AVIXA Certified Technology Specialist Sample Questions (Q93-Q98):

NEW QUESTION # 93

What does a compressor control in an audio system?

- A. directivity
- B. frequency
- **C. dynamic range**
- D. phase

Answer: C

Explanation:

In an audio system, a compressor controls the dynamic range by reducing the difference between the loudest and quietest parts of the audio signal. Compressors are used to maintain a consistent volume level, which is useful for both live and recorded audio environments.

CTS Technology Specialist Reference

CTS curriculum covers audio processing tools like compressors, which are essential for managing dynamic range and ensuring consistent audio output.

NEW QUESTION # 94

What would be the BEST way to verify proper performance of a CAT cable fitted with a new termination?

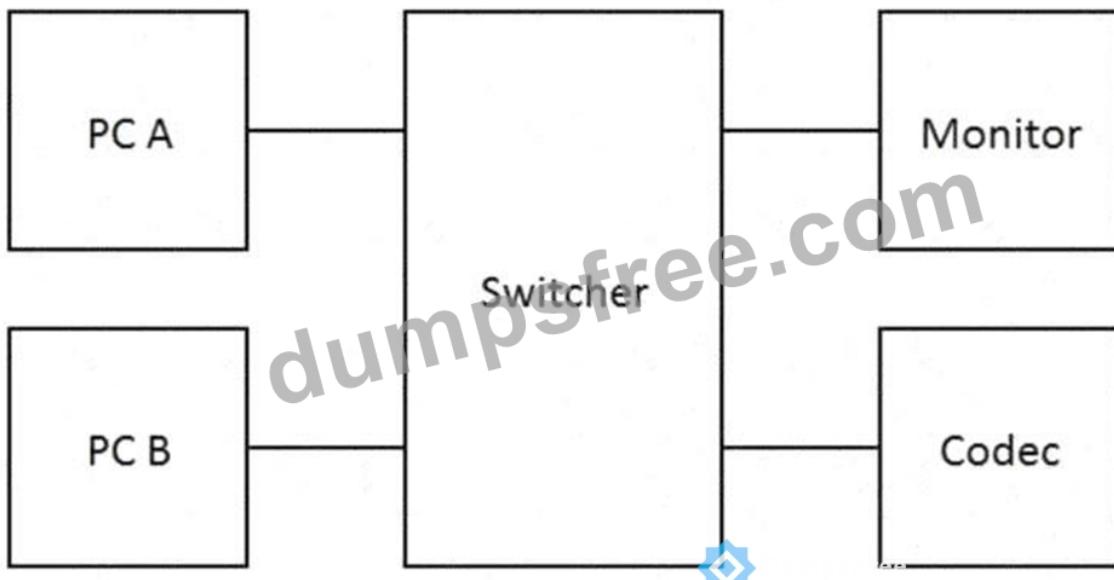

- A. use a multimeter to test if the pins have a connection
- B. connect the cable to a reference unit to check against it
- **C. use a cable tester and run a protocol**
- D. connect the source and sync, then verify there is a picture

Answer: C

Explanation:

Using a cable tester and running a protocol is the best way to verify the proper performance of a CAT cable with a new termination. Cable testers can check for continuity, wiring configuration, signal quality, and performance standards compliance (e.g., Cat 5e, Cat 6). They can detect faults such as open circuits, short circuits, and incorrect wiring, ensuring the cable is terminated correctly and capable of supporting the desired network speeds and protocols.

NEW QUESTION # 95

Two computers are connected to a videoconferencing system through a switcher using HDMI cables.

Computer content from PC A is being properly transmitted. However, when PC B is selected by the switcher, it does not work through the videoconferencing system. They both work when connected directly to the videoconferencing system or the monitor. The solution is to add a device that enables _____ management.

- A. DHCP
- B. DDC
- C. **HDCP**
- D. TMDS

Answer: C

Explanation:

The issue described is likely due to HDCP (High-bandwidth Digital Content Protection) incompatibility.

Since PC B does not work through the switcher but works directly, it indicates an HDCP handshake issue between the switcher and PC B. Adding an HDCP-compliant device, such as an HDCP-compliant switcher or repeater, can resolve this issue by ensuring that content protection protocols are properly managed.

CTS Technology Specialist Reference

CTS materials on digital video highlight the importance of HDCP management when dealing with protected content in HDMI connections, especially in videoconferencing systems.

NEW QUESTION # 96

A client with an open concept office space has stated a concern regarding speech privacy for workers. A possible solution for this issue is a(n)

- A. audio phase cancellation system
- **B. sound masking system**
- C. distributed speaker system
- D. individual audio monitor system

Answer: B

Explanation:

For an open-concept office space where speech privacy is a concern, a sound masking system is an effective solution. Sound masking involves adding a background sound, usually similar to airflow, to reduce the intelligibility of speech. This helps in minimizing distractions and enhancing privacy without isolating individuals physically.

CTS Technology Specialist Reference The CTS materials highlight sound masking as a preferred solution for enhancing speech privacy in open office environments. It effectively addresses concerns related to audible distractions and speech privacy, making it well-suited for such spaces.

NEW QUESTION # 97

Preventive maintenance is best described as maintenance that is carried out:

- A. At predetermined intervals
- B. On the equipment for performance monitoring
- C. Following detection of an anomaly
- D. By integrating analysis, measurement and periodic test activities

Answer: A

Explanation:

Preventive maintenance refers to scheduled upkeep performed at regular intervals, regardless of system status, to prevent failures. This can include filter cleaning, firmware updates, and cable inspections.

"Preventive maintenance is proactive and performed on a scheduled basis to maintain optimal system performance and reduce downtime."
