It involves integrating AV systems, verifying their functionality, and managing the integration process, including training, documentation, and ensuring operational readiness.</li> </ul>

## AVIXA Certified Technology Specialist Sample Questions (Q206-Q211):

### NEW QUESTION # 206

In order to run three cables inside a conduit, what is the maximum percentage of a conduit's internal cross-sectional area to be considered?

- A. 53%
- B. 60%
- **C. 40%**
- D. 31%

**Answer: C**

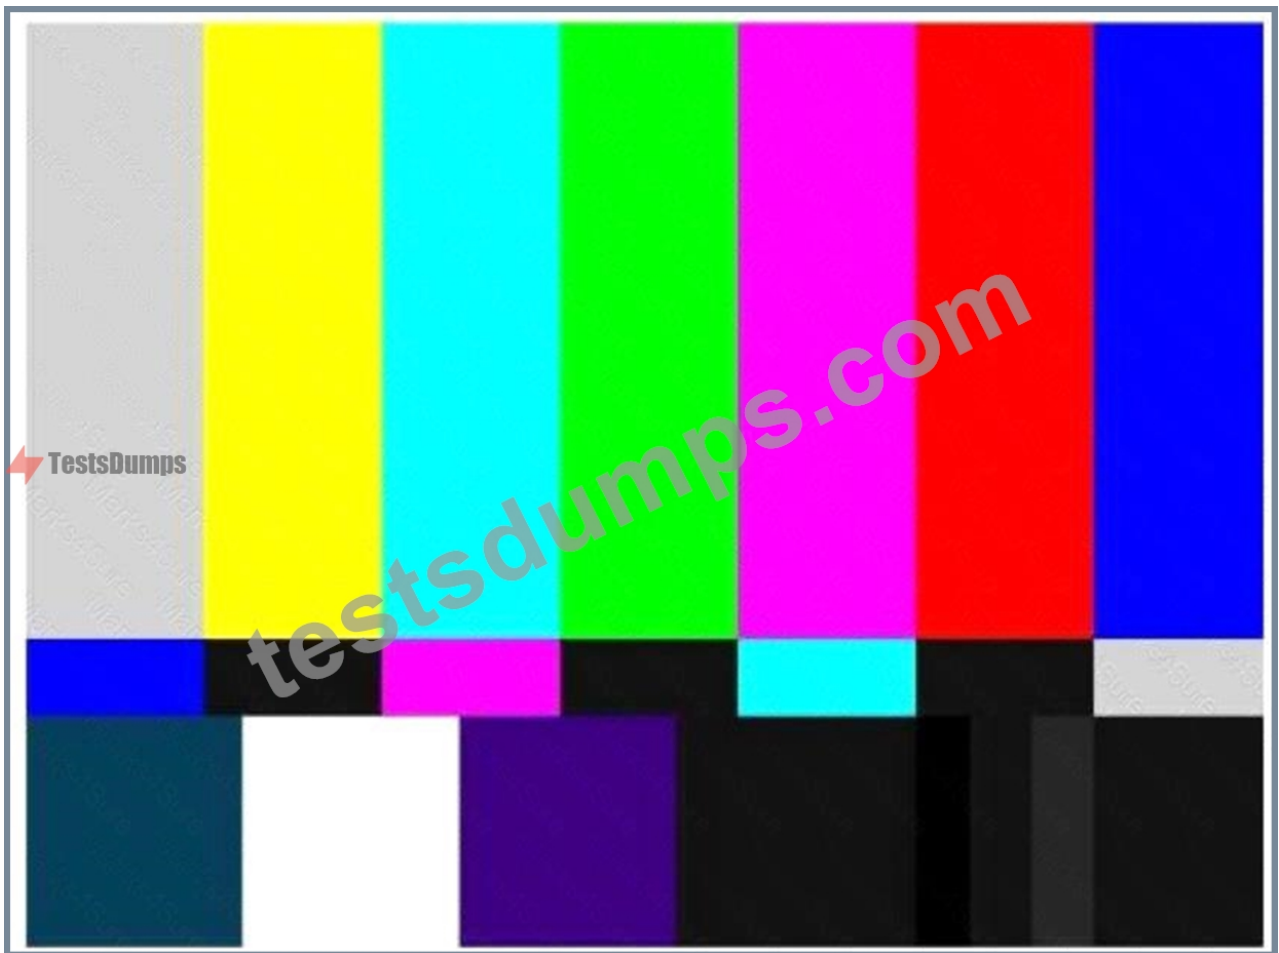

Explanation:

When running three cables inside a conduit, the maximum allowable fill is 40% of the conduit's internal cross-sectional area. This percentage is specified to ensure that there is adequate space for pulling the cables through without causing damage and to allow for proper airflow to prevent overheating.

CTS Technology Specialist Reference According to the CTS guidelines and National Electrical Code (NEC), conduits should not exceed 40% fill for three or more cables to ensure safety and maintain the integrity of the cables during installation and use.

### NEW QUESTION # 207

What section of the color chart is used to calibrate brightness? Select the answer by clicking on the appropriate area of the chart

**Answer:**

Explanation:

Explanation:

The section with the grayscale bars (bottom row, from white to black)

Brightness calibration is typically done using the grayscale section of a color chart. The grayscale bars provide a range of luminance levels from white to black, allowing the calibration process to adjust the display so that each shade is distinct and accurately represented. Proper calibration ensures that the display shows details in both bright and dark areas of the image, achieving the correct overall brightness.

#### NEW QUESTION # 208

The AV Project Manager is responsible for

- A. configuration, scope, maintenance.
- B. schedule, budget, scope.
- C. design, schedule, configuration.
- D. budget, installation, maintenance.

**Answer: B**

Explanation:

The AV Project Manager is responsible for managing the schedule, budget, and scope of a project. This encompasses ensuring the project is completed on time (schedule), within the allocated funds (budget), and meets all the agreed-upon requirements (scope). These three aspects are often referred to as the "triple constraint" in project management and are critical for the successful completion of a project.

#### NEW QUESTION # 209

A crucial part of the bid (tender) process is the request for clarification. At what point in the bid (tender) process would a potential bidder submit a request for clarification?

- A. After the walkthrough, but before the bid (tender) specification package is sent out
- B. After proposals are submitted, but before the award

- C. After the award, but before the job begins
- D. After the bid (tender) specifications are received, but before the proposals are due

**Answer: D**

Explanation:

Requests for clarification are typically submitted after receiving the bid specifications but before the proposal submission deadline. This allows potential bidders to seek additional information or clarification on the project requirements to prepare accurate and comprehensive proposals.

### NEW QUESTION # 210

How frequently should a personal fall arrest harness be inspected?

- A. before each use
- B. at the beginning of each work day
- C. weekly
- D. at the beginning of each project

**Answer: A**

Explanation:

A personal fall arrest harness should be inspected before each use. This is a critical safety measure to ensure that the harness is in good condition and will provide the necessary protection in case of a fall. Regular inspections can identify any wear, damage, or other issues that could compromise the safety of the user.
