

100% Pass Quiz 2026 Fantastic EDGE Valid Test EDGE-Expert Experience

P.S. Free & New EDGE-Expert dumps are available on Google Drive shared by Exams-boost: <https://drive.google.com/open?id=19zqJ7-X99BBAXP6MIANH7oa2zGsLj1wF>

The countless candidates have already passed their EDGE-Expert certification exam and they all used the real, valid, and updated Exams-boost EDGE-Expert exam questions. So, why not, take a decision right now and ace your EDGE-Expert Exam Preparation with top-notch EDGE-Expert exam questions?

At present, EDGE EDGE-Expert exam really enjoys tremendous popularity. As far as you that you have not got the certificate, do you also want to take EDGE-Expert test? EDGE EDGE-Expert certification test is really hard examination. But it doesn't mean that you cannot get high marks and pass the exam easily. What is the shortcut for your exam? Do you want to know the test taking skills? Now, I would like to tell you making use of Exams-boost EDGE-Expert Questions and answers can help you get the certificate.

>> Valid Test EDGE-Expert Experience <<

Make {Useful Study Notes} With EDGE EDGE-Expert PDF Questions

Our company has done the research of the EDGE-Expert study material for several years, and the experts and professors from our company have created the famous EDGE-Expert study materials for all customers. We believe our EDGE-Expert training braidump will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better

choice than our EDGE-Expert Preparation questions. You can free download the demo of our EDGE-Expert exam questions to check the excellent quality on our website.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q74-Q79):

NEW QUESTION # 74

A building owner tells an EDGE Auditor that water-efficient faucets are in the building's restrooms. However, the specifications on the faucets are not provided. The Auditor should:

- **A. Exclude the faucets in question from the project.**
- B. Require the building owner to replace the faucets as the audit needs the exact specification.
- C. Find a product that has the same parameters as the building owner describes and upload this for evidence.
- D. Test the faucets' flow rates to prove the water use and document the findings.

Answer: A

Explanation:

EDGE Auditors must adhere to strict protocols ensuring that all claimed measures are supported by verifiable evidence, especially during audits. The EDGE Expert and Auditor Protocols state: "If a claimed measure, such as water-efficient faucets, lacks supporting documentation like specifications or manufacturer's data sheets, the Auditor must exclude the measure from the project assessment. The Auditor is not permitted to test equipment, substitute evidence, or mandate replacements, as their role is to verify, not rectify, the Client's submission" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). Option A, exclude the faucets from the project, aligns with this protocol, as the lack of specifications prevents verification. Option B (test the faucets' flow rates) is incorrect, as Auditors cannot conduct tests: "Auditors are not responsible for testing equipment; they must rely on provided documentation" (EDGE Certification Protocol, Section 3.2:

Audit Requirements). Option C (require the owner to replace the faucets) oversteps the Auditor's role:

"Auditors cannot mandate changes to the project; they assess what is submitted" (EDGE Expert and Auditor Protocols, Section 2.3: Conflict of Interest). Option D (find a product with the same parameters) is also prohibited: "Auditors cannot substitute or assume evidence on behalf of the Client" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). Thus, the Auditor should exclude the faucets (Option A).

Reference: EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification, Section 2.3: Conflict of Interest; EDGE Certification Protocol, Section 3.2: Audit Requirements.

NEW QUESTION # 75

What are the benefits of using a pool cover that are recognized in EDGE?

- **A. Reduce both water and energy demand**
- B. Reduce chemical consumption and that of cleaning products
- C. Require less maintenance and work from employees
- D. Increase solar control and comfort

Answer: A

Explanation:

Pool covers are a water and energy efficiency measure in EDGE, particularly relevant for hotels with swimming pools. The EDGE User Guide outlines their benefits: "Pool covers reduce water demand by minimizing evaporation and energy demand by reducing the need for heating, as they retain heat in the pool.

In EDGE, the use of pool covers is recognized for its dual impact on reducing both water and energy consumption" (EDGE User Guide, Section 5.3: Additional Water Efficiency Measures). Option B, reduce both water and energy demand, directly aligns with this description. Option A (increase solar control and comfort) is incorrect, as pool covers are not recognized in EDGE for solar control or occupant comfort but for resource savings. Option C (require less maintenance and work from employees) and Option D (reduce chemical consumption and that of cleaning products) are potential secondary benefits but are not quantified or recognized in EDGE calculations, as confirmed by: "EDGE focuses on measurable water and energy savings from pool covers, not on maintenance or chemical use reductions" (EDGE Methodology Report Version 2.0, Section 4.3: Water Efficiency Calculations). Thus, Option B is the correct answer.

Reference: EDGE User Guide Version 2.1, Section 5.3: Additional Water Efficiency Measures; EDGE Methodology Report Version 2.0, Section 4.3: Water Efficiency Calculations.

NEW QUESTION # 76

Within the EDGE methodology, recycled water or rainwater harvested on site is deducted from the building's Improved Case water consumption and is reported as:

- A. Potable water
- **B. Water savings**
- C. Wastewater
- D. Water usage

Answer: B

Explanation:

The EDGE methodology quantifies the impact of water efficiency measures like rainwater harvesting and recycled water by comparing the Improved Case to the Base Case. The EDGE Methodology Report states:

"Recycled water or rainwater harvested on site reduces the building's potable water demand in the Improved Case. This reduction is deducted from the Improved Case water consumption and reported as water savings in the EDGE software, reflecting the volume of potable water no longer required due to the measure" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations). Option B, water savings, accurately reflects this reporting method, as the software highlights the reduction in potable water use as a saving. Option A (water usage) is incorrect, as this term refers to the total consumption, not the reduction:

"Water usage in EDGE refers to the total volume consumed, not the savings achieved" (EDGE User Guide, Glossary). Option C (wastewater) is unrelated, as it refers to water output, not savings: "Wastewater is water discharged from the building, not a savings metric" (EDGE User Guide, Glossary). Option D (potable water) is also incorrect, as the measure reduces potable water use, but the reported metric is the saving, not the potable water itself. "Potable water demand is an input, while savings are the output" (EDGE User Guide, Section 5.2: Water Efficiency Measures). Thus, the correct reporting is water savings (Option B).

Reference:EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations; EDGE User Guide Version 2.1, Section 5.2: Water Efficiency Measures, Glossary.

NEW QUESTION # 77

Which of the following passive design features is considered within the EDGE calculation methodology?

- **A. External shading**
- B. Efficient cooling system
- C. Renewable energy
- D. Lighting controls

Answer: A

Explanation:

Passive design features in EDGE focus on reducing energy demand through architectural and design strategies that minimize the need for active systems. The EDGE User Guide lists passive design measures included in its methodology: "Passive design features in EDGE include external shading, natural ventilation, insulation, and high-reflectivity materials, which reduce energy demand for heating, cooling, and lighting by leveraging climate and site conditions" (EDGE User Guide, Section 3.5: Passive Design Strategies).

Option B, external shading, is explicitly mentioned as a passive design feature that reduces solar heat gain, thereby lowering cooling energy needs. Option A (lighting controls) is an active measure, not passive, as it involves electrical systems. Option C (renewable energy) is an energy generation measure, not a passive design strategy, as noted in the EDGE Methodology Report: "Renewable energy systems like solar PV are treated as energy supply measures, not passive design" (EDGE Methodology Report Version 2.0, Section 5.3: Energy Measures). Option D (efficient cooling system) is also an active system, not passive. Thus, external shading (Option B) is the correct passive design feature within EDGE's calculation methodology.

Reference:EDGE User Guide Version 2.1, Section 3.5: Passive Design Strategies; EDGE Methodology Report Version 2.0, Section 5.3: Energy Measures.

NEW QUESTION # 78

Which of the following must be included in the EDGE Auditor submission for Preliminary Certification?

- A. The Chapter 5 EDGE certification protocol.
- B. The design audit site visit results verified by the EDGE Auditor.
- **C. Compliance documents for selected measures.**
- D. All of the available design data.

Answer: C

Explanation:

The EDGE Auditor's submission for Preliminary Certification (design stage) must include specific elements to support the recommendation for certification. The EDGE Certification Protocol specifies: "For Preliminary Certification, the EDGE Auditor's submission must include compliance documents for the selected measures, such as drawings, specifications, and manufacturer's data sheets, which verify that the design aligns with the self-assessment in the EDGE software. These documents are reviewed by the Certification Provider to confirm eligibility" (EDGE Certification Protocol, Section 3.2: Audit Requirements). Option C, compliance documents for selected measures, directly matches this requirement. Option A (all available design data) is too broad and not required: "Only documents directly related to the selected measures are needed, not all design data" (EDGE Certification Protocol, Section 3.2: Audit Requirements). Option B (Chapter 5 EDGE certification protocol) is incorrect, as this refers to the protocol document itself, not a submission component:

"The certification protocol is a reference, not part of the Auditor's submission" (EDGE Certification Protocol, Section 1.1: Overview). Option D (design audit site visit results) is incorrect, as site visits are not required at the design stage: "Preliminary Certification is based on a desk audit, not a site visit, which occurs at the post-construction stage" (EDGE Certification Protocol, Section 3.3: Certification Decision). Thus, compliance documents (Option C) are required in the submission.

Reference: EDGE Certification Protocol, Section 3.2: Audit Requirements, Section 3.3: Certification Decision, Section 1.1: Overview.

NEW QUESTION # 79

.....

The format name of Channel Partner Program EDGE-Expert practice test questions is EDGE PDF Questions file, desktop practice test software, and web-based practice test software. Choose the right type of Channel Partner Program Excellence in Design for Greater Efficiencies (EDGE Expert) Exam EDGE-Expert Practice Exam Questions that fit your EDGE EDGE-Expert exam preparation requirement and budget and start preparation without wasting further time.

Exam EDGE-Expert Actual Tests: <https://www.exams-boost.com/EDGE-Expert-valid-materials.html>
