P.S. Free 2026 Salesforce Analytics-Arch-201 dumps are available on Google Drive shared by ExamBoosts:  
<https://drive.google.com/open?id=1BtVqQyLBOsRYJ-NxOzUaYLoYm5xvlsuK>

We can conclude this post with the fact that to clear the Salesforce Certified Tableau Architect (Analytics-Arch-201) certification exam, you need to be prepared before, study well, and practice. You cannot rely on your luck to score well in the Analytics-Arch-201 exam. You have to prepare with ExamBoosts real Salesforce Analytics-Arch-201 Exam Questions to clear the Analytics-Arch-201 test in one go. You will also receive up to 365 days of free updates and Analytics-Arch-201 dumps pdf demos. Purchase the Salesforce Certified Tableau Architect (Analytics-Arch-201) practice tests today and get these amazing offers.

Our Analytics-Arch-201 useful test guide materials present the most important information to the clients in the simplest way so our clients need little time and energy to learn our Analytics-Arch-201 useful test guide. The clients only need 20-30 hours to learn and prepare for the test. For those people who are busy in their jobs, learning or other things this is a good news because they needn't worry too much that they don't have enough time to prepare for the test and can leisurely do their main things and spare little time to learn our Analytics-Arch-201 study practice guide. So it is a great advantage of our Analytics-Arch-201 exam materials and a great convenience for the clients.

## Book Analytics-Arch-201 Free, Analytics-Arch-201 Online Bootcamps

Studying with updated Analytics-Arch-201 practice questions improve your skills of clearing the certification test in a short time. ExamBoosts makes it easy for you to prepare successfully for the Analytics-Arch-201 Questions in a short time with Analytics-

## Salesforce Certified Tableau Architect Sample Questions (Q97-Q102):

### NEW QUESTION # 97

In a Tableau Server deployment using a load balancer, what configuration is necessary to ensure SSL (Secure Socket Layer) encryption is effectively implemented?

- A. SSL termination must be configured at the load balancer level
- B. A single SSL certificate must be shared between the load balancer and the Tableau Server
- C. SSL certificates should be installed on each individual Tableau Server node
- D. The load balancer should be configured to bypass SSL for internal network traffic

**Answer: A**

Explanation:

SSL termination must be configured at the load balancer level. Configuring SSL termination at the load balancer level is essential in a Tableau Server deployment. This setup enables the load balancer to decrypt incoming SSL traffic and then distribute the requests across the server nodes. This approach simplifies SSL management and ensures secure communication between clients and the load balancer. Option B is incorrect because installing SSL certificates on each node is redundant and less efficient when SSL termination is handled at the load balancer. Option C is incorrect as bypassing SSL for internal traffic can compromise security, particularly for sensitive data. Option D is incorrect because sharing a single SSL certificate between the load balancer and Tableau Server is not a standard or recommended practice; the focus should be on SSL termination at the load balancer.

### NEW QUESTION # 98

When troubleshooting an issue in Tableau Server, you need to locate and interpret installation logs. Where are these logs typically found, and what information do they primarily provide?

- A. In the database server, providing information about database queries
- B. In the operating system's event viewer, showing system-level events
- C. In the Tableau Server logs directory, containing details on installation processes and errors
- D. In the Tableau Server data directory, offering details on user interactions

**Answer: C**

Explanation:

In the Tableau Server logs directory, containing details on installation processes and errors. The installation logs for Tableau Server are typically located in the Tableau Server logs directory. These logs provide detailed information on the installation process, including any errors or issues that may have occurred. This is essential for troubleshooting installation-related problems. Option A is incorrect because the database server logs focus on database queries and do not provide detailed information about the Tableau Server installation process. Option B is incorrect as the data directory primarily contains data related to user interactions, not installation logs. Option D is incorrect because the operating system's event viewer captures system-level events, which may not provide the detailed information specific to Tableau Server's installation processes.

### NEW QUESTION # 99

In the context of SSL encryption for Tableau Server, what is an important consideration when renewing an SSL certificate?

- A. Switching to a different SSL protocol version during renewal for enhanced security
- B. Renewing the certificate with the exact same specifications as the old one to avoid configuration changes
- C. Ensuring that the new SSL certificate is renewed and installed before the expiration of the current certificate
- D. Temporarily disabling SSL encryption while waiting for the new certificate to be issued

**Answer: C**

Explanation:

Ensuring that the new SSL certificate is renewed and installed before the expiration of the current certificate. When renewing an SSL certificate for Tableau Server, it is important to ensure that the new certificate is renewed and installed before the current one expires. This continuity prevents any interruptions in SSL encryption and maintains secure communications without any downtime or security warnings due to an expired certificate. Option A is incorrect because the new certificate does not necessarily need to have

the exact same specifications; updates or changes might be beneficial. Option C is incorrect as switching SSL protocol versions during renewal should be done based on security needs and compatibility, not as a routine process. Option D is incorrect because disabling SSL encryption, even temporarily, can expose the server to security risks.

#### NEW QUESTION # 100

Upon interpreting observability data from Tableau Server, you notice a pattern of high CPU usage coinciding with specific times of the day. What is the best course of action based on this observation?

- A. Limit user access to the server during periods of high CPU usage
- **B. Investigate scheduled activities, such as extract refreshes or subscriptions, occurring during those times**
- C. Immediately upgrade the server hardware to increase CPU capacity
- D. Ignore the pattern as occasional spikes in CPU usage are normal

**Answer: B**

Explanation:

Investigate scheduled activities, such as extract refreshes or subscriptions, occurring during those times When high CPU usage is observed at specific times of the day, the best initial action is to investigate scheduled server activities, such as extract refreshes or report subscriptions, that might be occurring during those times. Understanding the cause of the CPU spikes can inform more targeted actions, such as rescheduling these activities or optimizing them for better re-source usage. Option A is incorrect because upgrading hardware should be considered only after assessing and addressing the causes of high CPU usage within the current setup. Option C is incorrect as limiting user access is a reactive measure that does not address the root cause of the high CPU usage. Option D is incorrect because ignoring the pattern might lead to overlooking potential performance issues that could impact server stability and user experience.

#### NEW QUESTION # 101

In preparing for a Tableau deployment in an educational institution, the IT team must evaluate user role distributions among faculty, administrative staff, and students. Which of the following strategies best aligns with this requirement?

- A. Assign the same "Explorer" role to all users to facilitate uniform access and usage
- B. Provide "Creator" roles to students, "Explorer" roles to faculty, and "Viewer" roles to administrative staff
- **C. Distribute roles based on individual data usage needs and responsibilities within the institution**
- D. Assign "Creator" roles to administrative staff, "Explorer" roles to students, and "Viewer" roles to faculty

**Answer: C**

Explanation:

Distribute roles based on individual data usage needs and responsibilities within the institution This strategy allows for a tailored approach that considers the specific requirements and data interaction levels of different groups within the educational institution, ensuring effective and secure use of Tableau. Option A is incorrect because it assumes students need the most comprehensive access, which may not align with their actual requirements or data security policies. Option B is incorrect as it may not accurately reflect the data analysis and creation needs of administrative staff and faculty. Option D is incorrect because it does not account for the different levels of data interaction and analysis needs across various user groups in the institution.

#### NEW QUESTION # 102

.....

Our Analytics-Arch-201 exam material boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our Analytics-Arch-201 exam simulation is compiled based on the resources from the authorized experts' diligent working and the real exam and confer to the past years' exam papers thus they are very practical. The content of the questions and answers of Analytics-Arch-201 Exam Questions is refined and focuses on the most important information. To let the clients be familiar with the atmosphere and pace of the real Analytics-Arch-201 exam we provide the function of stimulating the exam.

**Book Analytics-Arch-201 Free:** <https://www.examboosts.com/Salesforce/Analytics-Arch-201-practice-exam-dumps.html>

So even if you are busy in working, spend the idle time on our exam materials regularly still can pass the Salesforce Book Analytics-Arch-201 Free Book Analytics-Arch-201 Free - Salesforce Certified Tableau Architect exam successfully, Salesforce Analytics-
