Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q16-Q21):

NEW QUESTION # 16

Huawei CloudLink videoconferencing platform consists of the SMC, MCU, and RSE.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

The statement is FALSE because it omits a critical component of the platform architecture: the SC (SwitchCenter) . A complete Huawei CloudLink/CloudVC infrastructure platform consists of four key Network Elements (NEs):

- * SMC (Service Management Center): For service logic and resource management.
- * SC (SwitchCenter): For signaling control, gatekeeper functions, and firewall traversal (H.323/SIP).
- * MCU (Multipoint Control Unit): For audio and video media switching and transcoding.
- * CloudRSE (Recording & Streaming Engine): For recording, live streaming, and video-on-demand.

Without the SC , the system cannot handle endpoint registration or complex call routing/traversal, which are essential platform functions.

NEW QUESTION # 17

Which of the following noises can be suppressed by the intelligent noise reduction algorithm of Huawei Box terminals? (Select all that apply)

- A. High-heeled heels
- B. Keyboard sound
- C. Coughing sounds
- D. Speaking voice
- E. Teacup crashing

Answer: A,B,C,E

Explanation:

Huawei's Intelligent Noise Reduction (AI Noise Cancellation) technology is built on deep learning models trained on millions of hours of audio data. Its primary goal is to distinguish between human speech and non- human background noise.

* Suppressed Noises: The algorithm identifies and filters out over 30 types of common office noises, including keyboard typing (E) , coughing (A) , shuffling of papers , teacup or pen clatter (B) , and the clacking of high-heeled shoes (D) .

* Preserved Sound: The Speaking voice (C) is specifically identified as the target signal. The AI ensures that while background "garbage" is removed, the human voice remains natural, clear, and undistorted.

NEW QUESTION # 18

Which of the following video codec protocols is not supported by Huawei CloudLink desktop & mobile?

- A. H.264 HP
- B. H.264 SVC
- C. H.265 SVC
- D. H.263 SVC

Answer: D

Explanation:

Huawei CloudLink soft clients (Desktop and Mobile) are designed for high-efficiency collaboration over diverse network conditions. They primarily utilize H.264 (Base Profile, Main Profile, and High Profile) and H.

264 SVC (Scalable Video Coding) to provide stable video even with 30% packet loss. Modern versions also support H.265 .

H.263 is an aging legacy protocol primarily used for backward compatibility with very old hardware systems.

Furthermore, "H.263 SVC " is not a standard industry implementation used in the Huawei CloudLink ecosystem, making it the

correct choice for a protocol that is not supported.

NEW QUESTION # 19

Huawei IdeaHub S2/B2 is an all-in-one endpoint, which includes: camera, electronic whiteboard, display, projector, speaker, and microphone.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

The Huawei IdeaHub S2/B2 is defined as a "6-in-1" intelligent collaboration device. It is designed to replace multiple disparate pieces of office equipment by integrating their functions into a single chassis:

- * Camera: Built-in 4K professional camera.
- * Electronic Whiteboard: Ultra-low latency touchscreen for writing.
- * Display: High-definition 4K professional screen.
- * Projector: Replaces traditional projection with 4K wireless screen sharing.
- * Speaker: Integrated high-fidelity speaker array.
- * Microphone: Integrated beamforming microphone array with an 8-meter pickup range.

This "all-in-one" design simplifies meeting room cable management and deployment.

NEW QUESTION # 20

Which statements about Huawei Service Management Center (SMC) are correct? (Select all that apply)

- A. Support 1080p@60 fps dual-stream recording and streaming
- B. Abundant conference control functions
- C. Open standards API facilitating quick interconnection and integration
- D. Flexible networking for large-capacity networking and lightweight deployment

Answer: B,C,D

Explanation:

The SMC serves as the "brain" of the Huawei Intelligent Collaboration solution.

* Option A is correct: It supports various networking scales, from single-node lightweight deployments to multi-level, large-capacity hierarchical networking for global enterprises.

* Option B is correct: It provides comprehensive control features, including extending conferences, inviting participants, switching continuous presence, and managing chair rights.

* Option C is correct: Huawei provides RESTful APIs for the SMC, allowing third-party developers to integrate video conferencing functions into their own office automation (OA) systems or apps.

* Option D is incorrect: While the SMC manages and initiates recording tasks, the actual technical capability to record and stream 1080p@60 fps dual-stream video is a feature of the CloudRSE (Recording & Streaming Engine), not the SMC itself.
