問題 #32

Which of the following statements, about the behavior of effective change managers as agile practitioners, are true?

- * They should take a single framework and apply it persistently.
- * They should remain resilient, flexible, and willing to learn.

- A. Both 1 and 2 are true.
- B. Only 1 is true.
- C. Neither 1 nor 2 is true.
- D. Only 2 is true.

答案: D

解題說明:

* Statement 1: Incorrect. Agile is rooted in adaptability and tailoring practices to fit the specific needs of a project. Taking a single framework and applying it persistently reflects rigidity, which contradicts the Agile principles of flexibility and continuous improvement. AgilePM advocates selecting and combining frameworks (e.g., Scrum, Kanban) based on the project environment rather than sticking to one rigidly.

* Statement 2: Correct. Resilience, flexibility, and a willingness to learn are central to Agile practitioners. They must adapt to challenges and new information to ensure continuous delivery of value. This aligns with Agile values of embracing change over following strict plans and the AgilePM philosophy of iterative improvement.

Key AgilePM Concepts Referenced:

- * Flexibility over Rigidity: AgilePM Handbook, Chapter 1, Section 1.4 ("The Agile Mindset").
- * Iterative Development and Learning: Chapter 3, Section 3.5 (Iterative Principles).

問題 #33

When using the Iterative Development technique, which of the following should each cycle include?

1. Thought
2. Action
3. Control
4. Conversation

- A. 1, 3, 4
- B. 2, 3, 4
- C. 1, 2, 3
- D. 1, 2, 4

答案: C

解題說明:

When using the Iterative Development technique, each cycle should include Thought, Action, and Control. These components ensure that the development process is systematic and reflective. Thought involves planning and considering the next steps, Action is the implementation of those plans, and Control is the evaluation and adjustment based on feedback and results. This iterative cycle helps in refining the product incrementally and ensures continuous improvement.
