

# Get Certified in One Go with Actual4Dumps's Reliable F5 F5CAB4 Questions

P.S. Free & New F5CAB4 dumps are available on Google Drive shared by Actual4Dumps: [https://drive.google.com/open?id=13Sfn5LmGu-bIpLB-IXCxfUrnryWO-g\\_q](https://drive.google.com/open?id=13Sfn5LmGu-bIpLB-IXCxfUrnryWO-g_q)

Don't let the F5CAB4 exam stress you out! Prepare with Actual4Dumps F5CAB4 exam dumps and boost your confidence in the real F5CAB4 exam. We ensure your road towards success without any mark of failure. Time is of the essence - don't wait to ace your F5CAB4 Certification Exam! Register yourself now.

It can be said that all the content of the F5CAB4 prepare questions are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn our F5CAB4 exam questions. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the F5CAB4 Practice Guide provide questions and answers, you can simply pass the F5CAB4 exam.

## Free F5CAB4 Practice & F5CAB4 Test Pattern

Our F5CAB4 real dumps has received popular acceptance worldwide with tens of thousands of regular exam candidates who trust our proficiency. Up to now, the passing rate is 98 to 100 percent. What made our F5CAB4 study guide so amazing? The answer that we only supply the latest and valid F5CAB4 Exam Braindumps for our customers and first-class after-sales services come after the first-class F5CAB4 learning engine. We're also widely praised by our perfect services.

## F5 BIG-IP Administration Control Plane Administration Sample Questions (Q46-Q51):

### NEW QUESTION # 46

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will be undone when Auto-Sync propagates the config to the HA pair.
- B. The change will be propagated next time a configuration change is made on the Active device.
- **C. The change will take effect when Auto-Sync propagates the config to the HA pair.**
- D. The change will be undone next time a configuration change is made on the Active device.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: TMOS Device Service Clustering (DSC) allows for configuration changes to be made on any device within a synchronization group. If Auto-Sync is enabled, the Control Plane detects the change on the Standby unit and automatically propagates (pushes) that updated configuration to the other members of the HA pair

### NEW QUESTION # 47

A local user account (Users) on the BIG-IP device is assigned the User Manager role. User1 attempts to modify the properties of another account (User2), but the action fails. The BIG-IP Administrator can successfully modify the User2 account. Assuming the principle of least privilege, what is the correct way to allow User1 to modify User2 properties?

- A. Modify the partition access for User1
- B. Grant User administrator privileges
- C. Move User1 to the same partition as User2
- D. Move User2 to the same partition as User1

**Answer: A**

Explanation:

In F5 TMOS, administrative roles and user permissions are partition-specific. The User Manager role allows an account to manage other user accounts, but this authority is restricted to the administrative partitions to which the User Manager has been granted access.

\* Partition Awareness: If User1 (the User Manager) attempts to modify User2 and fails, while the full Administrator succeeds, it indicates that User2 resides in a partition where User1 does not have management rights.

\* Principle of Least Privilege: This principle dictates that a user should be given only the minimum level of access necessary to perform their job functions.

\* Procedural Solution: Granting "Administrator" privileges (Option B) would violate least privilege by giving User1 full control over all system settings and all partitions. Moving users between partitions (Options A and C) might disrupt the organizational security structure. The correct and most secure administrative action is to modify the partition access for User1 to include the partition where User2 is located. This enables User1 to manage User2's properties while maintaining their restricted role as a User Manager.

### NEW QUESTION # 48

The BIG-IP Administrator runs the command:

```
netstat -an | grep 443
```

and sees the following output:

```
tcp 0 0 0.0.0.0:443 0.0.0.0:* LISTEN
```

What does this output indicate about the service on port 443? (Choose one answer)

- A. The service indicates no connections to the LISTEN port.
- B. The service is actively listening on all interfaces for HTTPS traffic.
- C. The service is in a standby state and unable to accept connections.
- D. The service is actively listening only on the loopback interface.

**Answer: B**

Explanation:

In netstat output:

\* 0.0.0.0:443 means the service is bound to all available IPv4 interfaces on the system.

\* LISTEN indicates the service is actively waiting for incoming connection requests.

Therefore, this output confirms that a service (commonly HTTPS/443, such as the BIG-IP Configuration Utility or an application listener) is actively listening on all interfaces, making B the correct answer.

Why the other options are incorrect:

\* A would show 127.0.0.1:443 if it were loopback-only.

\* C is incorrect because LISTEN explicitly indicates readiness to accept connections.

\* D is unrelated; standby state does not affect socket binding shown by netstat.

Hence, the correct answer is B.

### NEW QUESTION # 49

Users report that traffic is negatively affected every time a BIG-IP device fails over. The traffic becomes stabilized after a few minutes. What should the BIG-IP Administrator do to reduce the impact of future failovers?

- A. Configure a global SNAT Listener
- B. Enable Failover Multicast Configuration
- C. Set up Failover Method to HA Order
- D. Configure MAC Masquerade

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: When a failover occurs, the newly active device must inform the surrounding network that it now "owns" the shared IP addresses. Without MAC Masquerade, the new device uses its own hardware MAC, requiring upstream routers to update their ARP tables (which causes a delay). MAC Masquerading allows the HA pair to share a "floating" MAC address, ensuring the Control Plane transition is transparent to the network layer

#### **NEW QUESTION # 50**

One of the two members of a device group has been decommissioned. The BIG-IP Administrator tries to delete the device group, but is unsuccessful.

Prior to removing the device group, which action should be performed? (Choose one answer)

- A. Make sure all members of the device group are in sync
- B. Remove all members from the device group
- C. Disable the device group
- **D. Remove the decommissioned device from the device group**

**Answer: D**

Explanation:

A BIG-IP device group cannot be deleted if it still contains device members, even if one of those devices has already been decommissioned or is unreachable. Before deleting the device group, the administrator must explicitly remove the decommissioned device from the device group configuration.

Once the removed or unreachable device is deleted from the device group membership, the BIG-IP system allows the remaining administrator to successfully delete the device group.

Why the other options are incorrect:

\* A. Remove all members from the device group This is not required; the key requirement is removing the decommissioned device, not all members.

\* B. Make sure all members are in sync Synchronization status does not prevent device group deletion.

\* D. Disable the device group Device groups cannot be disabled; they must be modified or deleted.

Therefore, the correct prerequisite action is to remove the decommissioned device from the device group, making C the correct answer.

#### **NEW QUESTION # 51**

.....

We are intent on keeping up with the latest technologies and applying them to the F5CAB4 exam questions and answers not only on the content but also on the displays. Our customers have benefited from the convenience of state-of-the-art. That is why our pass rate on F5CAB4 practice quiz is high as 98% to 100%. The data are unique-particular in this career. With our F5CAB4 exam torrent, you can enjoy the leisure study experience as well as pass the F5CAB4 exam with success ensured.

**Free F5CAB4 Practice:** <https://www.actual4dumps.com/F5CAB4-study-material.html>

Why should you make your decision on the F5CAB4 training pdf vce, You can find our F5CAB4 exam guide PDF is valid certified materials based on the real test according to our free demo, and it is the best certified study guide website offering the real simulator questions and answers, Do not worry, Our average passing rate for F5 F5CAB4 exam is reaching to 99.6%.

You use Safari on your iPad in the same way, but the interface is a little different, Separation of Teams and Classification of Tasks, Why should you make your decision on the F5CAB4 Training Pdf vce?

## **100% Pass 2026 F5 - F5CAB4 - Reliable BIG-IP Administration Control Plane Administration Test Questions**

You can find our F5CAB4 exam guide PDF is valid certified materials based on the real test according to our free demo, and it is the best certified study guide website offering the real simulator questions and answers.

Do not worry, Our average passing rate for F5 F5CAB4 exam is reaching to 99.6%, Why not trying our study guide?
