It is acknowledged that there are numerous F5CAB1 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for F5CAB1 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our F5CAB1 Actual Exam is. To let you have a general idea about the shining points of our training materials I would like to list three of the advantages of our training for you.

Our F5CAB1 study materials are full of useful knowledge, which can meet your requirements of improvement. Also, it just takes about twenty to thirty hours for you to do exercises of the F5CAB1 study guide. The learning time is short but efficient. You will elevate your ability in the shortest time with the help of our F5CAB1 Preparation questions. At the same time, you will be bound to pass the exam and achieve the shining F5CAB1 certification which will help you get a better career.

Excellent F5CAB1 Valid Exam Discount & Leading Offer in Qualification Exams & Fast Download F5CAB1: BIG-IP Administration Install, Initial Configuration, and Upgrade

Quitters never win and winners never quit. If you are determined to clear F5CAB1 exam and obtain a certification you shouldn't give up because of one failure. If you are willing, our F5 F5CAB1 valid exam simulations file can help you clear exam and regain confidence. Every year there are thousands of candidates choosing our products and obtain certifications so that our F5CAB1 valid exam simulations file is famous for its high passing-rate in this field. If you want to pass exam one-shot, you shouldn't miss our files.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q43-Q48):

NEW QUESTION # 43

Refer to the exhibit.

An organization has purchased a BIG-IP license that includes all available modules but has chosen to provision only the modules they require.

The exhibit displays the current resource allocation from the System -> Resource Provisioning page.

Based on the information provided, which F5 modules have been provisioned?

- A. LTM, APM
- B. TMM, DNS, APS
- C. DNS, APM
- **D. LTM, DNS, APM**

Answer: D

Explanation:

The exhibit shows the Current Resource Allocation for:

CPU

Disk

Memory

In particular, the Memory Allocation bar displays the modules that are currently provisioned.

Memory is the most reliable indicator because BIG-IP allocates memory only to modules that are actively provisioned.

From the exhibit:

MGMT (Management) - always present

TMM (Traffic Management Microkernel) - indicates LTM is provisioned

GTM - this label indicates that the DNS module is provisioned (GTM = Global Traffic Manager, now called DNS) APM - explicitly shown, indicating Access Policy Manager is provisioned Therefore, the provisioned modules are:

LTM (implied by TMM allocation)

DNS/GTM

APM

This matches Option C: LTM, DNS, APM.

NEW QUESTION # 44

Which of the following should you do to enable SSL offloading on a BIG-IP system?

- **A. Configure an SSL profile and associate it with the virtual server**
- B. Configure the SSL profile on the backend servers
- C. Set up a VLAN for SSL offloading
- D. Enable SSL through the System > Security settings

Answer: A

Explanation:

To enable SSL offloading, you need to configure an SSL profile and link it to a virtual server to handle SSL termination.

NEW QUESTION # 45

The BIG-IP Administrator uses Secure Copy Protocol (SCP) to upload a TMOS image to the `/shared/images/` directory in preparation for a TMOS upgrade.

After the upload is completed, what will the system do before the image is shown in the GUI under: System » Software Management » Image List?

- A. The system copies the image to `/var/local/images/`
- **B. The system verifies the internal checksum**
- C. The system performs a reboot into a new partition

Answer: B

Explanation:

When a TMOS image (.iso file) is uploaded into the `/shared/images/` directory, the BIG-IP performs an internal validation step before the ISO appears in the GUI.

1. The system verifies the internal checksum

* BIG-IP automatically reads the embedded checksum inside the ISO file

* Verifies integrity of the uploaded image

* Confirms the file is not corrupted or incomplete

* Ensures the image is a valid F5 TMOS software image

Only after this checksum verification succeeds does the image appear under:

System # Software Management # Image List

Why the other options are incorrect:

A). The system performs a reboot into a new partition

* Uploading an ISO file never triggers a reboot.

C). The system copies the image to `/var/local/images/`

* All valid TMOS images remain in `/shared/images/`.

* No copying occurs.

NEW QUESTION # 46

What is the purpose of a Virtual Server in BIG-IP?

- **A. It handles the routing of traffic to back-end servers**
- B. It defines a failover mechanism for the system
- C. It defines how SSL certificates are managed
- D. It is used to configure the Self-IP

Answer: A

Explanation:

A Virtual Server is used to manage traffic, directing it to the appropriate pool of servers based on load balancing rules.

NEW QUESTION # 47

Which two items demonstrate the creation of a new volume for software images? (Choose two.)

- A. `tmsh install /sys software image BIGIP-<version>.iso volume HD1.5 create-volume`
- **B. `tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`**
- C. `tmsh install sys software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- D. Using the GUI, go to System > Software Management > Available Images > Install, and in the Install Software Image pop-up window, type the new volume name or number and click Install.
- **E. Using the GUI, go to System > Disk Management, select New Volume. In the pop-up window, type the name or number of the new volume and click Apply.**

Answer: B,E

Explanation:

In BIG-IP, software images are installed on boot volumes (for example, HD1.1, HD1.2, HD1.3, etc.).

To install software on a new volume, the administrator must instruct the system to create a new boot location before installation.

There are two correct ways to create a new volume:

A). tmsh command (with correct syntax)

tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume This syntax correctly includes:

install software image

full path to ISO (/shared/images/...)

volume name (HD1.5)

create-volume keyword

This instructs BIG-IP to create the new boot volume as part of the installation.

C). Using the GUI System> Disk Management

From the Disk Management menu, the administrator can:

Select "New Volume"

Enter the volume identifier (e.g., HD1.5)

Apply changes

This GUI method is officially supported and explicitly creates a new boot volume before installing the software.

NEW QUESTION # 48

.....

The PDF version of the ExamsReviews F5 F5CAB1 prep material is easily accessible. This format is ideal for someone who is constantly on the move, as you can prepare for your BIG-IP Administration Install, Initial Configuration, and Upgrade (F5CAB1) exam whether you are using your smartphone, tablet, or laptop. You can study anywhere, at any time, without having to worry about installing anything. Furthermore, you can study with a hard copy by printing all of your BIG-IP Administration Install, Initial Configuration, and Upgrade (F5CAB1) PDF questions. We offer regular updates in PDF format to improve BIG-IP Administration Install, Initial Configuration, and Upgrade (F5CAB1) questions according to changes in the exam.
