Die Fragenkataloge von ExamFragen enthalten die Lernmaterialien und Simulationsfragen zur ISTQB CTAL-TM-001 Zertifizierungsprüfung. Noch wichtiger bieten wir die originalen CTAL-TM-001 Fragen Und Antworten.

ISTQB CTAL-TM-001 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing the Team: This section of the exam measures the skills of a Test Lead and addresses the human side of test management. Candidates must demonstrate how to identify the skills required for each project, assess and develop team competence, and apply motivating leadership practices. The syllabus also covers stakeholder relationship management, understanding interests and influence, articulating the business case for testing, and balancing cost-of-quality considerations to ensure testing is properly resourced, communicated, and valued within the wider project.
Thema 2	Managing the Test Activities: This section of the exam measures the skills of a Test Manager and covers the end-to-end coordination of testing work. Candidates must demonstrate how to plan testing—defining objectives, scope, resources, schedule, and risk treatments—then how to monitor progress against those plans, control deviations through corrective actions, and conclude testing with completion reports, archival of testware, and lessons-learned sessions. The syllabus also explores tailoring test activities to project context, applying risk-based testing to focus effort where it matters most, shaping a coherent project test strategy, leading process-improvement initiatives, and selecting and managing test tools throughout their lifecycle.
Thema 3	Managing the Product: This section of the exam measures the skills of a Test Analyst and focuses on the artefacts under test and the metrics that describe them. Examinees show how to define and collect test metrics to monitor quality and progress, estimate effort and resources for different test scopes, and organize defect management workflows that fit sequential, iterative, or hybrid lifecycles. The aim is to ensure test outcomes align with objectives and inform stakeholders through clear reporting, while using estimation techniques and defect data to guide ongoing test and process improvements.

CTAL-TM-001 Prüfungsguide: ISTQB Certified Tester Advanced Level -

Test Manager & CTAL-TM-001 echter Test & CTAL-TM-001 sicherlich-zu-bestehen

Bitte glauben Sie, dass wir ExamFragen Team sehnen sich nach dem Bestehen der ISTQB CTAL-TM-001 Prüfung genauso wie Sie. Vielleicht sorgen Sie jetzt um die Prüfungsvorbereitung. Wir helfen Ihnen, die Konfidenz zu erwerben. Durch die kontinuierliche Verbesserung unseres Teams können wir mit Stolz Ihnen mitteilen, dass die ISTQB CTAL-TM-001 Prüfungsunterlagen von uns Ihnen Überraschung mitbringen können. Sie können zuerst unsere Demo kostenfrei herunterladen und schauen, welche Version der ISTQB CTAL-TM-001 Prüfungsunterlagen für Sie am passendsten ist. Danach können Sie Ihre verstärkte IT-Fähigkeit und die Freude der Erwerbung der ISTQB CTAL-TM-001 Zertifizierung erlangen!

ISTQB Certified Tester Advanced Level - Test Manager CTAL-TM-001 Prüfungsfragen mit Lösungen (Q26-Q31):

26. Frage

You are managing a project that will be using a model-based testing strategy.

Which of the following is an activity that will be needed in order to implement this strategy? [1]

- A. Select an appropriate quality standard, such as ISO 9126, to be used to guide the testing.
- B. Conduct a quality risk analysis with all affected stakeholders.
- C. Conduct operational profiling to determine the expected usage of the system.
- D. Create the test charters for the exploratory testing sessions.

Antwort: A

Begründung:

A model-based testing strategy is a testing strategy that uses models to represent the desired behavior and structure of the system under test, and to derive test cases, test data, test procedures, and test oracles¹. A model-based testing strategy requires an activity to select an appropriate quality standard, such as ISO 9126, to be used to guide the testing. A quality standard is a set of criteria, guidelines, or characteristics that define the quality attributes of a software product, such as functionality, reliability, usability, efficiency, maintainability, and portability². A quality standard can help to define the quality requirements, objectives, and measures for the system under test, and to evaluate the quality of the test results and the test process³. Therefore, option C is the correct answer. Option A is incorrect because conducting a quality risk analysis with all affected stakeholders is not an activity specific to a model-based testing strategy, but rather a general testing activity that can be applied to any testing strategy. A quality risk analysis is a process of identifying and assessing the quality risks that may affect the system under test, and prioritizing them based on their impact and likelihood⁴. Option B is incorrect because conducting operational profiling to determine the expected usage of the system is not an activity specific to a model-based testing strategy, but rather an activity related to a usage-based testing strategy. An operational profile is a statistical representation of the relative frequencies of the inputs, operations, and operating conditions of a system in its operational environment. Option D is incorrect because creating the test charters for the exploratory testing sessions is not an activity specific to a model-based testing strategy, but rather an activity related to an exploratory testing strategy. A test charter is a document that defines the scope, objective, and approach of an exploratory testing session. 27. Frage

You are a Test Manager on a new project. The software that is being created will be used to control the projectors in movie theaters. This is a time critical project because the software must be released before the Christmas holiday season which has the highest movie attendance of the year.

You have decided to implement a review process for the work products that are a part of this release to save both time and money. In order to expedite the training, you brought in a consultant to train the participants and moderators in proper review processes. Your team is enthusiastic about participating in the reviews.

The project is in the early planning stages. As the review leader, what is an appropriate activity for you to be doing at this point in the project? [3]

- A. Selecting the review items and the appropriate review type
- B. Setting a minimum number of defects to be identified in each review
- C. Gathering metrics to determine the success of the review process
- D. Calculating the ROI for the review process

Antwort: A

Begründung:

As the review leader, one of your responsibilities is to plan the review process and select the review items and the appropriate review type for each item¹. This activity should be done in the early planning stages of the project, as it will help to define the scope, objectives, and schedule of the reviews. The review items are the work products that will be reviewed, such as requirements, design, code, test cases, etc. The review type is the level of formality and rigor that will be applied to the review, such as informal review, walkthrough, technical review, or inspection². The selection of the review items and the review type should be based on factors such as the criticality, complexity, and risk of the work products, the availability and expertise of the reviewers, the time and budget constraints, and the expected benefits and outcomes of the reviews³. Therefore, option A is the correct answer. Option B is incorrect because gathering metrics to determine the success of the review process is an activity that should be done after the review process is completed, not in the early planning stages. Option C is incorrect because calculating the ROI for the review process is an activity that should be done after the review process is completed, not in the early planning stages. Option D is incorrect because setting a minimum number of defects to be identified in each review is not an appropriate activity for the review leader, as it may create a false sense of quality or pressure on the reviewers. 28. Frage

Which of the following describes the Failure Mode and Effect Analysis (FMEA) risk analysis technique? SELECT ONE OPTION

- A. FMEA is a risk mitigation process that involves determining every possible type of failure, and designing tests to cover each one.
- **B. FMEA is where quality risks, their potential causes and their likely effects are identified and then severity, priority and detection ratings are assigned.**
- C. FMEA is a quality risk management technique concerned with quality risks that arise from an incorrect understanding of the customer requirements.
- D. FMEA is an analytical process upstream, that attempts to identify the hazards for each risk.

Antwort: B

29. Frage

Mary is an external IT auditor. She is conducting a review of the system-level testing done by Greg's functional testing team. Which of the following items from Mary's assessment summary should concern Greg the most? [2]

- **A. There were Test Conditions which didn't tie back to any Business Requirement.**
- B. All the Business requirements could be traced to Test Objectives. However there was no tracing from the Business Requirements to the project's test schedule.
- C. Some of the Test Objectives could only be mapped back to a single Business Requirement.
- D. A few of the Test Objectives did not have any Test Conditions assigned to them.

Antwort: A

30. Frage

Consider the following metrics:

a. Percentage of all product risks identified during initial risk analysis
b. Average time taken by developers to fix defects for each severity level
c. Statement coverage achieved by the component test suite
d. Breakdown of defects detected by test level
How many of the five primary dimensions for test progress monitoring have been addressed by these metrics?

SELECT ONE OPTION

- **A. 0**
- B. 1
- C. 2
- D. 3

Antwort: A

31. Frage

.....

Jeder hat seinen eigenen Traum. Was ist Ihr Traum? Beförderungschance, mehr Gehalt und so weiter. Mein Traum ist es, die ISTQB CTAL-TM-001 Zertifizierungsprüfung zu bestehen. Mit diesem Zertifikat können alle Probleme gelöst werden. Jedoch ist es schwierig, diese Zertifizierung zu bestehen. Aber es ist nicht wichtig. Ich wähle die Schulungsunterlagen zur ISTQB CTAL-TM-001 Zertifizierungsprüfung von ExamFragen, weil sie meinen Wunsch erfüllen können. Wenn Sie auch IT-Traum haben, dann verwirklichen Sie den Traum schnell. Wählen Sie doch die Schulungsunterlagen zur ISTQB CTAL-TM-001 Zertifizierungsprüfung von ExamFragen, sie sind eher zuverlässig.
