## Overcome Exam Challenges with Analytics-DA-201 Salesforce Analytics-DA-201 Exam Questions

Our Analytics-DA-201 exam questions will be the easiest access to success without accident for you. Besides, we are punctually meeting commitments to offer help on Analytics-DA-201 study materials. So there is no doubt any information you provide will be treated as strictly serious and spare you from any loss of personal loss. There are so many success examples by choosing our Analytics-DA-201 Guide quiz, so we believe you can be one of them.

### Salesforce Certified Tableau Data Analyst Sample Questions (Q59-Q64):

#### NEW QUESTION # 59

Open the Link to Book1 found on the desktop. Open Map worksheet and use Superstore data source. Create a filled map to show the distribution of total Sales by State across the United States.

#### Answer:

Explanation:

check the steps below in explanation.

Explanation:

To create a filled map to show the distribution of total Sales by State across the United States, you need to do the following steps:

- \* Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
- \* Click on the Map tab at the bottom of the workbook to open the Map worksheet. You will see a blank worksheet with no marks.
- \* Drag State from the Dimensions pane to Detail on the Marks card. This will create a map that shows each state as a mark. You may need to zoom in or out to see the whole map.
- \* Drag Sales from the Measures pane to Color on the Marks card. This will create a filled map that shows the distribution of total Sales by State across the United States. The color legend will show you the range of values and colors for Sales.
- \* Optionally, you can adjust the color scheme, transparency, size, and borders of the marks by clicking on the Color menu on the Marks card. You can also add labels, tooltips, or filters to enhance your map.

#### NEW QUESTION # 60

A Data Analyst needs to calculate the first Tuesday of each month in the data. Which set of functions should the analyst use to perform this calculation?

- A. DATETRUNC, DATEADD
- **B. DATETRUNC, DATEPART**
- C. DATEDIFF, DATEPART
- D. DATEADD, DATENAME

#### Answer: B

#### NEW QUESTION # 61

You have the following chart that sorts states by the number of products each state has purchased. Which formula should you use to include a number with the position of each state within each region?

- A. FIRST ()

- B. LOOKUP (SUM ([Quantity]))
- C. WINDOW\_SUM(SUM ([Quantity]))
- D. INDEX ()

**Answer: D**

Explanation:

The LOOKUP function is used to return the value of a specified field in a different row, which can be defined relative to the current row. In this context, it can be used to include a number with the position of each state within each region by looking up the SUM([Quantity]) in each respective position. References: The information is inferred from general Tableau knowledge as well as the following sources:

- \* Tableau Functions (Alphabetical)
- \* LOOKUP
- \* Tableau Certified Data Analyst Exam Guide

### NEW QUESTION # 62

Open the link to Book1 found on the desktop. Open Disciplines worksheet.

Filter the table to show the members of the Top10 set and the members of the Bottom10 set. There should be a total of 20 rows.

**Answer:**

Explanation:

check the steps below in explanation.

Explanation:

To filter the table to show the members of the Top10 set and the Bottom10 set, you need to do the following steps:

- \* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet.
- \* Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the disciplines, sales, and profit for each salesperson.
- \* Click on the drop-down arrow next to Salesperson on the Filters shelf. This will open a menu that allows you to filter by different criteria.
- \* Select Set from the menu. This will show you the sets that are available for the Salesperson field. You will see Top10 and Bottom10 as two sets that have been created based on the sales ranking.
- \* Check the boxes next to Top10 and Bottom10. This will filter the table to show only the members of these two sets. You can also click on All to deselect all other values.
- \* Click OK to apply the filter. You will see that the table now shows 20 rows, 10 for each set.

### NEW QUESTION # 63

You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.

You need to configure the shapes to be much larger than the line.

What should you do?

- A. Change Population to a discrete dimension
- B. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset
- C. Duplicate Population Drag the duplicate to the second Marks card and configure the size of the marks independently
- D. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository

**Answer: C**

Explanation:

To configure the shapes to be much larger than the line, you need to duplicate Population and drag it to the second Marks card. This will create a dual axis chart with two measures on one axis. You can then select Shape on one Marks card and Line on another Marks card, and adjust the size of each mark independently using the Size slider or menu. References:
