Get High Pass-Rate 300-710 Latest Exam Notes and Pass Exam in First Attempt

P.S. Free 2026 Cisco 300-710 dumps are available on Google Drive shared by BraindumpsIT: https://drive.google.com/open?id=1qCO9BmvZWi_wGjw5oHQBUxQ9Iq7atjVA

Keeping in view different preparation styles of Cisco 300-710 test applicant BraindumpsIT has designed three easy-to-use formats for its product. Each format has a pool of Securing Networks with Cisco Firepower (300-710) actual questions which have been compiled under the guidance of thousands of professionals worldwide. Questions in this product will appear in the Cisco 300-710 final test.

With our users all over the world, you really should believe in the choices of so many people. Our advantage is very obvious. Of course, the right to choose is in your hands. What I want to say is that if you are eager to get an international 300-710 Certification, you must immediately select our 300-710 preparation materials. After you have studied for twenty to thirty hours on our 300-710 exam questions, you can take the test. And your pass rate will reach 99%.

Cisco 300-710 PDF Questions: Accessible Anywhere

Once you enter into our official website, you will find everything you want. All the 300-710 test engines are listed orderly. You just need to choose what you are willing to learn. In addition, you will feel comfortable and pleasant to shopping on such a good website.

All the contents of our 300-710 practice test are organized logically. Each small part contains a specific module. You can clearly get all the information about our 300-710 Study Guide. If you cannot find what you want to know, you can have a conversation with our online workers. They have been trained for a long time. Your questions will be answered accurately and quickly. We are still working hard to satisfy your demands. Please keep close attention to our 300-710 training material.

Cisco 300-710 Certification Exam is a vendor-specific certification that is highly valued in the industry. Securing Networks with Cisco Firepower certification validates the knowledge and skills required to secure networks with Cisco Firepower, one of the most widely used network security technologies in the world. Securing Networks with Cisco Firepower certification demonstrates that the candidate has the expertise to mitigate the latest security threats and protect their organization's network infrastructure.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q69-Q74):

NEW QUESTION # 69
Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

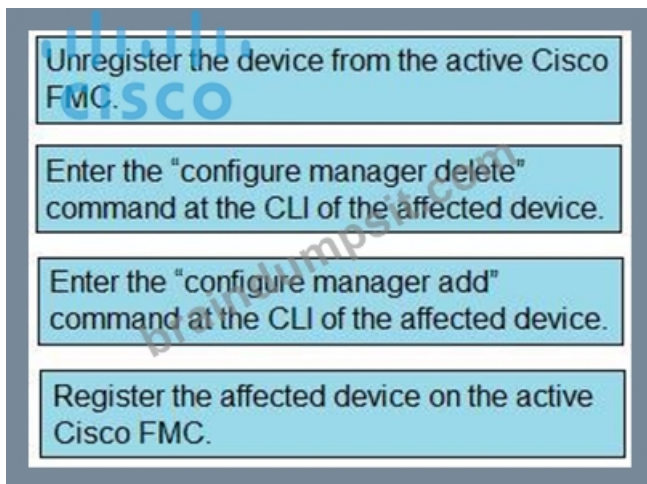

Answer:

Explanation:

Explanation:

Explanation:
Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config- guide-v62/firepower_management_center_high_availability.html#id_32288

NEW QUESTION # 70
An engineer Is configuring a Cisco FTD device to place on the Finance VLAN to provide additional protection tor company financial data. The device must be deployed without requiring any changes on the end user workstations, which currently use DHCP lo obtain an IP address. How must the engineer deploy the device to meet this requirement?

- A. Deploy the device in routed made aid enable the DHCP Relay feature.
- B. Deploy the device in transparent mode and allow DHCP traffic in the access control policies
- C. Deploy the device in routed mode and allow DHCP traffic in the access control policies.
- D. Deploy the device in transparent mode and enable the DHCP Server feature.

Answer: B

Explanation:
Explanation
Transparent mode allows the FTD device to act as a "bump in the wire" that does not affect the IP addressing of the network. The end user workstations will not need any changes to their configuration, as they will still receive an IP address from the same DHCP server. However, the FTD device must allow DHCP traffic in the access control policies, otherwise it will block the DHCP requests and replies1

NEW QUESTION # 71
Which two statements about bridge-group interfaces in Cisco FTD are true? (Choose two.)

- A. Bridge groups are supported in both transparent and routed firewall modes.
- B. Bidirectional Forwarding Detection echo packets are allowed through the FTD when using bridge- group members.
- C. The BVI IP address must be in a separate subnet from the connected network.
- D. Each directly connected network must be on the same subnet.
- E. Bridge groups are supported only in transparent firewall mode.

Answer: A,D

Explanation:
https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config- guide-v62/transparent_or_routed_firewall_mode_for_firepower_threat_defense.html

NEW QUESTION # 72
An engineer is configuring two new Cisco Secure Firewall Threat Defense devices to replace the existing firewalls. Network traffic must be analyzed for intrusion events without impacting the traffic. What must the engineer implement next to accomplish the goal?

- A. Inline Pair in Tap mode
- B. Passive mode
- C. Inline Pair mode
- D. ERSPAN Passive mode

Answer: B

NEW QUESTION # 73
Which default action setting in a Cisco FTD Access Control Policy allows all traffic from an undefined application to pass without Snort Inspection?

- A. Network Discovery Only
- B. Trust All Traffic
- C. Intrusion Prevention
- D. Inherit from Base Policy

Answer: B

Explanation:
The default action setting in a Cisco FTD Access Control Policy determines how the system handles and logs traffic that is not handled by any other access control configuration. The default action can block or trust all traffic without further inspection, or inspect traffic for intrusions and discovery data3.
The Trust All Traffic option allows all traffic from an undefined application to pass without Snort inspection.
This option also disables Security Intelligence filtering, file and malware inspection, and URL filtering for all traffic handled by the default action. This option is useful when you want to minimize the performance impact of access control on your network3.
The other options are incorrect because:
* The Inherit from Base Policy option inherits the default action setting from the base policy. The base policy is the predefined access control policy that you use as a starting point for creating your own policies. Depending on which base policy you choose, the inherited default action setting can be different3.
* The Network Discovery Only option inspects all traffic for discovery data only. This option enables Security Intelligence filtering for all traffic handled by the default action, but disables file and malware inspection, URL filtering, and intrusion inspection. This option is useful when you want to collect information about your network before you configure access control rules3.
* The Intrusion Prevention option inspects all traffic for intrusions and discovery data. This option enables Security Intelligence filtering, file and malware inspection, URL filtering, and intrusion inspection for all traffic handled by the default action. This option provides the most comprehensive protection for your network, but also has the most performance impact3.

NEW QUESTION # 74
......

The Cisco 300-710 practice exam will be a great help because you are left with little time to prepare for the Cisco 300-710 certification exam which you cannot waste to make time for the Cisco 300-710 Exam Questions. Get the Cisco 300-710 certification by preparing through Cisco 300-710 exam questions that will help you pass the Cisco 300-710 exam.
