# 2026 Fantastic Test JN0-351 Registration Help You Pass JN0-351 Easily

DOWNLOAD the newest BraindumpsVCE JN0-351 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=12FmiUFKnbERyYtjztRHMcpIbOrb6t0Xv

The candidates can test themselves for the Enterprise Routing and Switching, Specialist (JNCIS-ENT) exam day by attempting the Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 practice test on the software. There is preparation material available on the JN0-351 Practice Exam software by BraindumpsVCE to study for the Juniper JN0-351 test.

As an IT field top company Juniper certifications are verified as senior products expert standards. Juniper field reputation and products market share improve certification engine's high gold content. JN0-351 latest vce exam simulator can help you pass exam and get certification so that you can obtain senior position soon. Senior engineers with professional certification have 60% opportunities and 30% salary or so more than normal engineers.

JN0-351 Valid Test Braindumps - JN0-351 Mock Exam

Don't you want to make a splendid achievement in your career? Certainly hope so. Then it is necessary to constantly improve yourself. Working in the Juniper industry, what should you do to improve yourself? In fact, it is a good method to improve yourself by taking Juniper certification exams and getting Juniper certificate. Juniper certificate is very important certificate, so more and more people choose to attend JN0-351 Certification Exam.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	• Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.
Topic 2	• Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.
Topic 3	• High Availability: This topic covers the importance and application of high availability within Junos OS environments. Knowledge in configuring and managing these components is critical for ensuring robust and uninterrupted network operations, aligning with exam expectations.

Topic 4	• BGP: This topic focuses on the operational and conceptual elements of BGP, a cornerstone in enterprise networks.
Topic 5	• Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 Exam.
Topic 6	• OSPF: The concepts and operational details of OSPF are explored, providing tools for routing efficiency. Configuration and troubleshooting mastery ensure readiness for both the exam and complex enterprise environments.
Topic 7	• Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.
Topic 8	• Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q22-Q27):

NEW QUESTION # 22
You have DHCP snooping enabled but no entries are automatically created in the snooping database for an interface on your EX Series switch. What are two reasons for the problem?
(Choose two.)

- A. MAC limiting is enabled on the interface.
- B. Dynamic ARP inspection is enabled on the interface.
- C. The device that is connected to the interface has performed a DHCPRELEASE.
- D. The device that is connected to the interface has a static IP address.

Answer: C,D

Explanation:
If the device connected to the interface has performed a DHCPRELEASE, it releases its IP address back to the DHCP server, resulting in the removal of the corresponding DHCP snooping entry.
If the device connected to the interface is using a static IP address, it will not send DHCP requests, and therefore no entries will be created in the DHCP snooping database for that device.

NEW QUESTION # 23
Which two actions are performed by the firewall filter shown in the exhibit? (Choose two.)

- A. Term two requires a fromstatement.
- B. All traffic is permitted.
- C. Frames without the 88:05:00:29:3c:de source MAC address are discarded and logged.
- D. Frames with the 88:05:00:29:3c:de source MAC address are accepted and logged.

Answer: B,D

NEW QUESTION # 24
You have configured a GRE interface, but no traffic will flow.
Referring to the exhibit, which statement is true?

- A. The gr-1/2/0 interface is an invalid GRE interface.
- B. The IP subnet mask cannot be a /32.
- C. The unit number cannot be 0.
- D. The source and destination addresses cannot have the same third octet.

Answer: B

NEW QUESTION # 25
Which two statements about redundant trunk groups on EX Series switches are correct? (Choose two.)

- A. If the active link fails, then the secondary link automatically takes over.
- B. Layer 2 control traffic is permitted on the secondary link
- C. Redundant trunk groups must be connected to the same aggregation switch.
- D. Redundant trunk groups load-balance traffic across two designated uplink interfaces.

Answer: A,B

Explanation:
Redundant trunk groups are designed to provide link redundancy. If the primary link fails, the secondary link will automatically take over to ensure continued connectivity.
In redundant trunk groups, while regular data traffic is sent over the primary link, Layer 2 control traffic (such as STP, LACP, etc.) is allowed on the secondary link to maintain network stability and protocol operations.
https://www.juniper.net/documentation/us/en/software/junos/multicast-l2/topics/topic- map/redundant-trunk-groups.html

NEW QUESTION # 26
Which two statements are correct about martian routes? (Choose two.)

- A. Martian routes are never installed in the route table.
- B. Additional prefixes can be added to the list of martian routes.
- C. Martian routes only represent publicly used prefixes.
- D. Martian routes are always host addresses.

Answer: A,B

Explanation:
Martian routes are never installed in the route table.
Martian routes refer to IP addresses or prefixes that are considered invalid or reserved, and they are not installed in the routing table.
Additional prefixes can be added to the list of martian routes.
Network administrators can configure the system to treat additional prefixes as Martian routes based on specific network policies or requirements.

NEW QUESTION # 27
......

If you want to sharpen your skills, or get the JN0-351 certification done within the target period, it is important to get the best JN0-351 exam questions. You must try BraindumpsVCE JN0-351 practice exam that will help you get Juniper JN0-351 certification. BraindumpsVCE hires the top industry experts to draft the Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam dumps and help the candidates to clear their JN0-351 exam easily. BraindumpsVCE plays a vital role in their journey to get the JN0-351 certification.
