Take it easy before you purchase our DA0-001 quiz torrent.

CompTIA Data+ Certification Exam Sample Questions (Q214-Q219):

NEW QUESTION # 214

Given the following tables:

ID	Title
1	New CRM for Project Sales
2	ERP Implementation
3	Develop Mobile Sales Platform

ID	Name	Project_ID
1	John Doe	1
2	Lily Bush	1
3	Jane Doe	2
4	Jack Daniel	Null

Which of the following will be the dimensions from a FULL JOIN of the tables above?

- A. Two rows and three columns
- **B. Four rows and four columns**
- C. Four rows and two columns
- D. Three rows and four columns

Answer: B

Explanation:

A FULL JOIN in SQL combines all rows from two or more tables, regardless of whether a match exists. The result includes all records when there is a match in the joined tables and fills in NULLs for missing matches on either side. Given the two tables in the image, the first table has three rows, and the second table has four rows. The FULL JOIN of these tables will include all rows from both tables, resulting in four rows. Since there are three unique columns in the first table (ID, Title) and three unique columns in the second table (ID, Name, Project_ID), with the common column being ID, the resulting table will have four columns (ID, Title, Name, Project_ID).

Reference:

SQL documentation on FULL JOIN operations.

NEW QUESTION # 215

Which one of the following is NOT a common data integration tool?

- **A. XSS**
- B. APIs
- C. ELT
- D. ETL

Answer: A

Explanation:

Explanation

Cross-site Scripting (XSS) is a security vulnerability usually found in websites and/or web applications that accept user input.

XSS is a client-side vulnerability that targets other application users, while SQL injection is a server-side vulnerability that targets the application's database. How do I prevent XSS in PHP? Filter your inputs with a whitelist of allowed characters and use type hints or

type casting.

NEW QUESTION # 216

An analyst needs to know what data an organization possesses. Which of the following is the best document for the analyst to consult?

- A. Data destruction policy
- **B. Data dictionary**
- C. Data use document
- D. Data retention policy

Answer: B

Explanation:

Comprehensive and Detailed In-Depth

A data dictionary is the best resource for understanding what data an organization possesses. It provides metadata about datasets, including:

Field names and definitions

Data types (e.g., numeric, text, Boolean)

Allowed values and constraints

Relationships between different data fields

Option A (Data destruction policy): Incorrect. This document outlines procedures for securely deleting data but does not describe the data the organization currently possesses.

Option B (Data use document): Incorrect. This document explains how data should be used but does not provide a comprehensive inventory of available data.

Option C (Data dictionary): Correct. The data dictionary is a structured reference that describes all available data assets within an organization.

Option D (Data retention policy): Incorrect. This policy dictates how long data is stored but does not provide details about what data exists.

NEW QUESTION # 217

A data analyst for a media company needs to determine the most popular movie genre. Given the table below:

MovieID	Name	Genre	Actors	Rating
01	Ghost Writer	Comedy, Actions	Joshua Wellington, Susana Summons	6.5
02	Life of Suffering	Drama, Foreign, Historical	Shelly May, Rita Moralle, Ethan Warner, Sean Houser	7.2

Which of the following must be done to the Genre column before this task can be completed?

- A. Concatenate
- B. Merge
- C. Append
- **D. Delimit**

Answer: D

NEW QUESTION # 218

- A. Attribute.
- B. Table.
- C. Field.
- **D. Records.**
