What is the SAP Readiness Check used for?

- A. Assessing the landscape's readiness for transformation
- B. Measuring test coverage
- C. Forecasting project revenue
- D. Verifying SAP license usage

**Answer: A**

Explanation:

SAP Readiness Check is a pre-transformation assessment tool used to evaluate whether an existing SAP system is prepared for a major transition, such as converting to SAP S/4HANA or adopting cloud-based operations. It reviews key areas like custom code usage, add-on compatibility, simplification items, data volume, and integration impacts. The purpose is to identify risks, scope the transformation effort, and provide a clear understanding of required preparation activities. It is not used for testing coverage, revenue prediction, or license audits.

### NEW QUESTION # 11

What is used to run fit-to-standard workshops during the design phase?

- A. Template roadmaps
- B. Simplification lists
- C. Compatibility lists
- D. Best practice content

**Answer: D**

Explanation:

Fit-to-standard workshops rely on SAP Best Practice content to demonstrate standard business processes. This content includes ready-made process models, configuration guides, test scripts, and role definitions that help validate whether standard processes meet business requirements. Simplification and compatibility lists are used for system conversion impact analysis, not for fit-to-standard design activities. Therefore, best practice content is the correct basis for these workshops.
