Passing the Google Cloud-Digital-Leader Exam is a clear indication of a candidate's proficiency in GCP technologies, and it can help individuals stand out in the job market and advance their careers.

Google Cloud Digital Leader Sample Questions (Q135-Q140):

NEW QUESTION # 135

Your customer currently has a hybrid cloud setup including their on-premises data center and AWS. They are consolidating all their services on Google Cloud as part of a modernization plan and want to spend less IT effort in the future. There are about 10 MySQL and 25 PostgreSQL databases across the two DCs. What is the best option to for them?

- A. Use Cloud Dataflow service and setup Google's Cloud SQL as the sink and the others as the source, which will cause the data to flow in as expected.
- **B. Use the Database Migration Service**
- C. Use the Bare Metal Solution and copy the databases directly as they are on-premises and on AWS.
- D. Use the Data Catalog Service to manage the metadata of the databases

Answer: B

Explanation:

Database Migration is the right one to use: "Simplifying migrations to Cloud SQL. Now available for MySQL and PostgreSQL migrations, with SQL Server coming soon." Since the customer also doesn't want to manage their own database installations in the future, Cloud SQL is the best option.

NEW QUESTION # 136

Your organization is releasing its first publicly available application in Google Cloud. The application is critical to your business and customers and requires a 2-hour SLA.

How should your organization set up support to minimize costs?

- **A. Enroll in Enhanced Support**
- B. Enroll in Premium Support
- C. Enroll in Standard Support
- D. Enroll in Basic Support

Answer: A

NEW QUESTION # 137

An organization wants to move from a tactical cloud adoption approach to a transformational approach.

How should they adapt the way they lead the organization?

- **A. Increase top-down visibility and foster a culture of blamelessness**
- B. Shift from an operational expenditure model to capital expenditure
- C. Drive cloud adoption with an individual contributor focus
- D. Invest in on-premises infrastructure to redesign relationships between IT and employees

Answer: A

NEW QUESTION # 138

Your organization needs to restrict access to a Cloud Storage bucket. Only employees who are based in Canada should be allowed to view the contents.

What is the most effective and efficient way to satisfy this requirement?

- A. Create a group consisting of all Canada-based employees, and give the group access to the bucket
- B. Deploy the Cloud Storage bucket to a Google Cloud region in Canada
- **C. Give each employee who is based in Canada access to the bucket**
- D. Configure Google Cloud Armor to allow access to the bucket only from IP addresses based in Canada

Answer: C

NEW QUESTION # 139

Your organization offers public mobile apps and websites. You want to migrate to a Google Cloud-based solution for checking and maintaining your users' usernames and passwords and controlling their access to different resources based on their identity.

Which should your organization choose?

- A. Private Google Access
- **B. Identity Platform**
- C. VPN tunnels
- D. Compute Engine firewall rules

Answer: B

Explanation:

An identity platform is a modern solution for managing the identities of users and devices in a centralized fashion.

Reference:

An **identity** platform is a modern solution for managing the identities of users and devices in a centralized fashion. It enables organizations to securely authorize workforce and customer users to access their ecosystem using access management tools, programmable components, integrations, and platform services.

Today's organizations have a wide range of identity requirements. As they expand, embrace new innovations, and meet new customer demands, they need an identity solution that can grow with them. And as they grow, these organizations are also looking for offerings that centralize and consolidate identity, reducing the need for multiple access management, governance, and authentication products that don't necessarily talk to each other.

In short, although the concept of identity platforms is still new, the growth of disruptive technologies and highly personalized products and services has made a platform approach the key for effectively unifying identity management. But how did we get here?
