Before you decide to buy our study materials, you can firstly look at the introduction of our AP-212 Exam Practice materials on our web. Or you can free download the demo of our AP-212 exam questions to have a check on the quality.

Salesforce Loyalty Management Accredited Professional Sample Questions (Q15-Q20):

NEW QUESTION # 15

Universal Containers (UC) has defined a points-based Loyalty Program, and the Loyalty members must receive an email with the point balance every time it is updated.

What should the Salesforce Administrator set up to enable a real-time currency model?

- A. Non-Qualifying Points updates happen in real-time by default
- B. Create a Flow to update the Points Balance field
- **C. Enable Real-Time Update of Qualifying Points Balance**
- D. Enable Real-Time Update of Non-Qualifying Points Balance

Answer: C

Explanation:

To enable real-time updates of point balances in a points-based Loyalty Program, the Salesforce Administrator should:

* Option B "Enable Real-Time Update of Qualifying Points Balance." This feature ensures that any changes to a member's qualifying points balance are immediately reflected, allowing for real-time communication of point updates.

NEW QUESTION # 16

A company has recently rolled out a Loyalty Program in the production environment in the Monitor Workflow Services from Setup, the System Administrator noticed that all the Loyalty automations that have Data Processing Engine actions are failing, but the rest of the loyalty automations are working correctly.

What is the root cause of this?

- A. The Default Workflow User is missing the Loyalty Management permission set license
- B. The Default Workflow User is missing the Data Pipelines Base User permission set license
- C. The Default Workflow User is missing the CLAAalytics Base User permission set license
- **D. The Default Workflow User is missing the CLAAalytics Base User permission set license**

Answer: D

Explanation:

The root cause of the issue where all the Loyalty automations that have Data Processing Engine actions are failing is because the Default Workflow User is missing the CLAAalytics Base User permission set license (B). This permission set license is essential for the Default Workflow User to execute actions related to the Data Processing Engine within Salesforce Loyalty Management. Without this permission set, the user lacks the necessary access rights to run these specific automations, leading to the observed failures. Salesforce documentation on Loyalty Management would provide guidance on setting up and troubleshooting automations, including the necessary permission sets for different actions.

NEW QUESTION # 17

Which Loyalty Management Key Component should be used to quickly aggregate a high volume of data spread across many Loyalty Management objects?

- A. Batch Management
- B. Decision Table
- **C. Data Processing Engine**
- D. Quick Actions

Answer: C

Explanation:

The Data Processing Engine is the key component in Salesforce Loyalty Management for quickly aggregating a high volume of data spread across many Loyalty Management objects. It is designed to efficiently process and manage large datasets, enabling the aggregation, analysis, and application of loyalty data across the platform. This capability is essential for handling the complex data structures and high transaction volumes typical of loyalty programs, ensuring accurate and up-to-date loyalty information.

NEW QUESTION # 18

Cloud Kicks has been using Loyalty Management, Sales Cloud, and Service Cloud as part of its tech stack to manage its Loyalty Program. The marketing team is interested in implementing Salesforce Marketing Cloud, so Loyalty program members can be informed and engaged with personalized emails sent using Salesforce Marketing Cloud.

Using the least development effort, how can the Loyalty Management Consultant accomplish the necessary integration between Salesforce Marketing Cloud and Loyalty Management platforms?

- A. Install and configure Salesforce Marketing Cloud Contacts Connection
- **B. Install and configure Marketing Cloud Connect to integrate with Loyalty Management**
- C. Design Datasets with Dataflows and the Dataset Builder
- D. Create a connected app to integrate Salesforce Loyalty Management and Marketing Cloud via APIs

Answer: B

Explanation:

To integrate Salesforce Marketing Cloud with Loyalty Management with minimal development effort, the recommended approach is:
 * Option D: Installing and configuring Marketing Cloud Connect. This tool facilitates seamless integration between Salesforce CRM platforms, including Loyalty Management, and Salesforce Marketing Cloud, enabling the synchronization of data and the automation of personalized email campaigns to Loyalty Program members.

NEW QUESTION # 19

Universal Container (UC) is developing a points-based Loyalty Program after the last accrual transaction. How can the Salesforce Administrator set up this expiration model?

- **A. Set up Expire Activity Based Non-Qualifying Points**
- B. Set up Expire Activity Based Qualifying Points
- C. Set up Expire Fixed Non-Qualifying Points
- D. Set up Reset Qualifying Points

Answer: A

Explanation:

To set up an expiration model based on activity after the last accrual transaction in a points-based Loyalty Program at Universal Container, the Salesforce Administrator should Set up Expire Activity Based Non-Qualifying Points (C). This expiration model allows non-qualifying points to expire after a certain period of inactivity, meaning no new accrual transactions occur within that timeframe. It encourages ongoing engagement from Loyalty Program members by incentivizing regular transactions to keep their non-qualifying points active.

Option A (Expire Activity Based Qualifying Points) pertains to qualifying points, which are typically used for tier progression and may have different expiration criteria. Option B (Expire Fixed Non-Qualifying Points) refers to a fixed expiration model that does not consider member activity. Option D (Set up Reset Qualifying Points) involves resetting qualifying points, which is a different concept from expiration based on activity.

Salesforce documentation on Loyalty Management would provide insights into configuring various expiration models for points within a Loyalty Program, including activity-based expiration to foster continuous member engagement and transactional activity.

NEW QUESTION # 20

.....

In the course of studying AP-212 preparation torrent, we will serve you throughout the process, and our back-office staff will provide 24-hour free online consultation.
