## Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q67-Q72):

### NEW QUESTION # 67

What are two reasons to select OTV as the DCI solution to connect multisite topologies? (Choose two.)

- A. It is an open standard.
- B. It constrains HSRP hello messages to each data center.
- C. It propagates hosts reachability without support of traffic flooding.
- D. It extends the spanning tree between data centers.
- E. Layer 3 failures do not propagate beyond the OTV edge device.

**Answer: B,C**

Explanation:

OTV introduces the concept of "MAC routing" [...] it is justified by the need to limit flooding of Layer 2 traffic across the transport infrastructure.

The last capability introduced by OTV is to filter First Hop Redundancy Protocol (FHRP-HSRP, VRRP, and so on) messages across the logical overlay.

### NEW QUESTION # 68

An engineer must connect a storage array directly to an existing Cisco UCS Fabric Interconnect. The customer requires a solution that provides IP-based storage that does not need to be connected through an external switch. Also, the operations team wants to have the ability to have direct access to the files stored on the storage array from their Linux hosts. Which storage technology meets these requirements?

- A. SAN
- B. NFS
- C. FCoE
- D. SCSI

**Answer: B**

### NEW QUESTION # 69

What are two characteristics of VRF-Lite on the Cisco NX-OS platform? (Choose two.)

- A. VRF-Lite interfaces support MPLS.
- B. Overlapping IP addresses are permitted on different VRFs.
- C. VRF-Lite interfaces can be Layer 2.
- D. Interfaces that belong to VRFs can be physical or logical.
- E. Layer 3 interfaces can belong to multiple VRFs.

**Answer: B,D**

Explanation:

VRF can be either physical, such as Ethernet ports, or logical, such as VLAN SVIs, but a Layer 3 interface cannot belong to more than one VRF at any time.

With the VRF-lite feature, the switch supports multiple VRFs in customer edge (CE) switches.

VRF-lite allows a service provider to support two or more Virtual Private Networks (VPNs) with overlapping IP addresses using one interface.

#### NEW QUESTION # 70

An engineer installs a B-Series server in a Cisco UCS chassis that contains a pair of UCS-IOM-2208XP I/O modules. The full bandwidth of the I/O module must be utilized.

Which two elements should be used in this environment? (Choose two.)

- A. Cisco UCS M81KR
- B. Cisco UCS VIC 1225
- C. Cisco UCS VIC 1280
- D. eight twinax cables from each I/O module to each fabric interconnect
- E. four twinax cables from each I/O module to each fabric interconnect

Answer: C,D

#### NEW QUESTION # 71

What is the disadvantage of asynchronous storage replication as compared to synchronous storage replication in a disaster recovery design?

- A. potential data loss
- B. distance limitations
- C. specific backup requirements
- D. reduction in application performance

Answer: A
