

# SPLK-2002 Exam Materials & Valid Braindumps SPLK-2002 Ppt

What's more, part of that PracticeTorrent SPLK-2002 dumps now are free: <https://drive.google.com/open?id=1RUwinI04nagrMwE3tGhCYJFgpc-AQGNV>

Once the user has used our SPLK-2002 test prep for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of SPLK-2002 Quiz guide, the timer will run automatic and start counting. The transfer can be based on the SPLK-2002 valid practice questions report to develop a learning plan that meets your requirements. As long as you study with our SPLK-2002 exam questions, you will pass the exam.

The SPLK-2002 certification exam is a challenging exam that requires careful preparation and study. To prepare for the exam, candidates should have a solid understanding of Splunk fundamentals and should have hands-on experience working with Splunk Enterprise. Candidates may also benefit from attending Splunk training courses or other relevant training programs. Successful completion of the SPLK-2002 Certification Exam can help IT professionals demonstrate their expertise in Splunk Enterprise and can lead to new career opportunities and increased earning potential.

## Valid Braindumps SPLK-2002 Ppt, SPLK-2002 Latest Test Practice

Our SPLK-2002 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our SPLK-2002 study materials. For instance, PC version of our SPLK-2002 training quiz is suitable for the computers with the Windows system and supports the MS Operation System. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our SPLK-2002 learning guide at any time.

## Splunk Enterprise Certified Architect Sample Questions (Q192-Q197):

### NEW QUESTION # 192

Which index-time props.conf attributes impact indexing performance? (Select all that apply.)

- A. LINE\_BREAKER
- B. REPORT
- C. ANNOTATE\_PUNCT
- D. SHOULD\_LINEMERGE

Answer: A,D

### NEW QUESTION # 193

Which of the following strongly impacts storage sizing requirements for Enterprise Security?

- A. The number of source types used in the environment.
- B. The number of scheduled (correlation) searches.
- **C. The number of Data Models accelerated.**
- D. The number of Splunk users configured.

**Answer: C**

Explanation:

Data Model acceleration is a feature that enables faster searches over large data sets by summarizing the raw data into a more efficient format. Data Model acceleration consumes additional disk space, as it stores both the raw data and the summarized data. The amount of disk space required depends on the size and complexity of the Data Model, the retention period of the summarized data, and the compression ratio of the data.

According to the Splunk Enterprise Security Planning and Installation Manual, Data Model acceleration is one of the factors that strongly impacts storage sizing requirements for Enterprise Security. The other factors are the volume and type of data sources, the retention policy of the data, and the replication factor and search factor of the index cluster. The number of scheduled (correlation) searches, the number of Splunk users configured, and the number of source types used in the environment are not directly related to storage sizing requirements for Enterprise Security<sup>1</sup>

### NEW QUESTION # 194

Of the following types of files within an index bucket, which file type may consume the most disk?

- A. Metadata (.data)
- B. Inverted index (.tsidx)
- C. Bloom filter
- **D. Rawdata**

**Answer: D**

Explanation:

Explanation

Of the following types of files within an index bucket, the rawdata file type may consume the most disk. The rawdata file type contains the compressed and encrypted raw data that Splunk has ingested. The rawdata file type is usually the largest file type in a bucket, because it stores the original data without any filtering or extraction. The bloom filter file type contains a probabilistic data structure that is used to determine if a bucket contains events that match a given search. The bloom filter file type is usually very small, because it only stores a bit array of hashes. The metadata (.data) file type contains information about the bucket properties, such as the earliest and latest event timestamps, the number of events, and the size of the bucket. The metadata file type is also usually very small, because it only stores a few lines of text. The inverted index (.tsidx) file type contains the time-series index that maps the timestamps and event IDs of the raw data. The inverted index file type can vary in size depending on the number and frequency of events, but it is usually smaller than the rawdata file type

### NEW QUESTION # 195

What is the minimum reference server specification for a Splunk indexer?

- A. 16 CPU cores, 16GB RAM, 800 IOPS
- **B. 12 CPU cores, 12GB RAM, 800 IOPS**
- C. 24 CPU cores, 16GB RAM, 1200 IOPS
- D. 28 CPU cores, 32GB RAM, 1200 IOPS

**Answer: B**

Explanation:

Explanation

The minimum reference server specification for a Splunk indexer is 12 CPU cores, 12GB RAM, and 800 IOPS. This specification is based on the assumption that the indexer will handle an average indexing volume of 100GB per day, with a peak of 300GB per day, and a typical search load of 1 concurrent search per 1GB of indexing volume. The other specifications are either higher or lower than

the minimum requirement. For more information, see [Reference hardware] in the Splunk documentation.

### NEW QUESTION # 196

A multi-site indexer cluster can be configured using which of the following? (Select all that apply.)

- A. Run a splunk edit cluster-config command from the CLI.
- **B. Directly edit SPLUNK\_HOME/etc/system/local/server.conf**
- C. Directly edit SPLUNK\_HOME/etc/system/default/server.conf
- **D. Via Splunk Web.**

**Answer: B,D**
