Our ISO-IEC-27001-Lead-Implementer test guide has become more and more popular in the world. Of course, if you decide to buy our ISO-IEC-27001-Lead-Implementer latest question, we can make sure that it will be very easy for you to pass your exam and get the certification in a short time, first, you just need 5-10 minutes can receive ISO-IEC-27001-Lead-Implementer Exam Torrent that you can learn and practice it. Then you just need 20-30 hours to practice our ISO-IEC-27001-Lead-Implementer study materials that you can attend your ISO-IEC-27001-Lead-Implementer exam. It is really spend your little time and energy.

TestKingFree are supposed to help you pass the exam smoothly. Do not worry about channels to the best PECB Certified ISO/IEC 27001 Lead Implementer Exam ISO-IEC-27001-Lead-Implementer study materials because we are the exactly best vendor in this field for more than ten years. And so many exam candidates admire our generosity of the PECB ISO-IEC-27001-Lead-Implementer Practice Questions offering help for them. Up to now, no one has ever challenged our leading position of this area.

100% Pass Quiz 2026 Pass-Sure PECB Reliable ISO-IEC-27001-Lead-Implementer Real Exam

There are some prominent features that are making the ISO-IEC-27001-Lead-Implementer exam dumps the first choice of ISO-IEC-27001-Lead-Implementer certification exam candidates. The prominent features are real and verified PECB Certified ISO/IEC 27001 Lead Implementer Exam exam questions, availability of ISO-IEC-27001-Lead-Implementer exam dumps in three different formats, affordable price, 1 year free updated ISO-IEC-27001-Lead-Implementer Exam Questions download facility, and 100 percent PECB ISO-IEC-27001-Lead-Implementer exam passing money back guarantee. We are quite confident that all these ISO-IEC-27001-Lead-Implementer exam dumps feature you will not find anywhere. Just download the PECB ISO-IEC-27001-Lead-Implementer Certification Exams and start this journey right now.

PECB ISO-IEC-27001-Lead-Implementer exam is a certification program offered by the Professional Evaluation and Certification Board (PECB) that focuses on the implementation of information security management systems (ISMS) based on the ISO/IEC 27001 standard. PECB Certified ISO/IEC 27001 Lead Implementer Exam certification is designed for individuals who are responsible for implementing and maintaining information security management systems within an organization. ISO-IEC-27001-Lead-Implementer exam tests the candidate's knowledge and expertise in implementing and managing an ISMS, risk assessment, and compliance with legal and regulatory requirements. The PECB ISO-IEC-27001-Lead-Implementer certification is a globally recognized credential that demonstrates the candidate's proficiency in implementing and managing an ISMS in accordance with the ISO/IEC 27001 standard.

To prepare for the PECB ISO-IEC-27001-Lead-Implementer certification exam, candidates can attend training courses offered by PECB or other authorized training providers. They can also study the ISO/IEC 27001 standard and related materials, such as the ISO/IEC 27002 standard, and practice implementing and managing an ISMS in a real-world setting. By passing the exam and obtaining the PECB Certified ISO/IEC 27001 Lead Implementer certification, professionals can demonstrate their expertise and commitment to information security management.

PECB ISO-IEC-27001-Lead-Implementer Exam is a certification that verifies the skills and knowledge of professionals in implementing and managing information security management systems based on the ISO/IEC 27001 standard. PECB Certified ISO/IEC 27001 Lead Implementer Exam certification is offered by the Professional Evaluation and Certification Board (PECB), a global provider of training, examination, and certification services in the fields of information technology, quality management, and other related areas. PECB Certified ISO/IEC 27001 Lead Implementer Exam certification exam is designed for professionals who are responsible for implementing and managing information security management systems in organizations of all sizes and types.

PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q172-Q177):

NEW QUESTION # 172

What action should an organization take to ensure the security of information when it is transferred or treated by an external party?

- **A. Include security clauses in a contractual agreement with the external party**
- B. Rely on external parties to implement their own security measures
- C. Exclude external parties from the ISMS scope to limit risk exposure

Answer: A

NEW QUESTION # 173

Which approach should organizations use to implement an ISMS based on ISO/IEC 27001?

- A. Only the approach provided by the standard
- B. Any approach that enables the ISMS implementation within the 12month period
- **C. An approach that is suitable for organization's scope**

Answer: C

Explanation:

Explanation

ISO/IEC 27001:2022 does not prescribe a specific approach for implementing an ISMS, but rather provides a set of requirements and guidelines that can be adapted to the organization's context, scope, and objectives.

Therefore, organizations can use any approach that is suitable for their scope, as long as it meets the requirements of the standard and enables the achievement of the intended outcomes of the ISMS. The approach should also consider the needs and expectations of the interested parties, the risks and opportunities related to information security, and the legal and regulatory obligations of the organization.

NEW QUESTION # 174

According to scenario 2. Beauty has reviewed all user access rights. What type of control is this?

- A. Legal and technical
- B. Corrective and managerial
- **C. Detective and administrative**

Answer: C

NEW QUESTION # 175

Scenario 3: Socket Inc is a telecommunications company offering mainly wireless products and services. It uses MongoDB, a document model database that offers high availability, scalability, and flexibility.

Last month, Socket Inc. reported an information security incident. A group of hackers compromised its MongoDB database,

because the database administrators did not change its default settings, leaving it without a password and publicly accessible. Fortunately, Socket Inc. performed regular information backups in their MongoDB database, so no information was lost during the incident. In addition, a syslog server allowed Socket Inc. to centralize all logs in one server. The company found out that no persistent backdoor was placed and that the attack was not initiated from an employee inside the company by reviewing the event logs that record user faults and exceptions.

To prevent similar incidents in the future, Socket Inc. decided to use an access control system that grants access to authorized personnel only. The company also implemented a control in order to define and implement rules for the effective use of cryptography, including cryptographic key management, to protect the database from unauthorized access. The implementation was based on all relevant agreements, legislation, and regulations, and the information classification scheme. To improve security and reduce the administrative efforts, network segregation using VPNs was proposed.

Lastly, Socket Inc. implemented a new system to maintain, collect, and analyze information related to information security threats, and integrate information security into project management.

Based on scenario 3, what would help Socket Inc. address similar information security incidents in the future?

- A. Using the access control system to ensure that only authorized personnel is granted access
- **B. Using cryptographic keys to protect the database from unauthorized access**
- C. Using the MongoDB database with the default settings

Answer: B

Explanation:

In Scenario 3, the measure that would help Socket Inc. address similar information security incidents in the future is "B. Using cryptographic keys to protect the database from unauthorized access." Implementing cryptographic controls, including cryptographic key management, is a proactive measure to secure the data in the MongoDB database against unauthorized access. It ensures that even if attackers gain access to the database, they cannot read or misuse the data without the appropriate cryptographic keys. This approach aligns with best practices for securing sensitive data and is part of a comprehensive security strategy.

NEW QUESTION # 176

According to scenario 1, to detect (1) _____, Antiques should have implemented (2)

- A. (1) Technical vulnerabilities. (2) network intrusions
- **B. (1) Intrusions on networks. (?) an intrusion detection system**
- C. (1) Patches. (2) an access control software

Answer: B

NEW QUESTION # 177

.....

The PECB Certified ISO/IEC 27001 Lead Implementer Exam (ISO-IEC-27001-Lead-Implementer) certification exam is one of the top-rated career advancement certifications in the market. This ISO-IEC-27001-Lead-Implementer exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the ISO-IEC-27001-Lead-Implementer Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of PECB certified professional community.
