# Latest Splunk SPLK-2002 Test Format - Valid SPLK-2002 Exam Tips

BONUS!!! Download part of PremiumVCEDump SPLK-2002 dumps for free: https://drive.google.com/open?id=1OXJh2RcgYKXdEXGMEjDec4JWmrWll6fW

Yes, as a lot of our loyal customers who have passed the SPLK-2002 exam and got the certification said that more than the SPLK-2002 certification, they felt they had been benifited more for they had obtained the knowledge and apply it in the daily work, which can help them finish all tasks efficiently. Then they do not need to work overtime. It is necessary to learn our SPLK-2002 Guide materials if you want to own a bright career development.

To be eligible for the Splunk SPLK-2002 Exam, candidates must have at least two years of experience in designing and deploying Splunk solutions. They must also have completed the Splunk Enterprise Certified Architect certification path, which includes the completion of Splunk Fundamentals I & II, Splunk for Enterprise Security, and Splunk App Development courses. Passing the SPLK-2002 exam demonstrates a candidate's competency in architecting and deploying complex Splunk solutions in large-scale environments. Moreover, it validates the candidate's ability to effectively manage data and ensure the security of Splunk deployments.

Splunk SPLK-2002 exam is a certification exam that tests the knowledge and skills of professionals who want to become a Splunk Enterprise Certified Architect. Splunk Enterprise Certified Architect certification is designed to validate the ability of individuals to design and deploy Splunk Enterprise solutions that meet the needs of organizations. SPLK-2002 Exam covers a wide range of topics and is recognized as a valuable credential for IT professionals who work with Splunk Enterprise.

Certification Path of Splunk SPLK-2002: Splunk Enterprise Certified Architect Exam

Splunk Core Certified User is a recommended entry-level exam to Splunk Core Certified architect. We encourage all candidates to become Splunk Core Certified Users as their first step in our certification program, though it is not required, Candidates can directly appear for Splunk SPLK-2002: Splunk Enterprise Certified Architect exam. **Splk-2002 exams exam dumps** provide the best learning and then the student can assess his skills with the help of **splk-2002 practice test** if the student wants to clear the exam on the first attempt.

Valid SPLK-2002 Exam Tips | Valid SPLK-2002 Exam Tutorial

To eliminate the chances of mistakes and prepare well for exams you must use SPLK-2002 practice test software. There are two types of Splunk Enterprise Certified Architect SPLK-2002 practice test software: You can install Splunk SPLK-2002 practice test

software on all window-based PCs. On the other hand, a web-based Splunk Enterprise Certified Architect Networking Solutions SPLK-2002 practice test can be used without the installation of any software. Practicing with these SPLK-2002 practice exams software seems like you are taking a Real SPLK-2002 Exam. This software allows you to take multiple Splunk SPLK-2002 exam attempts. At the end of each Splunk Enterprise Certified Architect SPLK-2002 exam attempt, you can check your progress. These Splunk SPLK-2002 practice tests assist you to know how to manage your time and complete the Splunk Enterprise Certified Architect SPLK-2002 exam within the specified time limit. Thus, Using these SPLK-2002 practice tests software will be beneficial if you want to achieve the highest score in the exam.

Splunk Enterprise Certified Architect Sample Questions (Q83-Q88):

NEW QUESTION # 83
A customer has a Search Head Cluster (SHC) with site1 and site2. Site1 has five search heads and Site2 has four. Site1 search heads are preferred captains. What action should be taken on Site2 in a network failure between the sites?

- A. Disable elections and set a static captain, notifying all members.
- B. Disable elections and set a static captain, then restart the cluster.
- C. Set a dynamic captain manually and restart.
- D. No action is required.

Answer: D

Explanation:
Comprehensive and Detailed Explanation (From Splunk Enterprise Documentation)Splunk's Search Head Clustering documentation explains that the cluster uses a majority-based election system. A captain is elected only when a node sees more than half of the cluster. In a two-site design where site1 has the majority of members, Splunk states that the majority site continues normal operation during a network partition. The minority site (site2) is not allowed to elect a captain and should not promote itself.
Splunk specifically warns administrators not to enable static captain on a minority site during a network split.
Doing so creates two independent clusters, leading to configuration divergence and severe data-consistency issues. The documentation emphasizes that static captain should only be used for a complete loss of majority, not for a site partition.
Because Site1 maintains majority, it remains the active cluster and site2 does not perform any actions. Splunk states that minority-site members should simply wait until network communication is restored.
Thus the correct answer is B: No action is required.
References:Splunk Search Head Clustering Manual (Captain Election Behavior, Static Captain Warnings, Site Partition Behavior).

NEW QUESTION # 84
To reduce the captain's work load in a search head cluster, what setting will prevent scheduled searches from running on the captain?

- A. adhoc_searchhead = true(on all members)
- B. captain_is_adhoc_searchhead = true(on the current captain)
- C. captain_is_adhoc_searchhead = true(on all members)
- D. adhoc_searchhead = true(on the current captain)

Answer: B

Explanation:
Explanation/Reference: https://docs.splunk.com/Documentation/Splunk/7.3.1/DistSearch/Adhocclustermember

NEW QUESTION # 85
When adding or decommissioning a member from a Search Head Cluster (SHC), what is the proper order of operations?

- A. 1. Delete Splunk Enterprise, if it exists.
  2. Install and initialize the instance.
  3. Join the SHC.
- B. 1. Trigger replication.
  2. Remove master node from cluster.
  3. Initialize cluster rebalance operation.
- C. 1. Initialize cluster rebalance operation.
  2. Remove master node from cluster.

3. Trigger replication.
- **D. 1. Install and initialize the instance.**
  2. Delete Splunk Enterprise, if it exists.
  3. Join the SHC.

Answer: D

Explanation

NEW QUESTION # 86
A Splunk deployment is being architected and the customer will be using Splunk Enterprise Security (ES) and Splunk IT Service Intelligence (ITSI). Through data onboarding and sizing, it is determined that over 200 discrete KPIs will be tracked by ITSI and 1TB of data per day by ES. What topology ensures a scalable and performant deployment?

- A. One search head with both ITSI and ES installed.
- B. One search head cluster with both ITSI and ES installed.
- **C. Two search head clusters, one for ITSI and one for ES.**
- D. Two search heads, one for ITSI and one for ES.

Answer: C

Explanation:
The correct topology to ensure a scalable and performant deployment for the customer's use case is two search head clusters, one for ITSI and one for ES. This configuration provides high availability, load balancing, and isolation for each Splunk app. According to the Splunk documentation1, ITSI and ES should not be installed on the same search head or search head cluster, as they have different requirements and may interfere with each other. Having two separate search head clusters allows each app to have its own dedicated resources and configuration, and avoids potential conflicts and performance issues1. The other options are not recommended, as they either have only one search head or search head cluster, which reduces the availability and scalability of the deployment, or they have both ITSI and ES installed on the same search head or search head cluster, which violates the best practices and may cause problems. Therefore, option B is the correct answer, and options A, C, and D are incorrect.
1: Splunk IT Service Intelligence and Splunk Enterprise Security compatibility

NEW QUESTION # 87
When preparing to ingest a new data source, which of the following is optional in the data source assessment?

- **A. Data retention**
- B. Data volume
- C. Data format
- D. Data location

Answer: A

NEW QUESTION # 88
......

In this version, you don't need an active internet connection to use the SPLK-2002 practice test software. This software mimics the style of real test so that users find out pattern of the real test and kill the exam anxiety. PremiumVCEDump offline practice exam is customizable and users can change questions and duration of Splunk Enterprise Certified Architect (SPLK-2002) mock tests.
