Salesforce Certified Data Architect 認定 Data-Architect 試験問題 (Q145-Q150):

質問 # 145

A Customer is migrating 10 million order and 30 million order lines into Salesforce using Bulk API. The Engineer is experiencing time-out errors or long delays querying parents order IDs in Salesforce before importing related order line items. What is the recommended solution?

- A. Query only indexed ID field values on the imported order to import related order lines.

- B. Leverage an External ID from source system orders to import related order lines.
- C. Leverage Batch Apex to update order ID on related order lines after import.
- D. Leverage a sequence of numbers on the imported orders to import related order lines.

正解: B

質問 # 146

Universal Containers (UC) has deployed Salesforce to manage Marketing, Sales, and Support efforts in a multi-system ERP environment. After reaching the limits of native reports & dashboards, UC leadership is looking to understand what options can be used to provide more analytical insights. What two approaches should an architect recommend? Choose 2 answers.

- A. Wave Analytics
- B. Setup Audit Trails
- C. AppExchange Apps
- D. Weekly Snapshots

正解: A、C

質問 # 147

Universal Containers (UC) has a complex system landscape and is implementing a data governance program for the first time. Which two first steps would be appropriate for UC to initiate an assessment of data architecture? Choose 2 answers.

- A. Engage with database administrators to assess current database performance metrics.
- B. Engage with business units and IT to assess current operational systems and data models.
- C. Engage with executive sponsorship to assess enterprise data strategy and goals.
- D. Engage with IT program managers to assess current velocity of projects in the pipeline.

正解: B、C

解説:

Engaging with executive sponsorship to assess enterprise data strategy and goals, and engaging with business units and IT to assess current operational systems and data models are two first steps that would be appropriate for UC to initiate an assessment of data architecture. These steps will help to understand the current state of data management, the business needs and expectations, and the gaps and opportunities for improvement.

Engaging with IT program managers to assess current velocity of projects in the pipeline, and engaging with database administrators to assess current database performance metrics are not relevant steps for assessing data architecture, as they are more related to project management and technical performance.

質問 # 148

Universal Containers (UC) is transitioning from Classic to Lightning Experience.

What does UC need to do to ensure users have access to its notices and attachments in Lightning Experience?

- A. Manually upload Attachments in Lightning Experience.
- B. Manually upload Notes in Lightning Experience.
- C. Add Notes and Attachments Related List to page Layout in Lightning Experience.
- D. Migrate Notes and Attachment to Enhanced Notes and Files a migration tool.

正解: C

質問 # 149

Universal Container (US) is replacing a home-grown CRM solution with Salesforce. UC has decided to migrate operational (Open and active) records to Salesforce, while keeping historical records in legacy system. UC would like historical records to be available in Salesforce on an as-needed basis.

Which solution should a data architect recommend to meet business requirement?

- A. Bring all data Salesforce, and delete it after a year.

- 正解: C

Mashups are useful when you want to display large amounts of read-only data that is stored outside of Salesforce." Therefore, a data architect should recommend this solution to meet the business requirement of UC.
