM) template named contososales can be found in

Box 1: adf_publish

By default, data factory generates the Resource Manager templates of the published factory and saves them into a branch called adf_publish. To configure a custom publish branch, add a publish_config.json file to the root folder in the collaboration branch. When publishing, ADF reads this file, looks for the field publishBranch, and saves all Resource Manager templates to the specified location. If the branch doesn't exist, data factory will automatically create it. An example of what this file looks like is below:

```
{
  "publishBranch": "factory/adf_publish"
}
```

Box 2: /dwh_batchetl/ adf_publish/contososales

RepositoryName: Your Azure Repos code repository name. Azure Repos projects contain Git repositories to manage your source code as your project grows. You can create a new repository or use an existing repository that's already in your project.

NEW QUESTION # 257

You have an Azure subscription. The subscription contains three virtual machines that run Red Hat Enterprise Linux (RHEL).

You plan to implement a highly available deployment of Microsoft SQL Server 2022 on the virtual machines by using failover cluster instances (FCIs).

You need to prepare for the implementation.

What should you do first on each server?

- A. Install the cluster resource manager and the FCI resource agent.
- B. Create the FCI disk and network resources.
- C. Install the default SQL Server instance.
- D. Install a named SQL Server instance.

Answer: A

Explanation:

To prepare for implementing a highly available deployment of Microsoft SQL Server 2022 on the virtual machines using failover cluster instances (FCIs), the first step you should take on each server is install the cluster resource manager and the FCI resource agent. Before setting up a failover cluster instance, you need to ensure that the cluster infrastructure is in place. This involves installing the cluster resource manager (such as Pacemaker on Linux) and the FCI resource agent, which are essential for managing the failover clustering and ensuring high availability.

NEW QUESTION # 258

You have an Azure subscription that contains an Azure SQL database named SQLDb1. SQLDb1 contains a table named Table1.

You plan to deploy an Azure web app named webapp1 that will export rows in Table1 that have changed.

You need to ensure that webapp1 can identify the changes to Table1. The solution must meet the following requirements:

* Minimize compute times.

* Minimize storage.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

CTIONS

ANSWER AREA

```
From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGETABLE() function.

Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER DATABASE SQLDb1 SET CHANGE_TRACKING ON

From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGE_TRACKING_CURRENT_VERSION() function.

connect to SQLDb1 and run the following Transact-SQL statement.

EXEC sys.sp_cdc_enable_table

connect to SQLDb1 and run the following Transact-SQL statement.

EXEC sys.sp_cdc_enable_db

connect to SQLDb1 and run the following Transact-SQL statement.

ALTER TABLE dbo.Table1 ENABLE CHANGE_TRACKING
```

Answer:

Explanation:

Answer Area
Connect to SQLDb1 and run the following,,,,,,
Connect to SQLDb1 and run the following Transact-SQL statement ALTER TABLE dbo,,,,,,
From webapp1, connect to,,,,,,

- 1 - Connect to SQLDb1 and run the following,,,,,,
- 2 - Connect to SQLDb1 and run the following Transact-SQL statement ALTER TABLE dbo,,,,,,
- 3 - From webapp1, connect to,,,,,,

NEW QUESTION # 259

You have an Azure subscription.

You need to deploy an Azure SQL database. The solution must meet the following requirements:

- Dynamically scale CPU resources.
- Ensure that the database can be paused to reduce costs.

What should you use?

- A. an elastic pool
- B. the General Purpose service tier
- C. the Business Critical service tier
- **D. the serverless compute tier**

Answer: D

Explanation:

Serverless is a compute tier for single databases in Azure SQL Database that automatically scales compute based on workload demand and bills for the amount of compute used per second. The serverless compute tier also automatically pauses databases during inactive periods when only storage is billed and automatically resumes databases when activity returns. The serverless compute tier is available in the General Purpose service tier and currently in preview in the Hyperscale service tier.

<https://learn.microsoft.com/en-us/azure/azure-sql/database/serverless-tier-overview?view=azuresql&tabs=general-purpose>

NEW QUESTION # 260

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure SQL database named Sales.

You need to implement disaster recovery for Sales to meet the following requirements:

- During normal operations, provide at least two readable copies of Sales.

- Ensure that Sales remains available if a datacenter fails.

Solution: You deploy an Azure SQL database that uses the Business Critical service tier and Availability Zones.

Does this meet the goal?

- A. No
- **B. Yes**

Answer: B

Explanation:

Premium and Business Critical service tiers leverage the Premium availability model, which integrates compute resources (sqlservr.exe process) and storage (locally attached SSD) on a single node. High availability is achieved by replicating both compute and storage to additional nodes creating a three to four-node cluster.

By default, the cluster of nodes for the premium availability model is created in the same datacenter. With the introduction of Azure Availability Zones, SQL Database can place different replicas of the Business Critical database to different availability zones in the same region. To eliminate a single point of failure, the control ring is also duplicated across multiple zones as three gateway rings (GW).

Reference:

NEW QUESTION # 261

.....

The DP-300 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. Our Administering Relational Databases on Microsoft Azure study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit DP-300 Exam Questions. It points to the exam heart to solve your difficulty.

DP-300 Exam Assessment: <https://www.freepdfdump.top/DP-300-valid-torrent.html>

Microsoft Most DP-300 Reliable Questions Now it is your chance, Do you feel anxiety about your coming DP-300 valid vce dumps, Unlike the traditional way of learning, the great benefit of our DP-300 learning material is that when the user finishes the exercise, he can get feedback in the fastest time, Our high-quality exam products make good reputation in this field and many regular customers choose DP-300 practice test every time when they are ready to attend exam.

One year of free Microsoft DP-300 test questions updates are included in the SnowPro Core Certification test DP-300 quiz package, Must have a well-thought out security policy.

Now it is your chance, Do you feel anxiety about your coming DP-300 Valid Vce Dumps, Unlike the traditional way of learning, the great benefit of our DP-300 learning material is that when the user finishes the exercise, he can get feedback in the fastest time.

2026 Microsoft DP-300 Unparalleled Most Reliable Questions Pass Guaranteed Quiz

Our high-quality exam products make good reputation in this field and many regular customers choose DP-300 practice test every time when they are ready to attend exam.

The design of our DP-300 guide training is ingenious and delicate.
