Microsoft PL-600 Dump | PL-600 Practice Test Pdf

It is widely accepted that where there is a will, there is a way; so to speak, a man who has a settled purpose will surely succeed. To obtain the PL-600 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the PL-600 Exam, you need more external assistance to help yourself. With our PL-600 exam questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online.

Microsoft PL-600 certification exam is an essential credential for professionals who work with the Power Platform. It validates their knowledge and skills in designing and implementing solutions that meet business requirements, optimize performance and scalability, and ensure data security and compliance. With the increasing demand for digital transformation and automation, the PL-600 Certification can provide many benefits for professionals, including career advancement and increased earning potential.

Microsoft Power Platform Solution Architect Sample Questions (Q50-Q55):

NEW QUESTION # 50
An organization is optimizing its Microsoft Power Platform solution architecture.

The optimization needs to address the following:

Label names for option sets and multiselect option sets should be added as separate fields for reporting.

Users complain that when a case is assigned to another user, all the activities are also assigned.

Some Power BI reports based on Microsoft Dataverse data need near-real-time updating.

You need to recommend a design solution to meet these requirements.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Design
Users report that when a case is assigned to another user, all activities are also assigned.	▼
	For each activity entity relationship, set Cascading rules to Configurable Cascading and Assign to Cascade None
	Do not implement, but train users on best practices for assigning cases.
	Create a 1:N relationship between the user entity/table and the Activities table.
Some Power BI reports based on Microsoft Dataverse data require near-real-time updates.	▼
	Create Power BI reports using the Microsoft Dataverse connector.
	Implement the Data Export Service; create Power BI reports that point to Microsoft Azure SQL Database.
	Create Power BI dataflows based on the Microsoft Dataverse connector; point the Power BI report to the dataflows.

Answer:

Explanation:

Requirement	Design
Users report that when a case is assigned to another user, all activities are also assigned.	▼
	For each activity entity relationship, set Cascading rules to Configurable Cascading and Assign to Cascade None
	Do not implement, but train users on best practices for assigning cases.
	Create a 1:N relationship between the user entity/table and the Activities table.
Some Power BI reports based on Microsoft Dataverse data require near-real-time updates.	▼
	Create Power BI reports using the Microsoft Dataverse connector.
	Implement the Data Export Service; create Power BI reports that point to Microsoft Azure SQL Database.
	Create Power BI dataflows based on the Microsoft Dataverse connector; point the Power BI report to the dataflows.

NEW QUESTION # 51

You are designing the security model for a Power Platform solution.

The security model must meet the following requirements:

Restrict sharing of data between Power Automate connectors.

Ensure that environment administrators only see users who require access in the enabled user list.

You need to recommend security features for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼
	Security group
	Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list.	▼
	Security group
	Data loss prevention policy

NEW QUESTION # 52

You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	• Use only a browser-based app. • Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	• Use either a mobile or browser-based app. • Include fields for contact name, product, and order date.
Field sales	• Use only a mobile app. • Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

- A. Add new columns to an existing form. Grant all departments security roles for that form.
- B. Create one form for each department. Add all columns needed for all departments. Use business rules to hide columns.
- C. Create one form for each department Add only columns needed on the form for each department. Assign the appropriate security role to each form.
- D. Create a shared form for all departments. Add all the columns. Add column-level security to columns not needed for each department

Answer: C

NEW QUESTION # 53

A pharma company uses a proprietary system to manage its chemical experiments. The company uses Microsoft Dynamics 365 Project Operations to manage lab staff and resources.

Employees manually update Project Operations data with data from their proprietary system as needed.

Employees are not able to provide a definite schema for their data.

You need to provide a solution that will allow employees to configure their own automatic updates.

Which component should you use?

- A. Custom connectors
- B. Data gateways
- C. Microsoft Power Automate flows
- D. Dataflows

Answer: C

NEW QUESTION # 54

You need to ensure that the solution meets the data security and compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Scenario	Relationship behavior
A worker transfers to a new client company.	▼ Assign: Cascade All / Assign: Cascade None / Merge: Cascade All / Rollup View: Cascade All
A user deletes a worker's job placement history.	▼ Delete: Cascade All / Delete: Remove Link / Delete: Restrict

Answer:

Explanation:

Explanation:

Box 1: Assign: Cascade None

Scenario: Worker still records must be archived after ten years and are then removed from the main system.

Assign: The referenced table record owner is changed.

Cascade None: Do nothing.

Incorrect Answers:

Cascade All: Perform the action on all referencing table records associated with the referenced table record.

Box 2: Delete: Restrict

Scenario: Worker information must not be deleted from the system while skill and job placement history records for the worker exist in the system.

Referential, Restrict Delete: In a referential, restrict delete relationship between two tables, you can navigate to any related rows. Actions taken on the parent row will not be applied to the child row, but the parent row cannot be deleted while the child row exists. This is useful if you do not want child rows to become orphaned. This forces the user to delete all of the children before deleting the parent.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-entity-lookup This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
