

100% Pass Quiz 2026 AIGP: Accurate Exam IAPP Certified Artificial Intelligence Governance Professional Price

P.S. Free & New AIGP dumps are available on Google Drive shared by RealValidExam: <https://drive.google.com/open?id=1YQs3sXJADE61lbppaMAuMewUBRwBmcJz>

RealValidExam AIGP exam training materials can help you save a lot of time and energy, and make you yield twice the result with half effort to pass AIGP certification exam. After you purchase our AIGP exam dumps, we will also provide one year free renewal service for you. If there's any quality problem in AIGP Exam Dumps you buy or you fail AIGP certification exam, we promise to give you a full refund unconditionally.

IAPP AIGP Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life. |
| Topic 2 | <ul style="list-style-type: none">Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders. |
| Topic 3 | <ul style="list-style-type: none">Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation. |

| | |
|---------|--|
| Topic 4 | <ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices. |

IAPP AIGP Reliable Braindumps Pdf, AIGP Brain Dump Free

Compared with the education products of the same type, some users only for college students, some only provide for the use of employees, these limitations to some extent, the product covers group, while our AIGP research material absorbed the lesson, it can satisfy the different study period of different cultural levels of the needs of the audience. For example, if you are a college student, you can study and use online resources through the student column of our AIGP Study Materials, and you can choose to study in your spare time.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q116-Q121):

NEW QUESTION # 116

All of the following are penalties and enforcements outlined in the EU AI Act EXCEPT?

- A. Fines for violations of banned AI applications will be €35 million or 7% global annual turnover (whichever is higher).
- B. Rules on General Purpose AI will apply after 6 months as a specific provision.
- C. Fines for SMEs and startups will be proportionally capped.
- D. The AI Pact will act as a transitional bridge until the Regulations are fully enacted.

Answer: D

Explanation:

The EU AI Act outlines specific penalties and enforcement mechanisms to ensure compliance with its regulations. Among these, fines for violations of banned AI applications can be as high as €35 million or 7% of the global annual turnover of the offending organization, whichever is higher. Proportional caps on fines are applied to SMEs and startups to ensure fairness. General Purpose AI rules are to apply after a 6-month period as a specific provision to ensure that stakeholders have adequate time to comply. However, there is no provision for an "AI Pact" acting as a transitional bridge until the regulations are fully enacted, making option C the correct answer.

NEW QUESTION # 117

CASE STUDY

Please use the following answer the next question:

Good Values Corporation (GVC) is a U.S. educational services provider that employs teachers to create and deliver enrichment courses for high school students. GVC has learned that many of its teacher employees are using generative AI to create the enrichment courses, and that many of the students are using generative AI to complete their assignments.

In particular, GVC has learned that the teachers they employ used open source large language models ("LLM") to develop an online tool that customizes study questions for individual students. GVC has also discovered that an art teacher has expressly incorporated the use of generative AI into the curriculum to enable students to use prompts to create digital art.

GVC has started to investigate these practices and develop a process to monitor any use of generative AI, including by teachers and students, going forward.

Which of the following risks should be of the highest concern to individual teachers using generative AI to ensure students learn the course material?

- A. Copyright infringement.
- B. Technical complexity.
- C. Financial cost.

- D. Model accuracy.

Answer: D

Explanation:

The highest concern for individual teachers using generative AI to ensure students learn the course material is model accuracy. Ensuring that the AI-generated content is accurate and relevant to the curriculum is crucial for effective learning. If the AI model produces inaccurate or irrelevant content, it can mislead students and hinder their understanding of the subject matter.

Reference: According to the AIGP Body of Knowledge, one of the core risks posed by AI systems is the accuracy of the data and models used. Ensuring the accuracy of AI-generated content is essential for maintaining the integrity of the educational material and achieving the desired learning outcomes.

NEW QUESTION # 118

Under the NIST AI Risk Management Framework, all of the following are defined as characteristics of trustworthy AI EXCEPT?

- A. Accountable and Transparent.
- B. Secure and Resilient.
- C. Tested and Effective.
- D. Explainable and Interpretable.

Answer: D

Explanation:

The NIST AI Risk Management Framework outlines several characteristics of trustworthy AI, including being secure and resilient, explainable and interpretable, and accountable and transparent. While being tested and effective is important, it is not explicitly listed as a characteristic of trustworthy AI in the NIST framework.

The focus is more on the system's ability to function safely, securely, and transparently in a way that stakeholders can understand and trust. Reference: AIGP Body of Knowledge, NIST AI RMF section.

NEW QUESTION # 119

CASE STUDY

A company is considering the procurement of an AI system designed to enhance the security of IT infrastructure. The AI system analyzes how users type on their laptops, including typing speed, rhythm and pressure, to create a unique user profile. This data is then used to authenticate users and ensure that only authorized personnel can access sensitive resources.

All of the following are obligations of the company as a data controller when implementing its AI system EXCEPT?

- A. Ensuring that third-party processors are based in the same country as the company
- B. Implementing technical and organizational measures
- C. Allowing data subject access requests (DSARs)
- D. Conducting a Data Protection Impact Assessment (DPIA) / Privacy Impact Assessment (PIA)

Answer: A

Explanation:

The correct answer is A. While location of processors may have implications (such as for data transfers under GDPR), there is no absolute requirement that third-party processors be based in the same country.

From the AI Governance in Practice Report 2025 and ILT Guide:

"Data controllers are responsible for ensuring that third-party processors have adequate protections, but not necessarily that they reside in the same jurisdiction. What is required is legal safeguards (e.g., SCCs) for international transfers, not same-country location." In contrast, DPIAs, DSARs, and implementation of technical/organizational safeguards are explicitly required under GDPR and responsible AI frameworks.

NEW QUESTION # 120

According to the Singapore Model AI Governance Framework, all of the following are recommended measures to promote the responsible use of AI EXCEPT?

- A. Establishing communications and collaboration among stakeholders.
- B. Adapting the existing governance structure algorithmic decision-making.

- C. Determining the level of human involvement in algorithmic decision-making.
- **D. Employing human-over-the-loop protocols for high-risk systems.**

Answer: D

Explanation:

The Singapore Model AI Governance Framework recommends several measures to promote the responsible use of AI, such as determining the level of human involvement in decision-making, adapting governance structures, and establishing communications and collaboration among stakeholders. However, employing human-over-the-loop protocols is not specifically mentioned in this framework. The focus is more on integrating human oversight appropriately within the decision-making process rather than exclusively employing such protocols. Reference: AIGP Body of Knowledge, section on AI governance frameworks.

NEW QUESTION # 121

.....

Are you still worried about the exam? Don't worry! Our AIGP exam torrent can help you overcome this stumbling block during your working or learning process. Under the instruction of our AIGP test prep, you are able to finish your task in a very short time and pass the exam without mistakes to obtain the IAPP certificate. We will tailor services to different individuals and help them take part in their aimed exams after only 20-30 hours practice and training. Moreover for all your personal information, we will offer protection acts to avoid leakage and virus intrusion so as to guarantee the security of your privacy. What is most important is that when you make a payment for our AIGP Quiz torrent, you will possess this product in 5-10 minutes and enjoy the pleasure and satisfaction of your study time.
