About the materials that relate to ISC CISSP exam, many websites can offer the exam materials. But these websites can't guarantee the quality of the exam dumps, meanwhile when you fail the exam, they can't also give you FULL REFUND guarantee. Compared with common reference materials, GuideTorrent ISC CISSP certification training materials is the tool that worth your use. With the help of GuideTorrent ISC CISSP Real Questions and answers, you can absolutely well prepare for the exam and pass the exam with ease. If you want to great development in IT industry, you need to take IT certification exam. If you want to pass your IT certification test successfully, it is necessary for you to use GuideTorrent exam dumps.

The CISSP certification is aimed at professionals with at least five years of experience in the field of information security, with a focus on cybersecurity. Certified Information Systems Security Professional (CISSP) certification is highly valued by employers and is often considered a prerequisite for senior-level positions in the industry. CISSP exam is designed to assess a candidate's knowledge and skills in various areas of information security, including access control, cryptography, network security, and more.

To be eligible for the ISC CISSP Certification Exam, candidates must have a minimum of five years of experience in two or more of the eight domains of the CISSP Common Body of Knowledge (CBK). Candidates who do not have the required experience can still take the exam, but will only be awarded an Associate of ISC² designation until they meet the experience requirements.

ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q148-Q153):

NEW QUESTION # 148

Which of the following questions will be addressed through the use of a Privacy Impact Assessment (PIA)?

- A. Why the information is to be collected
- B. What information is to be destroyed
- C. How the information is to be maintained

- D. Where the information is to be stored

Answer: A

NEW QUESTION # 149

The Open Web Application Security Project (OWASP) Top Ten list of risks during the past several years. The following items have been on the list for many year. What of the choices below represent threats that have been at the top of the list for many years?

- **A. SQL injection and Cross Site Scripting attacks**
- B. SQL Injection and Weak Authentication and Session Management attacks
- C. Cross Site Scripting and Security Misconfigurations attacks
- D. Cross Site Scripting and Dynamic Unicode injection attacks

Answer: A

Explanation:

SQL injection and other database related raw content injections with LDAP,

XML through dynamic SQL queries indicate the highest risks to information systems with web and database tiered systems.

Injection flaws, such as SQL, OS, and LDAP injection occur when untrusted data is sent to an interpreter as part of a command or query. The attacker's hostile data can trick the interpreter into executing unintended commands or accessing data without proper authorization.

XSS flaws occur whenever an application takes untrusted data and sends it to a web browser without proper validation or escaping. XSS allows attackers to execute scripts in the victim's browser which can hijack user sessions, deface web sites, or redirect the user to malicious sites.

Several organizations have developed frameworks for secure web development. One of the most common is the Open Web Application Security Project (OWASP). OWASP has several guides available for web application development including:

Development Guide

Code Review Guide

Testing Guide

Top Ten web application security vulnerabilities

OWASP Mobile

Given the prevalence of web-based and cloud-based solutions, OWASP provides an accessible and thorough framework with processes for web application security. The information security professional should be familiar with the "top ten" web application vulnerabilities and also how to mitigate them.

The following answers are incorrect:

Cross Site Scripting and Dynamic Unicode injection attacks

SQL Injection and Weak Authentication and Session Management attacks

Cross Site Scripting and Security Misconfigurations attacks

The following reference(s) were/was used to create this question:

Open Web Application Security Project (OWASP) Top Ten List.

NEW QUESTION # 150

Which one of the following operates at the session, transport, or network layer of the Open System Interconnection (OSI) model?

- **A. Cyclic redundancy check (CRC)**
- B. Integrity checking software
- C. Configuration Management
- D. Data at rest encryption

Answer: A

NEW QUESTION # 151

Which of the following should be used as a replacement for Telnet for secure remote login over an insecure network?

- A. SSL
- **B. SSH**
- C. S-Telnet
- D. Rlogin

Answer: B

Explanation:

SSH is a protocol for secure remote login and other secure network services over an insecure network. It consists of three major components: a transport layer protocol (providing server authentication, confidentiality, and integrity), a user authentication protocol (authenticating the client-side user to the server) and a connection protocol (multiplexing the encrypted tunnel into several logical channels). It should be used instead of Telnet, FTP, rlogin, rexec and rsh. Source: SHIREY, Robert W., RFC2828: Internet Security Glossary, may 2000. And: WALLHOFF, John, CBK#5 Cryptography (CISSP Study Guide), April 2002 (page 8).

NEW QUESTION # 152

Which one of the following is NOT a component of a CC Protection Profile?

- **A. Product-specific security requirements**
- B. Security objectives
- C. Threats against the product that must be addressed
- D. Target of Evaluation (TOE) description

Answer: A

Explanation:

The correct answer is "Product-specific security requirements". Product-specific security requirements for the product or system are contained in the Security Target (ST).

Additional items in the PP are:

TOE security environment description

Assumptions about the security aspects of the product's expected use

Organizational security policies or rules

Application notes

Rationale
