□

NEW QUESTION # 50

Which Feature would an administrator setup to help their sales team view all provider related to a specific facility?

- A. Provider Search
- B. Provider Cards
- **C. Practitioner Relationship**
- D. Provider Relationship

Answer: C

NEW QUESTION # 51

Which three medication related FHIR resources are supported in the new data model of Health cloud (Choose Three)

- **A. Dosage**
- **B. Medical Request**
- **C. Medication**
- D. Medication Dispense
- E. MedicalAdministration

Answer: A,B,C

NEW QUESTION # 52

During a sprint demo, a customer wants to update fields in the UI on the Patient Medication Manager component.

Which two objects is a consultant able to add and/or remove fields from?

Choose 2 answers

- **A. Medication Request**
- **B. Medication Details**
- C. Medication Dispense
- D. Medication Strength

Answer: A,B

Explanation:

The Patient Medication Manager component in Salesforce Health Cloud surfaces data from FHIR-aligned medication objects.

When customers request field updates on this UI component, the consultant can configure fields from the underlying objects.

A . Medication Details → Stores key information about a patient's medications. Fields from this object can be exposed or customized on the Patient Medication Manager.

C . Medication Request → Represents a provider's request or order for a medication. Fields from this object are also available to configure in the Patient Medication Manager.

Together, these two objects form the basis of what's displayed and editable in the Patient Medication Manager.

Why not the others?

B . Medication Dispense - Tracks when and how a medication was dispensed. It is not directly configurable for field-level updates in the Patient Medication Manager component.

D . Medication Strength - Captures clinical details about dosage strength, but it isn't one of the configurable objects in the Patient Medication Manager UI.

Salesforce Health Cloud Reference:

* Salesforce Health Cloud Medication Management:

"The Patient Medication Manager component displays information from Medication Details and Medication Request objects. Administrators can add or remove fields from these objects to tailor the component."

NEW QUESTION # 53

Which permission set is needed to grant users read access to health insurance records and also create, read and update access to Utilization Management records?

- A. HC Permission set license
- **B. HC Utilization Management Permission Set**
- C. HC Foundation permission set
- D. The Health Cloud Member Services Permission Set

Answer: B
