Latest 156-836 Exam Questions Vce, New 156-836 Test Preparation

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the 156-836 certification which is crucial for you successfully, I highly recommend that you should choose the 156-836 study materials from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the 156-836 Study Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.

Checkpoint 156-836 is a certification exam that validates the expertise of IT professionals in managing and deploying Check Point Maestro. 156-836 exam is designed to test the knowledge and skills needed to manage and troubleshoot complex networks using Check Point Maestro. Check Point Certified Maestro Expert - R81 (CCME) certification is ideal for network administrators, engineers, and security professionals who want to demonstrate their proficiency in handling Check Point Maestro.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q74-Q79):

NEW QUESTION # 74
What will happen in case of NAT of the traffic passing through Management network?

- A. This traffic will pass with no inspection
- B. Since Management traffic is always going to SMO, it will take a care for Correction Layer and will re-distribute traffic to other Appliances
- C. This traffic will not pass correction, since it will be dropped
- D. Orchestrator will disable NAT and traffic will pass with no issue

Answer: D

Explanation:
Explanation
According to the Check Point MAESTRO R80.20SP Administration Manual1, NAT is not supported on the management network. If you configure NAT on the management network, the Orchestrator will disable NAT and allow the traffic to pass without translation. This is to ensure that the management traffic can reach the Security Group members and the SmartConsole without any issues.

NEW QUESTION # 75
Maestro allows running commands globally in Expert mode by using global prefixes, such as:

- A. global
- B. g_all
- C. asg all
- D. all

Answer: B

Explanation:
The g_all prefix is used to run commands globally in Expert mode on all Security Group Members of the current Security Group. For example, g_all cpstop will stop the Check Point services on all SGMs. The other prefixes are not valid for global commands in Expert mode.

NEW QUESTION # 76
What is the command 'asg diag' used for?

- A. Asg diag is used for creating traffic flow diagrams
- B. Asg diag is used for system backup
- C. Asg diag used for system diagnostics on Chassis only. It does not exist on Maestro
- D. Asg diag is used for system diagnostics

Answer: D

Explanation:
The asg diag command is used for system diagnostics on both Maestro and Chassis systems. The asg diag command can perform various tests and checks on the system components, such as hardware, software, network, clock, ARP, and more. The asg diag command can help identify and troubleshoot any issues or errors that may affect the system functionality or performance.

NEW QUESTION # 77
There are two 10Gbps dual-port NIC installed on a 6800 appliance. Which interfaces should be connected to Orchestrator 1 for

downlinks' intra-orchestrator redundancy when using two Orchestrators?

- A. Port 1 in Slot 1 and Port 2 in Slot 1
- B. Port 1 in Slot 2 and Port 2 in Slot 1
- C. Any pair of available ports
- D. Port 1 in Slot 1 and Port 1 in Slot 2

Answer: D

Explanation:
Explanation
The correct interfaces to connect to Orchestrator 1 for downlinks' intra-orchestrator redundancy when using two Orchestrators are Port 1 in Slot 1 and Port 1 in Slot 2. This is because each slot represents a different NIC, and each port represents a different physical link. By connecting two ports from different slots, the appliance can have redundant connections to the same orchestrator, and avoid a single point of failure in case of a NIC or link failure.

NEW QUESTION # 78
Which command should be used to restart Orchestrator service only?

- A. orchd restart
- B. cpstop; cpstart
- C. reboot
- D. service orchestrator restart

Answer: A

Explanation:
Page 313 from the training manual:
- Restart the service:
orchd restart
- Restart the service without confirmation
service orchd restart
