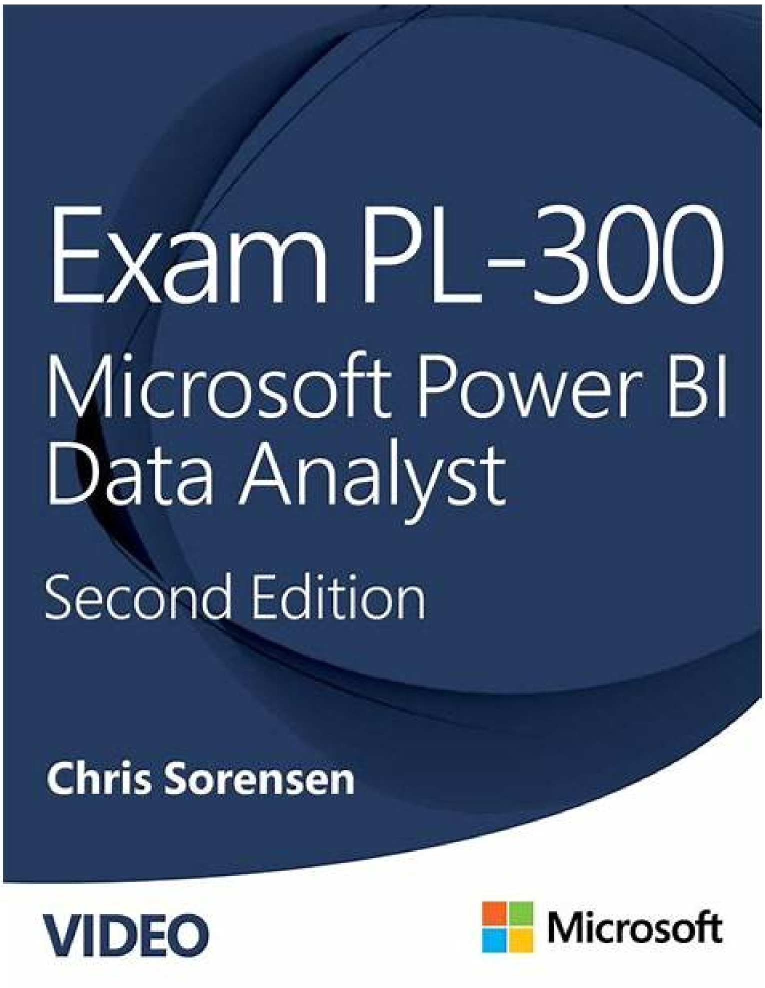
PL-300 Prüfungsfragen Prüfungsvorbereitungen 2026: Microsoft Power BI Data Analyst - Zertifizierungsprüfung Microsoft PL-300 in Deutsch Englisch pdf downloaden



BONUS!!! Laden Sie die vollständige Version der ZertSoft PL-300 Prüfungsfragen kostenlos herunter: https://drive.google.com/open?id=1_Na5ZqGrz6qgYtjsRK8WQD-190iLd78W

Jeder hat seinen eigenen Traum. Was ist Ihr Traum? Beförderungschance, mehr Gehalt und so weiter. Mein Traum ist es, die Microsoft PL-300 Zertifizierungsprüfung zu bestehen. Mit diesem Zertifikat können alle Probleme gelöst werden. Jedoch ist es schwierig, diese Zertifizierung zu bestehen. Aber es ist nicht wichtig. Ich wähle die Schulungsunterlagen zur Microsoft PL-300 Zertifizierungsprüfung von ZertSoft, weil sie meinen Wunsch erfüllen können. Wenn Sie auch IT-Traum haben, dann verwirklichen Sie den Traum schnell. Wählen Sie doch die Schulungsunterlagen zur Microsoft PL-300 Zertifizierungsprüfung von ZertSoft, sie sind eher zuverlässig.

Die Microsoft PL-300-Zertifizierung ist ideal für Personen, die ihre Karriere in den Bereichen Datenanalyse und Business Intelligence vorantreiben möchten. Sie eignet sich auch für IT-Profis, die ihre Fähigkeiten in der Datenanalyse und -visualisierung verbessern möchten. Die Zertifizierung zeigt, dass die Person die notwendigen Fähigkeiten besitzt, um Power BI-Lösungen zu entwerfen und zu entwickeln, die für Unternehmen wesentlich sind, um fundierte Entscheidungen zu treffen.

Die Microsoft PL-300-Prüfung ist eine herstellerunabhängige Zertifizierung, was bedeutet, dass sie nicht an eine spezifische Hardware- oder Software-Plattform gebunden ist. Dies macht es zu einer großartigen Option für Fachleute aus verschiedenen Branchen, die möglicherweise verschiedene Technologien und Plattformen verwenden. Darüber hinaus ist die Prüfung auch für Personen zugänglich, die neu im Bereich Daten und Analyse sind, und bietet ihnen eine solide Grundlage, um ihre Fähigkeiten und Karriere aufzubauen.

PL-300 Übungsmaterialien - PL-300 Lernressourcen & PL-300 Prüfungsfragen

Ihren Stress der Vorbereitung auf Microsoft PL-300 zu erleichtern ist unsere Verpflichtung. Ihnen erfolgreich zu helfen, Microsoft PL-300 Prüfung zu bestehen ist unser Ziel. Wir beruhigen Sie mit einer erstaunlich hohen Bestehensrate. Nicht alle Lieferanten wollen garantieren, dass volle Rückerstattung beim Durchfall anbieten, aber die IT-Profis von uns ZertSoft und alle mit unserer Microsoft PL-300 Software zufriedene Kunden haben uns die Konfidenz mitgebracht.

Microsoft Power BI Data Analyst PL-300 Prüfungsfragen mit Lösungen (Q314-Q319):

314. Frage
You have a Power BI app named App1. The privacy for the App1 workspace is set to Private.
A user named User1 reports that App1 does not appear in the My organization AppSource. App1 appears in the My organization AppSource for your account.
You need to ensure that User sees App1 from the My organization AppSource.
What should you do?

- A. From the app workspace, click Update app, configure the Access setting, and then click Update app.
- B. From the app workspace, share the dashboard.
- C. From the app workspace settings, add a member.
- D. From the app workspace, click Update app, configure the Content settings, and then click Update app.

Antwort: A

315. Frage
What should you create to meet the reporting requirements of the sales department?

- A. a calculated column that uses a formula of SUM (Sales [sales_id])
- B. a measure that uses a formula of COUNTROWS (Sales)
- C. a calculated column that use a formula of COUNTA(sales [sales_id])
- D. a measure that uses a formula of SUM (Sales [sales_id])

Antwort: B

Begründung:
The sale department requires reports that contain the number of sales transactions.
The COUNTROWS function counts the number of rows in the specified table, or in a table defined by an expression.

Topic 3, Northwind Traders
Overview
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to

the question.
Overview. General Overview
Northwind Traders is a specialty food import company.
The company recently implemented Power BI to better understand its top customers, products, and suppliers.
Overview. Business Issues
The sales department relies on the IT department to generate reports in Microsoft SQL Server Reporting Services (SSRS). The IT department takes too long to generate the reports and often misunderstands the report requirements.
Existing Environment. Data Sources
Northwind Traders uses the data sources shown in the following table.
Source2 is exported daily from a third-party system and stored in Microsoft SharePoint Online.
Existing Environment. Customer Worksheet
Source2 contains a single worksheet named Customer Details. The first 11 rows of the worksheet are shown in the following table.
All the fields in Source2 are mandatory.
The Address column in Customer Details is the billing address, which can differ from the shipping address.
Existing Environment. Azure SQL Database
Source1 contains the following table:
Orders
Products
Suppliers
Categories
Order Details
Sales Employees
The Orders table contains the following columns.
The Order Details table contains the following columns.
The address in the Orders table is the shipping address, which can differ from the billing address.
The Products table contains the following columns.
The Categories table contains the following columns.
The Suppliers table contains the following columns.
The Sales Employees table contains the following columns.
Each employee in the Sales Employees table is assigned to one sales region. Multiple employees can be assigned to each region.
Requirements. Report Requirements
Northwind Traders requires the following reports:
Top Products
Top Customers
On-Time Shipping
The Top Customers report will show the top 20 customers based on the highest sales amounts in a selected order month or quarter, product category, and sales region.
The Top Products report will show the top 20 products based on the highest sales amounts sold in a selected order month or quarter, sales region, and product category. The report must also show which suppliers provide the top products.
The On-Time Shipping report will show the following metrics for a selected shipping month or quarter:
The percentage of orders that were shipped late by country and shipping region Customers that had multiple late shipments during the last quarter Northwind Traders defines late orders as those shipped after the required shipping date.
The warehouse shipping department must be notified if the percentage of late orders within the current month exceeds 5%.
The reports must show historical data for the current calendar year and the last three calendar years.
Requirements. Technical Requirements
Northwind Traders identifies the following technical requirements:
A single dataset must support all three reports.
The reports must be stored in a single Power BI workspace.
Report data must be current as of 7 AM Pacific Time each day.
The reports must provide fast response times when users interact with a visualization.
The data model must minimize the size of the dataset as much as possible, while meeting the report requirements and the technical requirements.
Requirements. Security Requirements
Access to the reports must be granted to Azure Active Directory (Azure AD) security groups only. An Azure AD security group exists for each department.
The sales department must be able to perform the following tasks in Power BI:
Create, edit, and delete content in the reports.
Manage permissions for workspaces, datasets, and report.
Publish, unpublish, update, and change the permissions for an app.

Assign Azure AD groups role-based access to the reports workspace.
Users in the sales department must be able to access only the data of the sales region to which they are assigned in the Sales Employees table.
Power BI has the following row-level security (RLS) Table filter DAX expression for the Sales Employees table.
[EmailAddress] = USERNAME()
RLS will be applied only to the sales department users. Users in all other departments must be able to view all the data.

316. Frage
You have five sales regions. Each region is assigned a single salesperson.
You have an imported dataset that has a dynamic row-level security (RLS) role named Sales. The Sales role filters sales transaction data by salesperson.
Salespeople must see only the data from their region.
You publish the dataset to powerbi.com, set RLS role membership, and distribute the dataset and related reports to the salespeople.
A salesperson reports that she believes she should see more data.
You need to verify what data the salesperson currently sees.
What should you do?

- A. Instruct the salesperson to open the report in Microsoft Power Bl Desktop.
- B. Use the Test as role option to view data as the salesperson's user account.
- C. Filter the data in the reports to match the intended logic in the filter on the sales transaction table.
- D. Use the Test as role option to view data as the Sales role.

Antwort: B

Begründung:
Validate the roles within Power BI Desktop
* After you've created your roles, test the results of the roles within Power BI Desktop.From the Modeling tab, select View as.
A picture containing application Description automatically generatedThe View as roles window appears, where you see the roles you've created.Graphical user interface, text, application Description automatically generated
* Select a role you created, and then select OK to apply that role.The report renders the data relevant for that role.
* You can also select Other user and supply a given user.Graphical user interface, application Description automatically generated
* Select OK.The report renders based on what that user can see.

317. Frage
You maintain a Power Bl workspace that contains a supplier quality dashboard. The dashboard contains 10 card visuals, two map visuals and five bar chart visuals.
The dashboard mobile layout is shown in the exhibit. (Click the Exhibit tab.) You need to modify the dashboard mobile layout to meet the following requirements:
* Only show single-value visuals.
* Minimize scrolling.
What should you do?

- A. Move the bar chart visuals to the top of the layout Remove the map visuals. Decrease the size of the card visuals.
- B. Decrease the size of the map and bar chart visuals Move all the card visuals to the top of the layout.
- C. Decrease the size of the card visuals. Remove the map and bar chart visuals.
- D. Remove the card visual, increase the size of the map and bar chart visuals

Antwort: C

318. Frage
You are creating an analytics report that will consume data from the tables shown in the following table.
There is a relationship between the tables.
There are no reporting requirements on employeejd and employee_photo.
You need to optimize the data model

What should you configure for employeejd and employee.photo? To answer, select the appropriate options in the answer area.
