This free PCNSE exam questions demo download facility is available in all three PCNSE exam dumps formats.

## Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which three function are found on the dataplane of a PA-5050? (Choose three)

- A. Management
- B. Signature Match
- C. Dynamic routing
- D. Network Processing
- E. Protocol Decoder

**Answer: B,C,D**

Explanation:

In these devices, dataplane zero, or dp0 for short, functions as the master dataplane and determines which dataplane will be used as the session owner that is responsible for processing and inspection.

The data plane provides all data processing and security detection and enforcement, including:

\* (B) All networking connectivity, packet forwarding, switching, routing, and network address translation

\* Application identification, using the content of the applications, not just port or protocol

\* SSL forward proxy, including decryption and re-encryption

\* Policy lookups to determine what security policy to enforce and what actions to take, including scanning for threats, logging, and packet marking

\* Application decoding, threat scanning for all types of threats and threat prevention

\* Logging, with all logs sent to the control plane for processing and storage E: The following diagram depicts both the hardware and software architecture of the next- generation firewall

Incorrect Answers:

C: Management is done in the control plane.

### NEW QUESTION # 116

After Migrating from an ASA firewall to a Palo Alto Networks Firewall, the VPN connection between a remote network and the Palo Alto Networks Firewall is not establishing correctly.

The following entry is appearing in the logs:

Pfs group mismatched: my:0 peer:2

Which setting should be changed on the Palo Alto Networks Firewall to resolve this error message?

- A. Update the IKE Crypto profile for the Vendor IKE gateway from no pfs to group2.
- B. Update- the IPsec Crypto profile for the Vendor IPsec Tunnel from group2 to no-pfs.

- C. Update the IKE Crypto profile for the Vendor IKE gateway from group2 to no pfs
- D. Update the IPSec Crypto profile for the Vendor IPSec Tunnel from no-pfs to group2.

**Answer: D**

#### NEW QUESTION # 117

An engineer is tasked with enabling SSL decryption across the environment. What are three valid parameters of an SSL Decryption policy? (Choose three.)

- A. URL categories
- B. App-ID
- C. GlobalProtect HIP
- D. source users
- E. source and destination IP addresses

**Answer: A,D,E**

#### NEW QUESTION # 118

A customer is replacing their legacy remote access VPN solution. The current solution is in place to secure only internet egress for the connected clients. Prisma Access has been selected to replace the current remote access VPN solution. During onboarding, the following options and licenses were selected and enabled:

- Prisma Access for Remote Networks 300Mbps
- Prisma Access for Mobile Users 1500 Users
- Cortex Data Lake 2TB
- Trusted Zones trust
- Untrusted Zones untrust
- Parent Device Group shared

How can you configure Prisma Access to provide the same level of access as the current VPN solution?

- A. Configure mobile users with trust-to-untrust Security policy rules to allow the desired traffic outbound to the internet
- B. Configure remote networks with a service connection and trust-to-untrust Security policy rules to allow the desired traffic outbound to the internet
- C. Configure remote networks with trust-to-trust Security policy rules to allow the desired traffic outbound to the internet
- D. Configure mobile users with a service connection and trust-to-trust Security policy rules to allow the desired traffic outbound to the internet

**Answer: A**

Explanation:

Explanation

To provide the same level of access as the current VPN solution, which is to secure only Internet egress for the connected clients, you can configure mobile users with trust-to-untrust Security policy rules to allow the desired traffic outbound to the Internet. This way, the mobile users will be assigned an IP address from a pool that belongs to the trust zone, and they will be able to access the Internet through Prisma Access using a gateway that belongs to the untrust zone1. You do not need to configure a service connection for this scenario, as a service connection is used to enable access between mobile users and remote networks or private apps2

. You also do not need to configure trust-to-trust Security policy rules, as they are used to enable access between mobile users and other trusted resources

### NEW QUESTION # 119

A network administrator is trying to prevent domain username and password submissions to phishing sites on some allowed URL categories Which set of steps does the administrator need to take in the URL Filtering profile to prevent credential phishing on the firewall?

- A. Choose the URL categories on Site Access column and set action to block Click the User credential Detection tab and select IP User Mapping Commit
- **B. Choose the URL categories in the User Credential Submission column and set action to block Select the User credential Detection tab and select use IP User Mapping Commit**
- C. Choose the URL categories in the User Credential Submission column and set action to block Select the URL filtering settings and enable Domain Credential Filter Commit
- D. Choose the URL categories in the User Credential Submission column and set action to block Select the User credential Detection tab and select Use Domain Credential Filter Commit

**Answer: B**

### NEW QUESTION # 120
