C-S4CPR-2502 Exam Questions Vce | Reliable C-S4CPR-2502 Exam Guide

In the past ten years, our company has never stopped improving the C-S4CPR-2502 exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our C-S4CPR-2502 exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our C-S4CPR-2502 Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the C-S4CPR-2502 test guide. In the future, we will continuously invest more money on researching.

SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.
Topic 2	<ul style="list-style-type: none">Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.
Topic 3	<ul style="list-style-type: none">Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which of the following apps can you use to extend the organizational data of an already existing material /product in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- **A. Change Material**
- B. Manage Source Data Products
- C. Create Material
- **D. Manage Product Master Data**

Answer: A,D

Explanation:

In SAP S/4HANA Cloud Public Edition, extending the organizational data of an already existing material /product can be achieved through specific apps designed for managing and modifying master data. Here's a detailed explanation of the correct answers:

* Manage Product Master Data (A): This app allows users to manage product master data across different organizational levels, such as plants, sales organizations, and distribution channels. It is particularly useful for extending the organizational data of an existing material by adding or modifying attributes relevant to specific organizational units. This app provides a centralized interface to handle various aspects of product data.

* Change Material (B): The "Change Material" app is used to modify existing material master records. It allows users to update or extend the organizational data for materials in different organizational contexts, such as plant-specific or purchasing-related data. This app is essential when you need to make changes to existing materials without creating new ones.

* Create Material (C): This app is used to create new material master records rather than extending or modifying existing ones. Therefore, it is not suitable for extending the organizational data of an already existing material.

* Manage Source Data Products (D): This app is related to managing source data for products, typically used in procurement processes to define sources of supply. It does not directly deal with extending organizational data for existing materials.

SAP S/4HANA Cloud Public Edition Documentation: Change Material App

SAP Best Practices for Sourcing and Procurement in SAP S/4HANA Cloud Public Edition These references provide comprehensive insights into the functionalities and use cases of the mentioned apps within the context of SAP S/4HANA Cloud Public Edition - Sourcing and Procurement.

NEW QUESTION # 30

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP

S/4HANA Cloud. Public Edition? Note: There are 2 correct answers to this question.

- **A. Communication system**
- B. Communication API
- **C. Communication arrangement**
- D. Communication interface

Answer: A,C

Explanation:

When building an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition, two key components must be created:

* **Communication arrangement (Option A):** A communication arrangement links the communication system to a specific communication scenario, enabling the exchange of data between systems. It defines how the integration will function and which users or systems are authorized. The SAP Communication Management Guide confirms this requirement.

* **Communication system (Option D):** A communication system represents the external system or application that will interact with SAP S/4HANA Cloud. It contains technical details such as host names, ports, and authentication methods. The same SAP Communication Management Guide documents this step.

* **B. Communication interface:** Communication interfaces are predefined by SAP and are not created by users. They define the structure of the data being exchanged.

* **C. Communication API:** APIs are provided by SAP and do not need to be created manually. Instead, they are selected during the communication arrangement setup.

* **SAP Communication Management Guide:** Explains the steps to create communication arrangements and systems for integration scenarios. <https://help.sap.com>

* **SAP S/4HANA Cloud Integration Guide:** Provides details on using communication management apps for integration. Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 31

When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size? Note: There are 2 correct answers to this question.

- A. 100 MB per ZIP file
- **B. 160 MB per file**
- C. 160 MB per ZIP file
- **D. 100 MB per file**

Answer: B,D

NEW QUESTION # 32

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain technical catalogs
- **B. Assign business catalogs to a business role**
- C. Maintain restrictions
- **D. Assign PFCG profiles to a business role**

Answer: B,D

NEW QUESTION # 33

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- **A. Mapping source values to SAP S/4HANA target values**
- **B. Guidance and simulation of the migration process**
- C. Combining the local and remote schema approaches into one migration project
- D. Extensibility using the Legacy System Migration Workbench

Answer: A,B

Explanation:

The SAP S/4HANA Migration Cockpit is a tool designed to facilitate data migration into SAP S/4HANA Cloud Public Edition. Below is an explanation of the correct answers:

- * Mapping source values to SAP S/4HANA target values (A): The Migration Cockpit allows users to map data fields from the source system to corresponding fields in SAP S/4HANA, ensuring accurate data transformation during migration.
- * Guidance and simulation of the migration process (C): The tool provides step-by-step guidance and enables simulation of the migration process to identify potential issues before executing the actual migration.
- * Extensibility using the Legacy System Migration Workbench (B): The Legacy System Migration Workbench is used for on-premise systems and is not applicable to SAP S/4HANA Cloud Public Edition.
- * Combining the local and remote schema approaches into one migration project (D): This is not a characteristic of the Migration Cockpit, as it focuses on structured migration projects rather than combining schemas.
