HPE Aruba Networking ClearPass Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

A company is setting up a new secure network service and has configured EAP TLS with OCSP enabled. What additional step must be taken to ensure proper authentication?

- A. Enable fast reconnect for EAP-PEAP.
- B. Add the EAP TLS with OCSP enabled method to the Authentication tab of the secure network service.
- C. Disable the Override OCSP URL from Client option.

Answer: B

Explanation:

After configuring EAP-TLS with OCSP, the method must be explicitly added to the Authentication tab of the ClearPass service. This ensures that the service uses the correct authentication method and performs certificate validation, including OCSP checks, during the authentication process.

NEW QUESTION # 16

An IT manager needs to ensure that a user who has lost their smartphone can onboard a new device while blocking access to the old one. What steps should the IT manager follow to meet this need using ClearPass Onboard?

- A. Delete the user account, create a new account for the user, and onboard the new device.
- B. Block access to the old device, revoke its certificate, and issue a new certificate to the new device.
- C. Revoke the certificate of the old device, delete all metadata, and onboard the new device.

Answer: B

Explanation:

The IT manager should block access to the old device, revoke its certificate, and then issue a new certificate for the replacement device. This ensures that the lost smartphone can no longer authenticate while allowing the user to securely onboard the new device through ClearPass Onboard.

NEW QUESTION # 17

Which two actions can be configured within a ClearPass Guest self-registration workflow?

(Choose two)

Response:

- A. Requiring sponsor approval
- B. Encrypting RADIUS traffic
- C. Sending SMS with login credentials
- D. Enforcing MAC-based VLAN assignment

Answer: A,C

NEW QUESTION # 18

Which authentication method is most secure for 802.1X-based enterprise wireless networks?

Response:

- A. MAC Authentication
- B. Open Authentication
- C. Web-based Captive Portal
- D. EAP-TLS
